

Contents

Part I Cochlea/Peripheral Processing

1 Influence of Neural Synchrony on the Compound Action Potential, Masking, and the Discrimination of Harmonic Complexes in Several Avian and Mammalian Species	1
OTTO GLEICH, MARJORIE LEEK, AND ROBERT DOOLING	
2 A Nonlinear Auditory Filterbank Controlled by Sub-band Instantaneous Frequency Estimates	11
VOLKER HOHMANN AND BIRGER KOLLMEIER	
3 Estimates of Tuning of Auditory Filter Using Simultaneous and Forward Notched-noise Masking	19
MASASHI UNOKI, RYOTA MIYAUCHI, AND CHIN-TUAN TAN	
4 A Model of Ventral Cochlear Nucleus Units Based on First Order Intervals ..	27
STEFAN BLEECK AND IAN WINTER	
5 The Effect of Reverberation on the Temporal Representation of the F0 of Frequency Swept Harmonic Complexes in the Ventral Cochlear Nucleus	35
MARK SAYLES, BERT SCHOUTEN, NEIL J. INGHAM, AND IAN M. WINTER	
6 Spectral Edges as Optimal Stimuli for the Dorsal Cochlear Nucleus	43
SHARBA BANDYOPADHYAY, ERIC D. YOUNG, AND LINA A. J. REISS	
7 Psychophysical and Physiological Assessment of the Representation of High-frequency Spectral Notches in the Auditory Nerve	51
ENRIQUE A. LOPEZ-POVEDA, ANA ALVES-PINTO, AND ALAN R. PALMER	

Part II Pitch

8 Spatio-Temporal Representation of the Pitch of Complex Tones in the Auditory Nerve	61
LEONARDO CEDOLIN AND BERTRAND DELGUTTE	
9 Virtual Pitch in a Computational Physiological Model	71
RAY MEDDIS AND LOWEL O'MARD	

10	Searching for a Pitch Centre in Human Auditory Cortex	83
	DEB HALL AND CHRISTOPHER PLACK	
11	Imaging Temporal Pitch Processing in the Auditory Pathway	95
	ROY D. PATTERSON, ALEXANDER GUTSCHALK, ANNEMARIE SEITHER-PREISLER, AND KATRIN KRUMBHOLZ	
Part III Modulation		
12	Spatiotemporal Encoding of Vowels in Noise Studied with the Responses of Individual Auditory-Nerve Fibers	107
	MICHAEL G. HEINZ	
13	Role of Peripheral Nonlinearities in Comodulation Masking Release	117
	JESKO L. VERHEY AND STEPHAN M.A. ERNST	
14	Neuromagnetic Representation of Comodulation Masking Release in the Human Auditory Cortex	125
	ANDRÉ RUPP, LIORA LAS, AND ISRAEL NELKEN	
15	Psychophysically Driven Studies of Responses to Amplitude Modulation in the Inferior Colliculus: Comparing Single-Unit Physiology to Behavioral Performance	133
	PAUL C. NELSON AND LAUREL H. CARNEY	
16	Source Segregation Based on Temporal Envelope Structure and Binaural Cues	143
	STEVEN VAN DE PAR, OTHMAR SCHIMMEL, ARMIN KOHLRAUSCH, AND JEROEN BREEBAART	
17	Simulation of Oscillating Neurons in the Cochlear Nucleus: A Possible Role for Neural Nets, Onset Cells, and Synaptic Delays	155
	ANDREAS BAHMER AND GERALD LANGNER	
18	Forward Masking: Temporal Integration or Adaptation?	165
	STEPHAN D. EWERT, OLE HAU, AND TORSTEN DAU	
19	The Time Course of Listening Bands	175
	PIERRE DIVENYI AND ADAM LAMMERT	
Part IV Animal Communication		
20	Frogs Communicate with Ultrasound in Noisy Environments	185
	PETER M. NARINS, ALBERT S. FENG, AND JUN-XIAN SHEN	
21	The Olivocochlear System Takes Part in Audio-Vocal Interaction	191
	STEFFEN R. HAGE, UWE JÜRGENS, AND GÜNTER EHRET	

