Introduction — VII

1	The Schwarz lemma and Riemann surfaces — 1
1.1	The Schwarz–Pick lemma — 2
1.2	The Poincaré distance — 8
1.3	The upper half-plane — 14
1.4	Fixed points of automorphisms — 19
1.5	Multipoint Schwarz–Pick lemmas — 28
1.6	Riemann surfaces — 36
1.7	Hyperbolic Riemann surfaces and the Montel theorem — 54
1.8	Boundary behavior of the universal covering map — 67
1.9	The Poincaré metric — 73
1.10	The Ahlfors lemma — 84
1.11	Bloch domains — 88
2	Boundary Schwarz lemmas — 96
2.1	The Julia lemma — 97
2.2	Stolz regions and nontangential limits — 113
2.3	The Julia–Wolff–Carathéodory theorem — 125
2.4	The Lindelöf theorem — 136
2.5	The Wolff lemma — 143
2.6	The automorphism group of hyperbolic Riemann surfaces — 147
2.7	The Burns–Krantz theorem — 153
3	Discrete dynamics on Riemann surfaces — 158
3.1	The fixed-point case — 159
3.2	The Wolff–Denjoy theorem — 166
3.3	The Heins theorem — 169
3.4	Stability of the Wolff point — 182
3.5	Models on Riemann surfaces — 184
3.6	Random iteration on Bloch domains — 192
3.7	Random iteration of small perturbations — 201
4	Discrete dynamics on the unit disk — 212
4.1	Elliptic dynamics — 213
4.2	Superattracting dynamics — 217
4.3	Hyperbolic dynamics — 221
4.4	Parabolic dynamics — 226
4.5	Models on the unit disk — 234
4.6	The hyperbolic step — 240

4.7	Parabolic type and boundary smoothness —	251
4.8	Boundary fixed points —	260
4.9	Backward dynamics —	266
4.10	Commuting functions —	286
5	Continuous dynamics on Riemann surfaces —	294
5.1	Algebraic semigroup homomorphisms —	295
5.2	One-parameter semigroups —	297
5.3	One-parameter semigroups on Riemann surfaces —	300
5.4	The infinitesimal generator —	304
5.5	The continuous Wolff–Denjoy theorem —	313
5.6	The Berkson–Porta formula —	315
5.7	One-parameter semigroups on the unit disk —	320
A	Appendix —	325
A.1	The Hurwitz theorems —	325
A.2	The Fatou uniqueness theorem —	326
A.3	Holomorphic functions with nonnegative real part —	328
A.4	Sequences —	331
A.5	Topological groups —	334
	Bibliography —	337
	Index —	353
