Foreword	V
Preface	VII
Color Plates	XII

Part I Central Regulation of Breathing

Visualization of Respiratory Neuron Activity in the Ventral Medulla from a Newborn Rodent H. Onimaru, A. Arata, S. Arata, and I. Homma	3
Search for Genes Involved Central Respiratory Failure Using Mice Models S. Arata, H. Onimaru, A. Arata, I. Homma, T. Inoue, S. Shioda, S. Shirasawa, and M.L. Cleary	12
Control of Central Histaminergic Neurons for Respiration during Hypercapnia in Conscious Mice M. Iwase, M. Izumizaki, K. Miyamoto, M. Kanamaru, and I. Homma	17

Part II Neurogeneration and Neuroprotection

The Role of the Blood-Brain Barrier in Feeding: Leptin W.A. Banks, S.A. Farr, and J.E. Morley	27
--	----

Ultrastructural Study on the Demyelination of the White Matter
in the Rat Spinal Cord after Cardiac Arrest and Massive
Hemorrhagic Shock

L. Yin, Y. Kudo, H. Ohtaki, S. Yofu, M. Matsunaga,
and S. Shioda ----- 38

Engagement of Proinflammatory Cytokines after Cerebral Ischemia

H. Ohtaki, L. Yin, K. Dohi, S. Yofu, T. Nakamachi,
M. Matsunaga, and S. Shioda ----- 41

Levels of the Alkoxy Radical in Patients with Brain Death

K. Dohi, K. Satoh, H. Moriwaki, Y. Mihara, Y. Miyake,
H. Ohtaki, S. Shioda, and T. Aruga ----- 49

Differentiation of Neural Stem Cells into Astrocytes by Low
Concentration of Pituitary Adenylate Cyclase-Activating
Polypeptide (PACAP)

J. Watanabe, S. Shioda, S. Kikuyama, K. Nakaya,
and S. Nakajo ----- 57

Neurogenesis is Toxicologically Heterogeneous: A Case of
BrdU-Induced Cell Death

T. Ogawa, M. Kuwagata, and S. Shioda ----- 64

Part III Brain Functions in Health and Disease

Hypocretin-Deficient Narcolepsy as a Disease Model to Study the
Hypothalamic Function in Health and Disease

S. Nishino ----- 71

The Expression of Synaptic Vesicle Proteins after Chronic
Antidepressant Treatment in Rat Brain

M. Yamada, K. Takahashi, C. Kurahashi, M. Yamada,
and K. Honda ----- 82

Identification of Molecular Systems Responsible for the
Therapeutic Effect of Antidepressant

M. Yamada and M. Yamada ----- 88

S-100B Expression in Neonatal Rat Cortical “Barrels” and Thalamic “Barrelolds” K.T. Muneoka, H. Funahashi, T. Ogawa, M. Kuwagata, P.M. Whitaker-Azmitia, and S. Shioda -----	97
Postnatal Change of Glycinergic Synaptic Transmission from Supratrigeminal Region to Trigeminal Motoneurons T. Inoue, S. Nakamura, K. Nakajima, and K. Maki -----	103
Central Nervous System Concerned with the Stress Induced Inhibition of Cellular Immune Activity T. Sato, S. Guo, and T. Hisamitsu -----	108

Part IV Brain Functions by the Dipole Tracing Method

Can not Live without Breathing, without Emotions Y. Masaoka and I. Homma -----	115
Breathing Mind in ‘Noh’ I. Homma, Y. Masaoka, and N. Umewaka -----	125
The Source Generator of Event-Related Potentials with Recognizing Facial Expression by the Dipole Tracing Method N. Yoshimura, Y. Masaoka, I. Homma, and M. Kawamura -----	135
Source Localization of Event-Related Potentials Related to Cross-Modal Semantic Interference Effect Using Scalp-Skull-Brain Dipole Tracing Method J. Shinoda, K. Nakagome, M. Mimura, and I. Homma -----	139
Key Word Index -----	147
