

Table of Contents	
1 Introduction	1
1.1 Migration	2
1.2 Protein tyrosine phosphatase interacting protein 51	8
1.3 Aim of the study	12
2 Material and methods	13
2.1 Methods	13
2.2 Compounds	18
2.3 Scratch protocol	20
2.4 Material	21
3 Results	24
3.1 The influence of the scratch on the PTPIP51 interactome in control cells	27
3.2 The influence of the scratch on the PTPIP51 interactome in EGF treated cells	29
3.2.1 PTPIP51/ β -actin interaction in migrating EGF-treated HaCaT cells	30
3.2.2 PTPIP51/ Rac-1 interaction in migrating EGF-treated HaCaT cells	31
3.2.3 PTPIP51/FAK interaction in migrating EGF-treated HaCaT cells	32
3.3 The PTPIP51 interactome in migrating insulin-treated HaCaT cells	33
3.3.1 PTPIP51/ β -actin interaction in migrating insulin-treated HaCaT cells	34
3.3.2 PTPIP51/ Rac-1 interaction in migrating insulin-treated HaCaT cells	35
3.3.3 PTPIP51/ FAK interaction in migrating insulin-treated HaCaT cells	36
3.4 The PTPIP51 interactome in migrating LDC-3-treated HaCaT cells	38
3.4.1 PTPIP51/ β -actin interaction in migrating LDC-3-treated HaCaT cells with increasing concentrations	38
3.4.2 PTPIP51/Rac-1 interaction in migrating LDC-3-treated HaCaT cells with increasing concentrations	41
3.4.3 PTPIP51/FAK interaction in migrating LDC-3 treated HaCaT cells with increasing concentrations	43
4 Discussion	46
4.1 Wound healing and the PTPIP51 interactome	46
4.2 Framing the PTPIP51 in the migration process under EGF treatment	48
4.3 Framing the PTPIP51 in the migration process under insulin treatment	50
4.4 Framing PTPIP51 in the migration process under LDC-3 treatment	53

4.5 The PTPIP51 interactome within a migrating cell	55
5 Summary	58
6 Table of Abbreviation	60
7 Figures:.....	61
8 References	68
9 Acknowledgements	74
