Abbreviations	XXI

1 Common Bean

P.N. Miklas. S.P. Singh	1
1.1 Introduction	1
1.1.1 History of the Crop	1
1.1.2 Botanical Description	2
1.1.3 Economic Importance	3
1.1.4 Objectives and Achievements of Classical Breeding	4
1.2 Genetic Linkage Maps	5
1.2.1 Linkage Mapping Prior to 1990	5
1.2.2 Linkage Mapping After 1990	6
1.2.3 Map Integration	8
1.3 Tagging and Mapping Favorable Genes and QTLs of Economic Importance	12
1.4 Marker-Assisted Selection	20
1.5 Future Prospects	22
References	22

2 Pea

K.E.McPhee	33
2.1 Introduction	33
2.2 Construction of Genetic Maps	36
2.3 Gene Mapping	37
2.4 QTLs Detected	39
2.5 Marker-Assisted Breeding	43
2.6 Map-Based Cloning	44
2.7 Advanced Works	44
2.8 Future Scope of Works	45
References	45

3 Cowpea

M.P. Timko. J.D. Ehlers. P.A. Roberts	49
3.1 Introduction	49
3.1.1 Brief History: Origin and Distribution	49
3.1.2 Morphological and Phenological Characteristics	50
3.1.3 Production Systems and Economic Importance	51
3.1.4 Nutritional Composition	52
3.1.5 Classical Genetics and Breeding	53
3.1.6 Germplasm Collections	54
3.2 Molecular Phylogeny and Genome Organization	54
3.3 Genetic Maps	56
3.4 Transgenic Cowpea	59
3.5 Marker-Assisted Cowpea Breeding	59
3.6 Future Prospects for Crop Improvement	63
References	63

4 Mungbean

C.J. Lambrides. I.D. Godwin	69
4.1 Introduction	69
4.1.1 Morphological Description and Growth Characteristics	69
4.1.2 Center of Origin. Botanical Origin. Domestication and Dissemination and Gene Pools	70
4.1.3 Uses and Nutritional Information	71
4.1.4 Economic Importance	72
4.1.5 Karyotype, Genome Size. DNA Content, Genome Organization	73
4.1.6 Cytoplasmic Genomes	73
4.1.7 Breeding Priorities	74
4.2 Construction of Genetic Maps	74
4.2.1 Mungbean Maps	74
4.2.2 Other <i>Vigna</i> Maps	78
4.2.3 Microsatellites and Single Nucleotide Polymorphisms (SNPs)	78
4.2.4 Comparative Mapping	79
4.3 Gene Mapping	79
4.3.1 Bruchid Resistance	79
4.3.2 Powdery Mildew Resistance	81
4.3.3 MYMV Mungbean Yellow Mosaic Virus	82
4.3.4 Seed Weight	83
4.3.5 Hard-Seededness	83
4.3.6 Seed Appearance Traits	84
4.4 Tissue Culture and Transgenic Approaches	85
4.5 Future Scope of Research	85
References	86

5 Lentil

R. Ford. Rubeena. R.J. Redden. M. Materne. P.W.J. Taylor	91
5.1 Introduction	91
5.1.1 Origin. Domestication and Taxonomy	91
5.1.2 Botany and Ecology	92
5.1.3 Genetic Resources	92
5.1.4 Economic Importance and Current Breeding Objectives	93
5.1.5 Limitations of Classical Breeding Approaches and the Need for Molecular Breeding	95
5.2 Genetic Markers and Lentil Genome Mapping	95
5.2.1 Morphological and Biochemical Markers	95
5.2.2 DNA-Based Markers	96
5.2.3 Lens Genome Mapping	96
5.2.4 Towards a Lens Consensus Map	99
5.3 Marker-Assisted Trait Mapping and Selection	100
5.3.1 Trait Mapping	100
5.3.2 Quantitative Trait Loci Mapping	100
5.3.3 Marker-Assisted Selection and Trait Pyramiding	102
5.4 Future Scope of Works	103
References	104

