# **Sinkholes and Subsidence**

**Karst and Cavernous Rocks  
in Engineering and Construction**

Published in association with  
**Praxis Publishing**  
Chichester, UK

# Contents

<b>Preface</b> . . . . .	xi
<b>Contributors</b> . . . . .	xiii
<b>List of figures</b> . . . . .	xv
<b>List of tables</b> . . . . .	xxv
<b>List of boxes</b> . . . . .	xxvii
<b>Glossary</b> . . . . .	xxix
<b>1 Rocks, dissolution and karst</b> . . . . .	1
1.1 Limestone lithologies . . . . .	2
1.2 Limestone and dissolution . . . . .	5
1.2.1 Cavernous ground . . . . .	7
1.3 Karst landforms development by dissolution . . . . .	9
1.4 Climatic influence on limestone karst . . . . .	10
1.4.1 Types of limestone karst landscape . . . . .	12
1.5 Dolomite and its sinkholes . . . . .	15
1.6 Chalk and its sinkholes . . . . .	16
1.7 Evaporite rocks and their sinkholes . . . . .	18
1.7.1 Dissolution and sinkholes on gypsum and anhydrite . . . . .	19
1.7.2 Dissolution and sinkholes on salt . . . . .	21
1.8 Man's influence on dissolution and sinkholes . . . . .	21

<b>2 Sinkhole classification and nomenclature</b>	25
2.1 Sinkholes and dolines	25
2.2 Classification of sinkholes	26
2.3 Solution sinkholes and solution dolines	29
2.3.1 Solution dolines and engineering	35
2.3.2 Solution dolines on salt	37
2.3.3 Solution dolines on gypsum	40
2.4 Collapse and caprock sinkholes	41
2.5 Subsidence, suffosion and dropout sinkholes	43
2.6 Buried sinkholes	44
2.7 Karst types and sinkhole distribution	44
2.7.1 Sinkholes in the engineering classification of karst	45
<b>3 Rock failure in collapse and caprock sinkholes</b>	49
3.1 Karstic collapse	49
3.2 Collapse of cave chambers	50
3.2.1 Cave roof breakdown by bed failure	52
3.2.2 Stable arch development in cave roofs	55
3.2.3 Breakdown processes	56
3.3 Collapse sinkholes	58
3.3.1 Collapse sinkholes in limestones	58
3.3.2 Tiankengs	64
3.3.3 Collapse sinkholes in chalk	66
3.3.4 Collapse sinkholes in gypsum	67
3.4 Caprock sinkholes	70
3.4.1 Caprock sinkholes over limestone	70
3.4.2 Caprock sinkholes over gypsum	75
3.4.3 Caprock sinkholes over salt	78
3.5 Breccia pipes	80
3.6 The collapse geohazard	83
<b>4 Soil failure in subsidence sinkholes</b>	85
4.1 Subsidence sinkhole morphology	85
4.2 Types of subsidence sinkholes	92
4.3 Dropout sinkholes	95
4.3.1 Growth and failure of soil cavities	98
4.3.2 Evolution of subsidence sinkholes	101
4.4 Spatial distribution of subsidence sinkholes	103
4.4.1 Subsidence sinkholes related to cover thickness	107
4.5 The subsidence sinkhole geohazard	108
<b>5 Buried sinkholes and rockhead features</b>	111
5.1 Buried sinkhole morphology	112
5.1.1 Compaction and suffosion in buried sinkholes	118

5.2	Buried sinkholes as engineering hazards . . . . .	120
5.3	Buried sinkholes and soil pipes in chalk . . . . .	125
<b>6</b>	<b>Sinkholes in insoluble rocks . . . . .</b>	<b>129</b>
6.1	Lava tubes . . . . .	129
6.1.1	Lava tube stability . . . . .	132
6.1.2	Engineering failures related to lava sinkholes . . . . .	136
6.2	Sinkholes in other forms of pseudokarst . . . . .	137
<b>7</b>	<b>Rock failure under imposed load over caves . . . . .</b>	<b>141</b>
7.1	Recorded collapse sinkholes induced by loading . . . . .	142
7.2	Bearing capacity of cave roofs . . . . .	144
7.2.1	Integrity of loaded rock arches . . . . .	145
7.2.2	Modelling the failure of cave roofs under load . . . . .	146
7.2.3	Punching failure of cave roofs . . . . .	149
7.3	Safe cover thickness over caves . . . . .	151
7.4	Existing structures over caves . . . . .	154
<b>8</b>	<b>Sinkholes induced by engineering works . . . . .</b>	<b>157</b>
8.1	Sinkholes induced by increased water input . . . . .	159
8.1.1	Sinkholes caused by reservoir impoundment . . . . .	164
8.2	Sinkholes induced by water table decline . . . . .	165
8.2.1	Sinkholes induced by groundwater abstraction . . . . .	166
8.2.2	Sinkholes induced by de-watering . . . . .	170
8.3	Sinkholes induced by ground disturbance . . . . .	176
8.4	The avoidable geohazard of induced sinkholes . . . . .	177
<b>9</b>	<b>Ground investigation in sinkhole terrains . . . . .</b>	<b>181</b>
9.1	Preliminary stages . . . . .	182
9.2	Ground investigation fieldwork . . . . .	184
9.3	Ground-based geophysical surveys . . . . .	185
9.3.1	Geophysical methods . . . . .	186
9.3.2	Surface seismic surveys . . . . .	189
9.3.3	Electrical resistivity surveys . . . . .	190
9.3.4	Electromagnetic conductivity surveys . . . . .	191
9.3.5	Ground penetrating radar . . . . .	192
9.3.6	Microgravity surveys . . . . .	193
9.3.7	Magnetic surveys . . . . .	194
9.3.8	Cross-hole tomography . . . . .	195
9.4	Airborne and satellite remote sensing . . . . .	198
9.5	Direct investigations . . . . .	199
9.5.1	Soil probing . . . . .	200
9.5.2	Rock probing and boring . . . . .	203