22	Neural Representation of Frequency Resolution in the Mouse Auditory Midbrain	199
	MARINA EGOROVA, INNA VARTANYAN, AND GUENTER EHRET	
23	Behavioral and Neural Identification of Birdsong under Several Masking Conditions	207
	BARBARA G. SHINN-CUNNINGHAM, VIRGINIA BEST, MICHEAL L. DENT, FREDERICK J. GALLUN, ELIZABETH M. MCCLAIN, RAJIV NARAYAN, EROL OZMERAL, AND KAMAL SEN	

Part V Intensity Representation

24	Near-Threshold Auditory Evoked Fields and Potentials are In Line with the Weber-Fechner Law	215
	BERND LÜTKENHÖNER, JAN-STEFAN KLEIN, AND ANNEMARIE SEITHER-PREISLER	
25	Brain Activation in Relation to Sound Intensity and Loudness	227
	DAVE LANGERS, WALTER BACKES, AND PIM VAN DIJK	
26	Duration Dependency of Spectral Loudness Summation, Measured with Three Different Experimental Procedures	237
	MAARTEN F.B. VAN BEURDEN AND WOUTER A. DRESCHLER	

Part VI Scene Analysis

27	The Correlative Brain: A Stream Segregation Model	247
	MOUNYA ELHILALI AND SHIHAB SHAMMA	
28	Primary Auditory Cortical Responses while Attending to Different Streams	257
	PINGBO YIN, LING MA, MOUNYA ELHILALI, JONATHAN FRITZ, AND SHIHAB SHAMMA	
29	Hearing Out Repeating Elements in Randomly Varying Multitone Sequences: A Case of Streaming?	267
	CHRISTOPHE MICHEYL, SHIHAB A. SHAMMA, AND ANDREW J. OXENHAM	
30	The Dynamics of Auditory Streaming: Psychophysics, Neuroimaging, and Modeling	275
	MAKIO KASHINO, MINAE OKADA, SHIN MIZUTANI, PETER DAVIS, AND HIROHITO M. KONDO	
31	Auditory Stream Segregation Based on Speaker Size, and Identification of Size-Modulated Vowel Sequences	285
	MINORU TSUZAKI, CHIHIRO TAKESHIMA, TOSHIO IRINO, AND ROY D. PATTERSON	
32	Auditory Scene Analysis: A Prerequisite for Loudness Perception	295
	NICOLAS GRIMAULT, STEPHEN MCADAMS, AND JONT B. ALLEN	

33	Modulation Detection Interference as Informational Masking	303
	STANLEY SHEFT AND WILLIAM A. YOST	
34	A Paradoxical Aspect of Auditory Change Detection	313
	LAURENT DEMANY AND CHRISTOPHE RAMOS	
35	Human Auditory Cortical Processing of Transitions Between 'Order' and 'Disorder'	323
	MARIA CHAIT, DAVID POEPEL, AND JONATHAN Z. SIMON	
36	Wideband Inhibition Modulates the Effect of Onset Asynchrony as a Grouping Cue	333
	BRIAN ROBERTS, STEPHEN D. HOLMES, STEFAN BLEECK, AND IAN M. WINTER	
37	Discriminability of Statistically Independent Gaussian Noise Tokens and Random Tone-Burst Complexes	343
	TOM GOOSSENS, STEVEN VAN DE PAR, AND ARMIN KOHLRAUSCH	
38	The Role of Rehearsal and Lateralization in Pitch Memory	353
	CHRISTIAN KAERNBACH, KATHRIN SCHLEMMER, CHRISTINA ÖFFL, AND SANDRA ZACH	
Part VII Binaural Hearing		
39	Interaural Correlation and Loudness	359
	JOHN F. CULLING AND BARRIE A. EDMONDS	
40	Interaural Phase and Level Fluctuations as the Basis of Interaural Incoherence Detection	369
	MATTHEW J. GOUPELL AND WILLIAM M. HARTMANN	
41	Logarithmic Scaling of Interaural Cross Correlation: A Model Based on Evidence from Psychophysics and EEG	379
	HELGE LÜDDEMANN, HELMUT RIEDEL, AND BIRGER KOLLMEIER	
42	A Physiologically-Based Population Rate Code for Interaural Time Differences (ITDs) Predicts Bandwidth-Dependent Lateralization	389
	KENNETH E. HANCOCK	
43	A π-Limit for Coding ITDs: Neural Responses and the Binaural Display	399
	DAVID MCALPINE, SARAH THOMPSON, KATHARINA VON KRIEGSTEIN, TORSTEN MARQUARDT, TIMOTHY GRIFFITHS, AND ADENIKE DEANE-PRATT	
44	A π-Limit for Coding ITDs: Implications for Binaural Models	407
	TORSTEN MARQUARDT AND DAVID MCALPINE	
45	Strategies for Encoding ITD in the Chicken Nucleus Laminaris	417
	CATHERINE CARR AND CHRISTINE KÖPPL	

