Contents

Preface	vii
Conventions and Notation	ix

Part I Plane Algebraic Curves

1 Affine Algebraic Curves	3
2 Projective Algebraic Curves	13
3 Coordinate Ring of an Algebraic Curve	23
4 Rational Functions on Algebraic Curves	31
5 Intersection Multiplicity and Intersection Cycle of Two Curves	39
6 Regular and Singular Points of Algebraic Curves. Tangents	51
7 More on Intersection Theory. Applications	61
8 Rational Maps. Parametric Representations of Curves	73
9 Polars and Hessians of Algebraic Curves	81
10 Elliptic Curves	89
11 Residue Calculus	99
12 Applications of Residue Theory to Curves	117
13 The Riemann–Roch Theorem	131

14	The Genus of an Algebraic Curve and of Its Function Field	143
15	The Canonical Divisor Class	149
16	The Branches of a Curve Singularity	161
17	Conductor and Value Semigroup of a Curve Singularity ...	175

Part II Algebraic Foundations

Algebraic Foundations	189
A Graded Algebras and Modules	191
B Filtered Algebras	199
C Rings of Quotients. Localization	209
D The Chinese Remainder Theorem	217
E Noetherian Local Rings and Discrete Valuation Rings	221
F Integral Ring Extensions	227
G Tensor Products of Algebras	235
H Traces	245
I Ideal Quotients	257
K Complete Rings. Completion	261
L Tools for a Proof of the Riemann–Roch Theorem	275
List of Symbols	283
References	285
Index	289
