

Contents

1	Introduction and History of Research	1
1.1	Object of Research.....	3
1.2	History of Research.....	5
	References.....	11
2	Origin of Glaciers	13
2.1	Preconditions for Glacier Formation.....	14
2.2	Processes Involved.....	16
2.2.1	Snowfall	16
2.2.2	Snow Metamorphosis.....	18
2.2.3	Densification of the Snow.....	18
2.3	Physical Properties of Glacial Ice.....	20
	References.....	24
3	Ice Movement	25
3.1	Description of the Movement Pattern	26
3.2	Processes Involved in Ice Movement.....	30
3.2.1	Internal Deformation	30
3.2.2	Basal Sliding	33
3.2.3	Bed Deformation	34
3.2.4	Glacier Flow Velocity	34
3.3	Special Case Surge	35
3.4	Visible Witnesses of Ice Movement: Crevasses and Ogives	37
	References.....	40
4	Mass and Energy Balance of Glaciers	43
4.1	Glacier Mass Balance.....	44
4.1.1	Concept and Components of the Glacier Mass Balance	45
4.1.2	Methods of Mass Balance Determination	49
4.1.3	Mass Balance Measurements Worldwide	54
4.2	Energy Balance of Glacier Surfaces.....	56
	References.....	59
5	Glacier Types and Distribution	61
5.1	Typification of Glaciers.....	62
5.1.1	Typification According to the Source of Nourishment.....	62
5.1.2	Morphological Glacier Types.....	65
5.1.3	Thermal Glacier Types.....	67
5.2	Distribution of Glaciers	68
	References.....	70

6	Glaciers and Climate	73
6.1	Climatic Control of Glacier Behaviour	74
6.2	Glaciers as Climate Indicators	76
	References.....	81
7	Glaciers and Water	83
7.1	Glacial Hydrological Systems	85
7.1.1	Supraglacial System	85
7.1.2	Intraglacial System.....	88
7.1.3	Subglacial System	91
7.2	Runoff from Glaciers.....	92
	References.....	94
8	Glacial History	97
8.1	Methods for the Reconstruction of Glacial History	98
8.2	Glacial Periods	102
8.2.1	The Older Ice Ages	104
8.2.2	The Pleistocene.....	105
8.3	Glacier Evolution in the Holocene	111
8.4	Current and Future Glacier Retreat	112
8.5	Consequences of Glacier Retreat	115
8.5.1	Local Consequences.....	115
8.5.2	Regional Consequences	115
8.5.3	Global Consequences	117
	References.....	118
9	Glacial Hazards	121
9.1	Ice Avalanches	122
9.1.1	Definition and Classification	122
9.1.2	Examples	123
9.1.3	Risk Management	128
9.2	Glacial Lake Outburst Floods	128
9.2.1	Classification and Examples	128
9.2.2	Breakout Mechanisms	132
9.2.3	Risk Management	132
	References.....	133
10	Glacial Erosion	135
10.1	Erosion Processes in Solid Rock.....	136
10.2	Erosion Processes in Unconsolidated Rocks	139
10.3	Erosion Rates	140
10.4	Landforms of Glacial Erosion.....	141
	References.....	150
