

Farid Amirouche

# Fundamentals of Multibody Dynamics

*Theory and Applications*

Birkhäuser  
Boston • Basel • Berlin

---

## Contents

<b>Preface</b> .....	xiii
<b>1 Particle Dynamics: The Principle of Newton's Second Law</b> .....	1
1.1 Introduction .....	1
1.2 Vectors .....	1
1.2.1 Scalar Product .....	2
1.2.2 Vector Product .....	3
1.3 Derivative of a Vector .....	5
1.4 Velocity and Acceleration in Several Coordinates .....	7
1.5 Dynamics of a System of Particles .....	15
1.6 Work and Kinetic Energy .....	17
1.6.1 Conservation of Energy .....	22
1.6.2 Conservative Forces .....	23
1.7 Principle of Impulse and Momentum .....	28
1.8 Angular Momentum .....	30
1.9 Principle of Virtual Work .....	32
1.10 Problems .....	37
<b>2 Rigid-Body Kinematics</b> .....	41
2.1 Introduction .....	41
2.2 Vectors Differentiation .....	41
2.3 First Derivatives and Partial Derivatives .....	43
2.3.1 Definition of a Derivative .....	43
2.3.2 Definition of Partial Derivatives .....	44
2.3.3 Total Derivative of a Vector .....	44
2.4 Generalized Coordinates .....	46
2.4.1 Cartesian Coordinates .....	46
2.4.2 Euler Angles and Direction Cosines .....	47
2.5 Euler and Rodriguez Formula .....	54
2.5.1 Euler Parameters .....	54
2.5.2 Rodriguez Parameters .....	66
2.6 Angular Velocity .....	68

2.7	Further Derivation of the Angular Velocity . . . . .	73
2.8	Angular Velocity and Euler Angles . . . . .	74
2.9	Angular Velocity and Euler Parameters . . . . .	75
2.10	Simple Angular Velocity . . . . .	76
2.11	Angular Velocity and Intermediate Reference Frames . . . . .	77
2.12	Angular Acceleration . . . . .	80
2.13	Velocity and Acceleration of a Fixed Point on a Rigid Body . . . . .	81
2.14	Velocity and Acceleration of a Moving Point on a Rigid Body . . . . .	89
2.15	Small Rotations . . . . .	93
2.16	Problems . . . . .	93
<b>3</b>	<b>Kinematics for General Multibody Systems . . . . .</b>	<b>107</b>
3.1	Introduction . . . . .	107
3.2	Configuration Graphs for Treelike Multibody Systems . . . . .	107
3.3	Generalized Coordinates Partitioning . . . . .	110
3.4	Transformation Matrices and Their Derivatives for <i>N</i> -Interconnected Rigid Bodies . . . . .	113
3.4.1	Transformation Matrices . . . . .	113
3.4.2	Time Derivatives of Transformation Matrices . . . . .	117
3.5	Angular Velocities and Partial Angular Velocities . . . . .	119
3.6	Angular Accelerations . . . . .	126
3.7	Generalized Speeds . . . . .	128
3.8	Mass Center Velocities of Arbitrary Interconnected Rigid Bodies in Treelike Systems . . . . .	133
3.9	Mass Center Accelerations of Arbitrary Interconnected Rigid Bodies in Treelike Systems . . . . .	150
3.10	Modeling of Joints . . . . .	156
3.10.1	Free Joint . . . . .	156
3.10.2	Ball-and-Socket Joint . . . . .	157
3.10.3	Revolute Joint . . . . .	158
3.11	Problems . . . . .	159
<b>4</b>	<b>Modeling of Forces in Multibody Systems . . . . .</b>	<b>181</b>
4.1	Introduction . . . . .	181
4.2	Forces, Moments and Equivalence Force Systems . . . . .	181
4.3	Generalized Active Force . . . . .	183
4.4	Modeling of Springs and Dampers at the Joints . . . . .	190
4.5	Contact Forces . . . . .	200
4.6	Gravitational Forces . . . . .	202
4.7	Generalized Inertia Forces . . . . .	207
4.8	Inertia Properties . . . . .	208
4.8.1	Second Moment . . . . .	208
4.8.2	Product of Inertia . . . . .	210
4.8.3	Properties of the Product of Inertia . . . . .	211
4.8.4	Inertia Dyadic . . . . .	213
4.8.5	Parallel Axes Theorem . . . . .	215

4.9	Problems .....	220
<b>5</b>	<b>Equations of Motion of Multibody Systems .....</b>	<b>225</b>
5.1	Introduction.....	225
5.2	Equations of Motion.....	225
5.3	Derivation of Kane's Equations Through the Principle of Virtual Work .....	226
5.3.1	Principle of Virtual Work .....	227
5.4	Automated Form of the Equations of Motion .....	232
5.4.1	Matrix Representation of the Equations of Motion .....	232
5.5	Problems .....	255
5.6	Project .....	260
<b>6</b>	<b>Hamilton–Lagrange and Gibbs–Appel Equations .....</b>	<b>287</b>
6.1	Introduction.....	287
6.2	Energy Equations .....	287
6.2.1	Kinetic Energy .....	287
6.2.2	Energy of a Rigid Body .....	289
6.2.3	Work, Potential Energy and Generalized Forces .....	290
6.3	Lagrange's Equations .....	293
6.4	Application of Lagrange Equations to Multibody Systems .....	303
6.5	Relationship Between Kane's and Lagrange Equations .....	305
6.6	Gibbs–Appel Equations .....	309
6.7	Hamilton's Equations .....	312
6.8	Problems .....	316
<b>7</b>	<b>Handling of Constraints in Multibody Systems Dynamics .....</b>	<b>319</b>
7.1	Introduction.....	319
7.2	Holonomic Constraints .....	319
7.3	Nonholonomic Constraints .....	320
7.4	Constrained Multibody Systems .....	321
7.5	The Augmented Method .....	323
7.6	Coordinate Reduction .....	324
7.7	Pseudo Upper Triangular Decomposition Method .....	326
7.8	The Zero-Eigenvalue Theorem and Embedding Method .....	341
7.8.1	The Zero-Eigenvalue Theorem .....	341
7.8.2	Embedding Method.....	343
7.9	Relation Between the PUTD and the Zero-Eigenvalue Theorem ..	347
7.10	Derivation of the Constraint Equation for Closed Loops .....	349
7.11	Prescribed Motion .....	353
7.12	Evaluation of the Constraint Forces .....	359
7.13	The Rolling Coin Problem: Kinematics, Forces and Constraints ..	373
7.14	Analysis and Simulation of Human Locomotion .....	382
7.15	Problems .....	388

