

Bernd Möller · Uwe Reuter

Uncertainty Forecasting in Engineering

With 101 Figures and 15 Tables

Springer

Contents

Abbreviations	IX
1 Introduction	1
1.1 Application of Time Series for Forecasting in Engineering	1
1.2 Data Uncertainty and Fuzzy Time Series	5
1.3 Examples of Fuzzy Time Series	7
2 Mathematical Description of Uncertain Data	9
2.1 Fuzzy Variables	9
2.1.1 Classical and Incremental Discretization of Fuzzy Variables	11
2.1.2 Incremental Fuzzy Arithmetic	16
2.1.3 Subtraction of Fuzzy Variables	18
2.1.4 Distance between Fuzzy Variables	22
2.1.5 Fuzzy Functions	23
2.2 Fuzzy Random Variables	25
2.2.1 Classical and Incremental Discretization of Fuzzy Random Variables	26
2.2.2 Fuzzy Probability Distribution Functions of Fuzzy Random Variables	30
2.2.3 Characteristic Moments	44
2.2.4 Monte Carlo Simulation of Fuzzy Random Variables ..	50
2.3 Fuzzy Random Processes	53
3 Analysis of Time Series Comprised of Uncertain Data	59
3.1 Plot of Fuzzy Time Series	59
3.2 Fuzzy Component Model	63
3.3 Stationary Fuzzy Time Series	69
3.4 Transformation of Fuzzy Time Series Using Filters	74
3.4.1 Smoothing of Fuzzy Time Series	75
3.4.2 Fuzzy Difference Filter	77

3.4.3	Extended Smoothing and Extended Fuzzy Difference Filter	78
3.5	Modeling on the Basis of Specific Fuzzy Random Processes ...	79
3.5.1	Fuzzy White-Noise Processes	79
3.5.2	Fuzzy Moving Average Processes	83
3.5.3	Fuzzy Autoregressive Processes	85
3.5.4	Fuzzy Autoregressive Moving Average Processes	86
3.5.5	Specification of Model Order	89
3.5.6	Parameter Estimation	96
3.6	Modeling on the Basis of Artificial Neural Networks	106
3.6.1	The Basics of Artificial Neural Networks	106
3.6.2	Multilayer Perceptron for Fuzzy Variables	107
3.6.3	Backpropagation Algorithm	111
3.6.4	Neural Network Architecture for Fuzzy Time Series ...	118
3.6.5	Conditioning of the Fuzzy Data	124
4	Forecasting of Time Series Comprised of Uncertain Data ..	131
4.1	Underlying Concept	131
4.2	Forecasting on the Basis of Specific Fuzzy Random Processes ..	134
4.2.1	Optimum Forecast	134
4.2.2	Fuzzy Forecast Intervals	137
4.2.3	Fuzzy Random Forecast	141
4.3	Forecasting on the Basis of Artificial Neural Networks	144
4.3.1	Optimum Forecast	145
4.3.2	Fuzzy Forecast Intervals	147
4.3.3	Fuzzy Random Forecast	150
5	Uncertain Forecasting in Engineering and Environmental Science	153
5.1	Model-Free Forecasting	153
5.2	Model-Based Forecasting	155
5.3	Applications	163
5.3.1	Forecasting of Structural Actions	164
5.3.2	Forecasting of Structural Responses	177
