1	New Methods of Detection of Caries	1
1.1	The Diagnosis of Caries	1
1.1.1	DIAGNOdent	5
1.1.2	Digital Imaging Fiber-Optic Transillumination	7
1.1.3	Fiber-Optic Transillumination	8
1.1.4	Quantitative Light-Induced Fluorescence	9
1.1.5	Radiology of Dental Caries	10
1.1.6	Electrical Conductance	12
1.1.7	Modern Caries Detection and Management	12
	References	13
2	New Developments in Caries Removal and Restoration	17
2.1	Caries Removal	17
2.1.1	Lasers	18
2.1.2	Polymer Bur	20
2.1.3	Micropreparation Burs	20
2.1.4	Air Abrasion (or Kinetic Cavity Preparation)	21
2.1.5	Photoactivated Disinfection	23
2.1.6	Carisolv Gel	23
2.1.7	Atraumatic Restorative Treatment	24
2.1.8	Caries-Detector Dyes	25
2.2	Restoration Following Caries Detection	26
2.2.1	Why Are Teeth Restored?	26
2.2.2	Caries as a Disease	27
2.2.3	Preventing Dental Caries	28
2.2.4	When Should Caries Be Restored?	30
2.2.5	Fissure Sealants	32
2.2.6	Ozone Therapy for the Treatment of Caries	32
2.3	Restorative Procedures	34
2.3.1	The "Tunnel" Restoration	34
2.3.2	The Proximal "Slot" Preparation	34
2.3.3	Traditional Cavity Preparation	35

2.3.4	The Repaired Amalgam Restoration	37
2.3.5	Cavity Preparations Involving Three or More Surfaces	37
2.3.6	Treatment of the Large Carious Lesion	38
2.3.7	The Use of Calcium Hydroxide in Direct Pulp Capping	40
2.3.8	The Foundation Restoration	41
2.3.9	Practical Aspects of Amalgam Retention	42
2.3.10	Pins vs Bonded Restorations	43
2.3.11	Amalgam Bonding Procedure	44
2.3.12	The Use of Base Materials	45

3.1	Ramped Curing Lights	52
3.2	Ceramic Inserts	52
3.3	Nanotechnology	54
3.4	“Total Etch” Technique	54
3.5	Fissure Sealants	55
3.6	Preventive Resin Restorations	56
3.7	Minimal Class II Restorations	57
3.8	Posterior Composite Resin Restoration	57
3.9	Direct Composite Resin Restorations	58
3.10	Studies of Direct Resin-Composite Restoration Survival	60
3.11	Reasons for Failure of Extensive Direct Composite Resin Restorations	60
3.12	The “Sandwich” Technique	62
3.13	Packable Composite Resin Materials	62
3.14	New Developments in Resin-Composite Technology	64
	References	64
4	The Single Crown, Veneers, and Bleaching	67
4.1	The Single Crown	67
4.1.1	Recurrent Caries and Periodontal Disease	67
4.1.2	The Tooth Becomes Nonvital	69
4.1.3	The Crown Restoration Becomes Loose	69
4.1.4	Perforation of the Crown During Occlusal Adjustment	73
4.1.5	The Appearance of the Crown is Unsatisfactory	74
4.1.5.1	Shade of the Crown	75
4.1.5.2	Shape of the Crown	76
4.1.5.3	Gingival Contour	76
4.1.5.4	Gingival Recession	76
4.2	New Developments in Crown Provision	78

4.3	Veneers	79
4.3.1	Tooth Preparation	79
4.3.2	Disadvantages of Veneers	81
4.3.3	Failure of Veneers	81
4.3.4	Cementation Procedures for a Veneer	83
4.3.5	Provisional Restorations for Veneers	83
4.4	Resin-Bonded All-Ceramic Crowns (or “Dentin-Bonded Crown”)	84
4.4.1	Marginal Leakage	86
4.4.2	Cementation Procedures for the Resin-Bonded All-Ceramic Crown	86
4.5	Bleaching of Teeth	87
4.5.1	Cervical Resorption	87
4.5.2	The “Walking Bleach” Technique	88
4.5.3	Vital Tooth Bleaching	89
4.5.4	In-House Tooth Bleaching	90
4.6	Microabrasion	90
	References	92
5	Noncarious Tooth Tissue Loss	95
5.1	Noncarious Tooth Wear	95
5.1.1	Clinical Appearance of Erosion	95
5.1.2	Clinical Appearance of Attrition	96
5.1.3	Clinical Appearance of Abrasion	97
5.2	Prevention of Toothwear	97
5.3	Recent Developments in the Treatment of Tooth Wear	100
5.3.1	Noncarious Cervical Restorations	100
5.3.2	Clinical Procedures for Restoration of Cervical Lesions	100
5.3.3	Why Do Cervical Restorations Fail?	101
5.3.4	New Developments in Direct Posterior Resin Composites	103
5.3.5	Addition of Resin Composite to Anterior Teeth	104
5.3.6	Developments in Indirect Resin Composite Technology	105
5.3.6.1	Targis/Vectris Crowns	106
5.3.6.2	Sinfony	106