<b>10 Hazard and risk assessment of sinkholes . . . . .</b>	<b>205</b>
10.1 Hazard and risk . . . . .	205
10.2 Risk management . . . . .	206
10.3 Karst hazard analysis . . . . .	209
10.3.1 Parameters in sinkhole hazard assessment . . . . .	212
10.3.2 Sinkhole hazard assessment in South Africa . . . . .	215
10.4 Hazard maps and land-use planning . . . . .	218
10.5 Legislation in response to sinkhole hazards. . . . .	221
10.6 Sinkholes and insurance . . . . .	223
<b>11 Prevention and remediation of sinkholes . . . . .</b>	<b>227</b>
11.1 Soil treatment as sinkhole prevention . . . . .	227
11.1.1 Grouting in karst . . . . .	228
11.1.2 Compaction grouting over cavernous karst. . . . .	229
11.1.3 Soil stabilisation for sinkhole limitation. . . . .	231
11.2 Sinkhole remediation . . . . .	233
11.2.1 Repairs to large sinkhole failures . . . . .	235
11.3 Landfills in sinkhole karst . . . . .	239
11.3.1 Sinkholes as pollution sources . . . . .	241
11.3.2 Landfill within sinkholes. . . . .	241
<b>12 Construction in sinkhole terrains . . . . .</b>	<b>245</b>
12.1 Construction on soil over karst . . . . .	245
12.1.1 Control of drainage. . . . .	246
12.1.2 Foundations within the soil over pinnacled bedrock. . . . .	247
12.1.3 Extended foundations on rafts and mattresses. . . . .	248
12.1.4 Sinkhole flooding . . . . .	251
12.2 Roads and railways on karst . . . . .	253
12.2.1 Geogrid as a sinkhole defence . . . . .	255
12.3 Foundations on karst bedrock . . . . .	257
12.3.1 Driven piles and pin piles. . . . .	261
12.3.2 Bored piles and caissons. . . . .	264
12.3.3 Proof testing for piles in karst. . . . .	265
12.4 Tunnels through cavernous ground . . . . .	266
12.5 Dam construction in sinkhole karst. . . . .	268
<b>13 Case studies . . . . .</b>	<b>271</b>
#1 Remediation of a sinkhole over gypsum at Ripon, U.K. . . . .	272
#2 Collapse sinkhole at Dishman Lane, Kentucky . . . . .	277
#3 Caves and sinkholes in motorway construction, Slovenia . . . . .	283
#4 Road built over Sung Gul lava tube, Korea . . . . .	289
#5 Karst collapse prevention along Shui-Nan Highway, China . . . . .	293
#6 Construction over a cave in Huntsville, Alabama. . . . .	299
#7 Sinkhole destruction of Corporate Plaza, Pennsylvania . . . . .	304
#8 Subsidence over a chalk pipe at Chalfont St. Peter, U.K. . . . .	309

#9 Geophysical investigations of sinkholes in chalk, U.K. . . . .	313
#10 Detection of caves by microgravity geophysics, Bahamas . . . . .	317
#11 Sinkholes and subsidence over salt at Wink, Texas. . . . .	321
#12 Subsidence over buried karst at Centurion, South Africa. . . . .	326
#13 Agriculture on sinkhole karst on gypsum, Lithuania . . . . .	331
#14 Sinkhole remediation over Weeks Island salt, Louisiana . . . . .	336
#15 Hazard assessment on dolomite at Simunye, South Africa . . . . .	341
#16 Ground investigation in covered karst at Tournai, Belgium . . . . .	347
<b>References</b> . . . . .	351
<b>Location index</b> . . . . .	375
<b>Subject index</b> . . . . .	379
