
Contents

Preface	vii
Participants	ix
List of Contributors	xi
Arithmetic over Function Fields: A Cohomological Approach <i>Gebhard Böckle</i>	1
Algebraic Stacks Whose Number of Points over Finite Fields is a Polynomial <i>Theo van den Bogaart and Bas Edixhoven</i>	39
On a Problem of Miyaoka <i>Holger Brenner</i>	51
Monodromy Groups Associated to Non-Isotrivial Drinfeld Modules in Generic Characteristic <i>Florian Breuer and Richard Pink</i>	61
Irreducible Values of Polynomials: A Non-Analogy <i>Keith Conrad</i>	71
Schemes over $\mathbb{F}_1$ <i>Anton Deitmar</i>	87
Line Bundles and p-Adic Characters <i>Christopher Deninger and Annette Werner</i>	101
Arithmetic Eisenstein Classes on the Siegel Space: Some Computations <i>Gerd Faltings</i>	133
Uniformizing the Stacks of Abelian Sheaves <i>Urs Hartl</i>	167

Faltings' Delta-Invariant of a Hyperelliptic Riemann Surface <i>Robin de Jong</i>	223
A Hirzebruch Proportionality Principle in Arakelov Geometry <i>Kai Köhler</i>	237
On the Height Conjecture for Algebraic Points on Curves Defined over Number Fields <i>Ulf Kühn</i>	269
A Note on Absolute Derivations and Zeta Functions <i>Jeffrey C. Lagarias</i>	279
On the Order of Certain Characteristic Classes of the Hodge Bundle of Semi-Abelian Schemes <i>Vincent Maillot and Damian Roessler</i>	287
A Note on the Manin–Mumford Conjecture <i>Damian Roessler</i>	311