6 Chickpea

P.W.J. Taylor, R. Ford	109
6.1 Introduction	109
6.1.1 Classification, Nomenclature and Origin	109
6.1.2 Traditional and Current Breeding Objectives	110
6.2 Construction of Genetic Maps	111
6.2.1 A Brief History of <i>Cicer</i> Mapping Efforts	111
6.2.2 First-Generation Maps	112
6.2.3 Second-Generation Maps	113
6.3 Gene Mapping and QTL Detection for Disease Resistance	115
6.4 Future Scope of Works	118
References	118

7 Genome Mapping and Molecular Breeding in *Lathyrus*

B. Skiba, A.M. Gurung, E.C.K. Pang	123
7.1 Introduction	123
7.1.1 History of Crop	123
7.1.2 Botanical Descriptions	123
7.1.3 Economic Importance	124
7.1.4 Breeding Objectives	125
7.1.5 Germplasm Screening	125
7.2 Construction of Genetic Maps	126
7.3 Gene Mapping	127
7.4 QTL Detection	128
7.5 Marker-Assisted Breeding	129
7.6 New Tools and Future Directions	129
References	131

8 Pigeonpea

M.B. Ratnaparkhe, V.S. Gupta	133
8.1 Introduction	133
8.1.1 Classification, Nomenclature, and Origin	134
8.1.2 Yield Constraints and Breeding Objectives in Pigeonpea	135
8.2 Pigeonpea Genome Structure	137
8.3 Employment of Molecular Markers	137
8.3.1 First-Generation DNA Markers	138
8.3.2 Retrotransposons and Microsatellite Markers: The Second Generation of Molecular Markers	140
8.4 Pigeonpea Transformation	140
8.5 Pigeonpea Research at ICRISAT	141
8.6 Future Outlook: Comparative Mapping and Genomics in Legumes	141
References	142

9 Quinoa (*Chenopodium quinoa*)

P.J. Maughan, A. Bonifacio, C.E. Coleman, E.N. Jellen, M.R. Stevens, D.J. Fairbanks	147
9.1 Brief History of Crop	147
9.2 Botanical Description	148
9.3 Breeding Value of Other <i>Chenopodium</i> Species for Quinoa Improvement	150
9.4 Economic Importance	150

9.5	Breeding Objectives	151
9.6	Quinoa Molecular Marker Studies: Introduction	151
9.6.1	First-Generation Genetic Linkage Map	152
9.6.2	Simple Sequence Repeat (SSR) Markers	152
9.6.3	Expressed Sequence Tags and Single Nucleotide Polymorphism Markers	152
9.6.4	Quinoa Bacterial Artificial Chromosome Library	155
9.6.5	Cytogenetics	156
9.7	Future Scope of Work	157
	References	157

10 Bambara Groundnut

	S. Basu, J.A. Roberts. S.N. Azam-Ali, S. Mayes	159
10.1	Introduction	159
10.1.1	The Crop Bambara Groundnut	159
10.1.2	The Plant	160
10.1.3	Intraspecific Hybridization for Development of a Mapping Population	161
10.1.4	Distribution and Domestication	161
10.1.5	Floral Biology	163
10.2	Evaluation of Genetic Diversity	163
10.2.1	Genetic Diversity in <i>Vigna</i>	163
10.2.2	Genetic Diversity within the Bambara Groundnut Gene Pool	164
10.3	Genetic Linkage Mapping and Breeding in Bambara Groundnut	164
10.3.1	Choice of Parents	164
10.3.2	Verification of a Successful Hybridization Event	165
10.3.3	F ₁ and F ₂ Progenies of Intraspecific Cross	165
10.3.4	Development of Future Breeding Lines from the Existing Cross	166
10.3.5	Types of Populations and Their Specific Applications	166
10.3.6	Genetic Linkage Map of Bambara Groundnut	168
10.4	QTL Mapping in Bambara Groundnut	169
10.5	The Future Direction	170
10.5.1	Further Application of AFLPs in Saturation	170
10.5.2	Development of Microsatellite-Enriched Genomic Libraries	170
10.5.3	Oligonucleotide DNA Microarrays	170
10.5.4	QTL Mapping	171
10.5.5	The Potential of Marker-Assisted Selection in Bambara Groundnut	171
	References	171

