

Table of Contents

Introduction	1
I Money, Bonds and Economic Activity	
1 Money, Bonds and Interest Rates	9
1.1 Introduction	9
1.2 Some Basics	9
1.3 Macroeconomic Theories of the Interest Rate	10
1.4 Monetary Policy and Interest Rates	13
1.5 Monetary Policy and Asset Prices	14
1.6 Conclusions	15
2 Term Structure of Interest Rates	17
2.1 Introduction	17
2.2 Definitions and Theories	17
2.3 Empirical Tests on the Term Structure	19
2.4 Conclusions	23
II The Credit Market and Economic Activity	
3 Theories on Credit Market, Credit Risk and Economic Activity	27
3.1 Introduction	27
3.2 Perfect Capital Markets: Infinite Horizon and Two Period Models ..	27
3.3 Imperfect Capital Markets: Some Basics	35
3.4 Imperfect Capital Markets: Microtheory	37
3.5 Imperfect Capital Markets: Macrotheory	39
3.6 Imperfect Capital Markets: The Micro-Macro Link	43
3.7 Conclusions	48
4 Empirical Tests on Credit Market and Economic Activity	49
4.1 Introduction	49
4.2 Bankruptcy Risk and Economic Activity	49
4.3 Liquidity and Economic Activity in a Threshold Model	55
4.4 Estimations of Credit Risk and Sustainable Debt	63
4.5 Conclusions	76

III The Stock Market and Economic Activity

5	Approaches to Stock Market and Economic Activity	79
5.1	Introduction	79
5.2	The Intertemporal Approach	80
5.3	The Excess Volatility Theory	82
5.4	Heterogeneous Agents Models	84
5.5	The VAR Methodology	85
5.6	Regime Change Models	87
5.7	Conclusions	88
6	Macro Factors and the Stock Market	89
6.1	Introduction	89
6.2	A Dynamic Macro Model	90
6.3	Empirical Results	93
6.4	Conclusions	95
7	New Technology and the Stock Market	97
7.1	Introduction	97
7.2	Some Facts	97
7.3	The Model	99
7.4	Conclusions	102

IV Asset Pricing and Economic Activity

8	Static Portfolio Theory: CAPM and Extensions	105
8.1	Introduction	105
8.2	Portfolio Theory and CAPM: Simple Form	105
8.3	Portfolio Theory and CAPM: Generalizations	110
8.4	Efficient Frontier for an Equity Portfolio	112
8.5	Conclusions	113
9	Consumption Based Asset Pricing Models	115
9.1	Introduction	115
9.2	Present Value Approach	115
9.3	Asset Pricing with a Stochastic Discount Factor	116
9.4	Derivation of some Euler Equations	119
9.5	Consumption, Risky Assets and the Euler Equation	122
9.6	Conclusions	126

10 Asset Pricing Models with Production	129
10.1 Introduction	129
10.2 Stylized Facts	131
10.3 The Baseline RBC Model	131
10.4 Asset Market Restrictions	133
10.5 Conclusions	135

V Foreign Exchange Market, Financial Instability and Economic Activity

11 Balance Sheets and Financial Instability	139
11.1 Introduction	139
11.2 The Economy-Wide Balance Sheets	140
11.3 Households' Holding of Financial Assets	141
11.4 Shocks and Financial Market Reactions	143
11.5 Conclusions	144
12 Exchange Rate Shocks, Financial Crisis and Output Loss	145
12.1 Introduction	145
12.2 Stylized Facts	146
12.3 The Standard Exchange Rate Overshooting Model	147
12.4 Exchange Rate Shocks and Balance Sheets	151
12.5 Exchange Rate Shocks, Balance Sheets and Economic Contraction	153
12.6 Exchange Rate Shocks, Credit Rationing and Economic Contractions	159
12.7 Exchange Rate Shocks, Default Premia and Economic Contractions	163
12.8 Conclusions	167
13 International Portfolio and the Diversification of Risk ...	169
13.1 Introduction	169
13.2 Risk from Exchange Rate Volatility	169
13.3 Portfolio Choice and Diversification of Risk	172
13.4 International Bond Portfolio	173
13.5 International Equity Portfolio	175
13.6 Efficient Frontier of an International Portfolio	177
13.7 Conclusions	177

VI Advanced Modeling of Asset Markets

14 Agent Based and Evolutionary Modeling of Asset Markets	181
14.1 Introduction	181

14.2 Heterogeneous Agent Models.....	181
14.3 Evolutionary Models	184
14.4 Conclusions	187
15 Behavioral Models of Dynamic Asset Pricing	189
15.1 Introduction	189
15.2 Dynamic Habit Formation Models.....	189
15.3 Moving Beyond Consumption Based Asset Pricing Models	195
15.4 The Asset Pricing Model with Loss Aversion	198
15.5 Conclusions	202
16 Dynamic Portfolio Choice Models	203
16.1 Introduction	203
16.2 Wealth Accumulation and Portfolio Decisions	203
16.3 Discrete Time Dynamic Portfolio Choice under Log-Normality ...	206
16.4 Continuous Time Deterministic Dynamic Portfolio Choice	209
16.5 Continuous Time Stochastic Dynamic Portfolio Choice	215
16.6 Conclusions	222
17 Some Policy Conclusions	223
Bibliography	239
Subject Index	253