46	Interaural Level Difference Discrimination Thresholds and Virtual Acoustic Space Minimum Audible Angles for Single Neurons in the Lateral Superior Olive	425
	DANIEL J. TOLLIN	
47	Responses in Inferior Colliculus to Dichotic Harmonic Stimuli: The Binaural Integration of Pitch Cues	435
	TREVOR M. SHACKLETON, LIANG-FA LIU, AND ALAN R. PALMER	
48	Level Dependent Shifts in Auditory Nerve Phase Locking Underlie Changes in Interaural Time Sensitivity with Interaural Level Differences in the Inferior Colliculus	447
	ALAN R. PALMER, LIANG-FA LIU, AND TREVOR M. SHACKLETON	
49	Remote Masking and the Binaural Masking-Level Difference	457
	G. BRUCE HENNING, IFAT YASIN, AND CAROLINE WITTON	
50	Perceptual and Physiological Characteristics of Binaural Sluggishness	467
	IDA SIVEKE, STEPHAN D. EWERT, AND LUTZ WIEGREBE	
51	Precedence-Effect with Cochlear Implant Simulation	475
	BERNHARD U. SEEGER AND ERVIN HAFTER	
52	Enhanced Processing of Interaural Temporal Disparities at High-Frequencies: Beyond Transposed Stimuli	485
	LESLIE R. BERNSTEIN AND CONSTANTINE TRAHOTIS	
53	Models of Neural Responses to Bilateral Electrical Stimulation	495
	H. STEVEN COLBURN, YOOJIN CHUNG, YI ZHOU, AND ANDREW BRUGHERA	
54	Neural and Behavioral Sensitivities to Azimuth Degrade with Distance in Reverberant Environments	505
	SASHA DEVORE, ANTJE IHLEFELD, BARBARA G. SHINN-CUNNINGHAM, AND BERTRAND DELGUTTE	

Part VIII Speech and Learning

55	Spectro-temporal Processing of Speech – An Information-Theoretic Framework	517
	THOMAS U. CHRISTIANSEN, TORSTEN DAU, AND STEVEN GREENBERG	
56	Articulation Index and Shannon Mutual Information	525
	ARNE LEIJON	
57	Perceptual Compensation for Reverberation: Effects of ‘Noise-Like’ and ‘Tonal’ Contexts	533
	ANTHONY WATKINS AND SIMON MAKIN	

58 Towards Predicting Consonant Confusions of Degraded Speech 541
O. GHITZA, D. MESSING, L. DELHORNE, L. BRAIDA, E. BRUCKERT,
AND M. SONDHI

59 The Influence of Masker Type on the Binaural Intelligibility
Level Difference 551
S. THEO GOVERTS, MARIEKE DELREUX , JOOST M. FESTEN,
AND TAMMO HOUTGAST
