Introduction	vii
1 The One-dimensional Anaplectic Representation	
1 The one-dimensional case	2
2 Analytic vectors of representations of $SL(2, \mathbb{R})$	20
2 The n-dimensional Anaplectic Analysis	
3 The anaplectic harmonic oscillator in dimension ≥ 2	46
4 Analysis on the space of Lagrangian subspaces of $\mathbb{R}^{2n}$	58
5 The n -dimensional anaplectic representation	82
6 Comparing the anaplectic and metaplectic representations	100
7 The dual anaplectic analysis	117
8 The pseudoscalar product in n -dimensional anaplectic analysis	126
3 Towards the Anaplectic Symbolic Calculi	
9 The Bargmann–Fock transformation in the anaplectic setting	148
10 Towards the one-dimensional anaplectic Weyl calculus	163
4 The One-dimensional Case Revisited	
11 The fourfold way and the ν -anaplectic representation	186
12 The pseudoscalar product on $\mathfrak{A}_\nu$	205