11 Sugarcane

	G. Cordeiro. O. Amouyal. F. Elliott. R. Henry	175
11.1	Introduction	175
11.1.1	History of Sugarcane	175
11.1.2	Morphology and Taxonomy	175
11.1.3	Karyotype	178
11.1.4	Economic Importance	179
11.1.5	Breeding Objectives	179
11.1.6	Classical Breeding Achievements	180
11.1.7	Limitations of Classical Activities	181

11.2	Genetic Maps	181
11.2.1	First-Generation Maps	181
11.2.2	Second-Generation Maps	181
11.2.3	Comparative Mapping	182
11.3	Detection of QTLs	183
11.3.1	QTLs Associated with Resistance	189
11.3.2	QTLs Associated with Sugar Yield and Content	191
11.4	Gene Mapping, Marker-Assisted Breeding and Map-Based Cloning	196
11.4.1	Advanced Works	198
11.5	Future Scope of Works	199
	References	200

12 Potato

	D. Milbourne, B. Pande, G.J. Bryan	205
12.1	Introduction	205
12.1.1	History, Taxonomy and Distribution	205
12.1.2	Potato Breeding	208
12.2	First-Generation Genetic Linkage Maps of Potato	211
12.3	Genetic Mapping of Agronomically Significant Traits	216
12.3.1	Mapping of Loci Associated with Disease Resistance	216
12.3.2	Mapping of Loci Affecting Tuber Characteristics	220
12.4	Second-Generation Maps:	
	Linkage and QTL Analysis in Tetraploid Potato	224
12.5	Second-Generation Maps: The Ultra-High Density Map of Potato	226
12.6	Map-Based Gene Cloning in Potato	226
12.7	Physical Mapping and Sequencing of Potato Genome	228
12.8	Association Genetics	228
12.9	Functional Genomics Resources	230
12.10	MAS in Potato Breeding	230
	References	231

13 Sweetpotato

	U.K. Reddy, P. Nimmakayala, G.T. Bates, J. Ryan-Bohac	237
13.1	Introduction	237
13.1.1	Importance of Sweetpotato	237
13.1.2	<i>Ipomoea</i> Series <i>Batatas</i> (<i>Convolvulaceae</i>):	
	Phylogenetic Relationships	238
13.1.3	Genetic Diversity Among Cultivars	239
13.2	DNA Markers	239
13.3	Sweetpotato Genetic Maps	240
13.4	Gene Identification and Functional Genomics	242
13.5	Sweetpotato Transformation and Transgene Stacking	243
13.6	Conclusions	243
	References	244

14 Cassava

	Y. Lokko, E. Okogbenin, C. Mba, A. Dixon, A. Raji, M. Fregene	249
14.1	Introduction	249
14.1.1	Brief History of Crop	249
14.1.2	Botanical Descriptors	249
14.1.3	Economic Importance	250

14.1.4	Classical Breeding Objectives	250
14.1.5	Classical Breeding Achievements	250
14.1.6	Limitations of Classical Breeding and Utility of Molecular Mapping	251
14.2	Construction of Genetic Maps	252
14.2.1	First-Generation Maps in Cassava	252
14.2.2	Second-Generation Maps	253
14.3	Gene Mapping	259
14.4	Quantitative Trait Loci Analysis	260
14.5	Marker-Assisted Breeding	262
14.6	Map-Based Cloning	264
14.7	Advanced Works	265
14.7.1	Tools: ESTs and Microarrays	265
14.8	Future Scope of Works	266
	References	266

15 Yams

H.D. Mignouna, M.M. Abang, R. Asiedu	271
15.1 Introduction	271
15.1.1 Brief History of Crop	271
15.1.2 Botanical Description	271
15.1.3 Econornic Importance	272
15.1.4 Breeding Objectives	273
15.1.5 Classical Breeding Achievements	275
15.1.6 Utility of Molecular Mapping	275
15.1.7 Brief History of Mapping	277
15.2 Construction of Genetic Maps	277
15.2.1 Mapping of <i>D. rotundata</i> Genome and Detection of QTLs for YMV Resistance	277
15.2.2 Mapping of <i>D. alata</i> Genome and Detection of QTLs for Anthracnose Resistance	283
15.3 Gene Mapping	289
15.3.1 Molecular Markers for YMV Resistance	289
15.3.2 Molecular Markers for YAD Resistance	290
15.4 Future Scope of Works	292
References	293
