# Triangulations and Applications

With 126 Figures

 Springer

---

# Contents

<b>1</b>	<b>Triangles and Triangulations</b>	<b>1</b>
1.1	Triangles	1
1.2	Triangulations	5
1.3	Some Properties of Triangulations	7
1.4	A Triangulation Algorithm	10
1.5	Edge Insertion	16
1.6	Using Triangulations	18
1.7	Exercises	20
<b>2</b>	<b>Graphs and Data Structures</b>	<b>23</b>
2.1	Graph Theoretic Concepts	23
2.2	Generalized Maps (G-maps)	25
2.3	Data Structures for Triangulations	29
2.4	A Minimal Triangle-Based Data Structure	31
2.5	Triangle-Based Data Structure with Neighbors	32
2.6	Vertex-Based Data Structure with Neighbors	33
2.7	Half-Edge Data Structure	35
2.8	Dart-Based Data Structure	37
2.9	Triangles for Visualization	38
2.10	Binary Triangulations	41
2.11	Exercises	45
<b>3</b>	<b>Delaunay Triangulations and Voronoi Diagrams</b>	<b>47</b>
3.1	Optimal Triangulations	47
3.2	The Neutral Case	50
3.3	Voronoi Diagrams	51
3.4	Delaunay Triangulation as the Dual of the Voronoi Diagram	54
3.5	The Circle Criterion	57
3.6	Equivalence of the Delaunay Criteria for Strictly Convex Quadrilaterals	59

3.7	Computing the Circumcircle Test .....	62
3.8	The Local Optimization Procedure (LOP) .....	64
3.9	Global Properties of the Delaunay Triangulation .....	66
3.10	Exercises .....	71
<b>4</b>	<b>Algorithms for Delaunay Triangulation .....</b>	<b>73</b>
4.1	A Simple Algorithm Based on Previous Results .....	73
4.2	Radial Sweep .....	74
4.3	A Step-by-Step Approach for Making Delaunay Triangles ....	75
4.4	Incremental Algorithms .....	78
4.5	Inserting a Point into a Delaunay Triangulation .....	79
4.6	Point Insertion and Edge-Swapping .....	81
4.7	Running Time of Incremental Algorithms .....	87
4.8	Divide-and-Conquer .....	89
4.9	Exercises .....	92
<b>5</b>	<b>Data Dependent Triangulations .....</b>	<b>95</b>
5.1	Motivation .....	95
5.2	Optimal Triangulations Revisited .....	96
5.3	The General Concept .....	98
5.4	Data Dependent Swapping Criteria .....	101
5.5	On Implementation of the LOP .....	105
5.6	Modified Local Optimization Procedures (MLOP) .....	106
5.7	Simulated Annealing .....	106
5.8	Exercises .....	112
<b>6</b>	<b>Constrained Delaunay Triangulation .....</b>	<b>113</b>
6.1	Delaunay Triangulation of a Planar Straight-Line Graph ....	113
6.2	Generalization of Delaunay Triangulation .....	115
6.3	Algorithms for Constrained Delaunay Triangulation .....	118
6.4	Inserting an Edge into a CDT .....	119
6.5	Edge Insertion and Swapping .....	123
6.6	Inserting a Point into a CDT .....	127
6.7	Exercises .....	129
<b>7</b>	<b>Delaunay Refinement Mesh Generation .....</b>	<b>131</b>
7.1	Introduction .....	131
7.2	General Requirements for Meshes .....	132
7.3	Node Insertion .....	134
7.4	Splitting Encroached Segments .....	139
7.5	The Delaunay Refinement Algorithm .....	142
7.6	Minimum Edge Length and Termination .....	145
7.7	Corner-Lopping for Handling Small Input Angles .....	152
7.8	Spatial Grading .....	154
7.9	Exercises .....	154

<b>8</b>	<b>Least Squares Approximation of Scattered Data</b> .....	157
8.1	Another Formulation of Surface Triangulations .....	157
8.2	Approximation over Triangulations of Subsets of Data .....	160
8.3	Existence and Uniqueness .....	163
8.4	Sparsity and Symmetry .....	164
8.5	Penalized Least Squares .....	166
8.6	Smoothing Terms for Penalized Least Squares .....	168
8.7	Approximation over General Triangulations .....	175
8.8	Weighted Least Squares .....	178
8.9	Constrained Least Squares .....	180
8.10	Approximation over Binary Triangulations .....	182
8.11	Numerical Examples for Binary Triangulations .....	185
8.12	Exercises .....	191
<b>9</b>	<b>Programming Triangulations:</b>	
	<b>The Triangulation Template Library (TTL)</b> .....	193
9.1	Implementation of the Half-Edge Data Structure .....	194
9.2	The Overall Design and the Adaptation Layer .....	197
9.3	Topological Queries and the Dart Class .....	199
9.4	Some Iterator Classes .....	203
9.5	Geometric Queries and the Traits Class .....	205
9.6	Geometric and Topological Modifiers .....	211
9.7	Generic Delaunay Triangulation .....	213
9.8	Exercises .....	221
	<b>References</b> .....	223
	<b>Index</b> .....	229
