

Contents

LIST OF SYMBOLS V

1 INTRODUCTION TO DAYLIGHTING AND SOLAR CONTROL 1

1.1 WHY DAYLIGHTING 1

1.2 DEFINITIONS..... 3

1.3 BIBLIOGRAPHY..... 7

2 FUNDAMENTAL OPTICS..... 9

2.1 THE REFRACTION 9

2.2 ENERGY AND VISUAL PROPERTIES 10

2.3 TOTAL SOLAR ENERGY TRANSMITTANCE (G-VALUE) 10

2.4 GLAZING AND SHADING DEVICES 11

2.5 BIBLIOGRAFY..... 13

**3 A NEW METHOD FOR SOLAR CONTROL EVALUATION IN BUILDING
SIMULATION PROGRAMME14**

3.1 METHOD 14

3.2 INTRODUCTION AND MOTIVATIONS 16

3.3 DESCRIPTION OF THE MODEL AND OF THE NEW ESP-R INTERFACE. 18

3.4 PRINCIPLE OF THERMAL SIMULATION: THE ESP-R SYSTEM 20

3.5 SIMULATION METHODOLOGY 21

3.6 MODEL VALIDATION 27

3.7 CONCLUSION AND PERSPECTIVES..... 29

3.8 BIBLIOGRAPHY 31

4 BUILDING SIMULATION RESULTS..... 32

4.1 FREIBURG RESULTS..... 32

4.2 MILAN RESULTS..... 40

4.3 STOCKHOLM RESULTS 44

4.4 CONCLUSIONS AND PERSPECTIVES..... 47

4.5 BIBLIOGRAPHY 48

5 THE NEW ANGLE SELECTIVE PV FAÇADE 49

5.1 BACKGROUND..... 51

5.2 OPTIMIZATION OF THE ANGLE-SELECTIVE-PV FAÇADE..... 52

5.3 PROTOTYPE PRODUCTION 76

5.4 BIBLIOGRAPHY..... 78

6 SIMULATION ANALYSIS 79

6.1 PRINCIPLE OF RAYTRACING AND LIGHTING SIMULATION..... 79

6.2	RADIANCE SIMULATION VALIDATION.....	88
6.3	SOLAR PROTECTION AND DAYLIGHT ANALYSIS	92
6.4	BUILDING ENERGY SIMULATION ANALYSIS	103
6.5	PV-INTEGRATION (POTENTIALITY).....	112
6.6	FAÇADE INTEGRATION	117
6.7	CONCLUSIONS	119
6.8	BIBLIOGRAPHY	120
7	ANNEX-A.....	123
7.1	“UPPERSKY-INTEGRATION” CONFIGURATION	123
8	ANNEX-B	127
8.1	BI-DIRECTIONAL DATA FOR ESP-R	127
9	ANNEX-C.....	129
9.1	LABORATORY MEASUREMENT	129
