

# Contents

Receptors – What We Know and What We Wish to Know D. Hadži (With 5 Figures) . . . . .	1
Biotechnological Applications of Model Membranes and Phospholipid Polymers F.M. Goñi, A. Alonso, and D. Chapman (With 13 Figures) . . . . .	19
Lipid Membrane Self-Assembly and Nonlamellar Phase Transitions D. Marsh (With 5 Figures) . . . . .	38
Spin Label ESR Spectroscopy and Molecular Mobility in Biological Systems D. Marsh (With 5 Figures) . . . . .	48
Neutron Scatter Studies of Chromatin Structure E.M. Bradbury and J.P. Baldwin (With 16 Figures) . . . . .	63
In Vivo NMR D.G. Gadian (With 2 Figures) . . . . .	93
Vision Research: Raman/Fluorescence Studies on Aging and Cataract Formation in the Lens N.-T. Yu and B.C. Barron (With 21 Figures) . . . . .	104
Representation of Visual World in the Striate Cortex S. Marčelja (With 6 Figures) . . . . .	129
Reflections on the Evolvement of Life M. Anbar . . . . .	142
The Interface Between Chemistry and Biology – Laws Determining Regularities in Early Evolution P. Schuster (With 13 Figures) . . . . .	154
Glossary . . . . .	187
Subject Index . . . . .	189