<b>8</b>	<b>Numerical Stability of Constrained Multibody Systems</b>	395
8.1	Introduction	395
8.2	Baumgarte Stability Method	395
8.3	Numerical Solution of a Constrained System's Equations	399
8.4	Effect of Constraint Differentiation	400
8.5	Reduction to State-Space Form	401
8.6	Modified PUTD Method: A Gaussian Approach	402
8.7	Regularization of the Vanishing Constraints: The Amrouche–Ider Stabilization Method	406
8.8	Regularization of Linearly Dependent Constraints: The Amrouche–Ider Method	420
<b>9</b>	<b>Linearization and Vibration Analysis of Multibody Systems</b>	429
9.1	Introduction	429
9.2	Linearization of the Equations of Motion	429
9.3	Free Vibration of Continuous Beams: Natural Mode Shapes and Frequencies	440
9.3.1	Transverse Vibration	441
9.3.2	Longitudinal Vibration	445
9.3.3	Torsional Vibration	447
9.4	The Eigenvalue Problem	449
9.5	Rayleigh–Ritz Method	452
9.6	Assumed Modes Method	468
9.7	Forced System Response and Selection of Mode Shapes	468
9.7.1	Selection of Mode Shapes	470
9.8	Numerical Methods for Eigenvalue Problems	472
9.8.1	Jacobi Method	472
9.8.2	Subspace Iteration Method	475
9.9	Problems	479
<b>10</b>	<b>Dynamics of Multibody Systems with Terminal Flexible Links</b>	485
10.1	Introduction	485
10.2	Method of Motion Overlapping	485
10.2.1	Case 1: Transverse Vibration of the Flexible Body	487
10.2.2	Case 2: Longitudinal Vibration of the Flexible Beam	490
10.2.3	Case 3: Transverse Vibration of a Flexible Link Considering Inertia Force and Gravity	492
10.2.4	Case 4: Torsional Vibration of the Flexible Link	493
10.3	Derivation of the Equations of Motion Using the Finite-Element Method	494
10.4	Equations of Motion of an Elastic Beam Undergoing Large Rotation: A 2D FE Formulation	509
10.5	General Equations of Motion of Multibody Systems with Flexible Terminal Links	522
10.6	Six-Dimensional Beam Element Modeling of Terminal Flexible Links in MBS	527

10.7	Analysis of Elastic Beams with Time-Variant Boundary Conditions .....	533
10.8	Problems .....	546
<b>11</b>	<b>Dynamic Analysis of Multiple Flexible-Body Systems</b> .....	<b>551</b>
11.1	Introduction .....	551
11.2	Topology and Kinematics of Flexible Treelike Systems .....	551
11.3	Kinetics .....	557
11.4	An Illustrative Example .....	564
11.5	Reduction of the Equations of Motion Through Modal Analysis ..	573
11.6	Effect of Geometric Stiffening .....	576
11.6.1	Geometric Stiffness Matrix of an Isoparametric Brick Element .....	581
11.7	Dynamic Simulations: Applications .....	583
11.7.1	Dynamic Simulation of a Space-Based Robotic Manipulator Using Beam Elements .....	583
11.7.2	Dynamic Simulation of a Three-Flexible-Link Robot Using Three-Dimensional Brick Elements .....	587
11.8	Summary .....	593
11.9	Problems .....	593
<b>12</b>	<b>Modeling of Flexibility Effects Using the Boundary-Element Method</b> <b>597</b>	
12.1	Introduction .....	597
12.2	Model Description and Notation .....	599
12.3	Partial Velocities .....	600
12.4	Generalized Inertia Forces .....	602
12.5	Generalized Active Forces .....	603
12.6	Generalized Constraint Forces .....	605
12.7	Equations of Motion of a Continuum Body .....	605
12.8	Linearization of the Equations of Motion .....	607
12.9	Weighted Residual Statement .....	607
12.10	Body Forces .....	614
12.11	Formulation of the Nonlinear Stiffness Matrix .....	618
12.11.1	Nonlinear Stiffness Matrix due to Boundary Integral ..	619
12.11.2	Nonlinear Stiffness Matrix due to DRM Integral .....	620
12.12	General Equations of Motion .....	623
12.13	Numerical Example .....	627
12.14	Conclusion .....	632
Appendix A:	Multibody Dynamics Flowchart for the Construction of the Equations of Motion with Constraints .....	635
Appendix B:	Centroid Location and Area Moment of Inertia .....	639
Appendix C:	Center of Gravity and Mass Moment of Inertia of Homogeneous Solids .....	641

xii      **Contents**

Appendix D: Symbols Description .....	645
Appendix E: Units and Conversion .....	651
References.....	655
Index .....	681
