

Contents

1	Introduction	1
	Sebastian Kleemann, Alexander Kaluza, Tim Fröhlich, Sebastian Gellrich, Antal Dér, Thomas Vietor and Christoph Herrmann	
1.1	Demand for Automotive Lightweight Body Parts	2
1.2	Engineering of Automotive Lightweight Body Parts—the MultiMaK2 Approach	3
1.2.1	Body Part Design	6
1.2.2	Body Part Manufacturing	7
1.2.3	Life Cycle Engineering	9
1.3	Reference Body Parts of the Project	10
1.4	Contents and Structure of the Book	11
	References	12
2	Development of Automotive Body Parts in Multi-Material Design—Processes and Tools	15
	Tim Fröhlich, Sebastian Kleemann, Thomas Vietor, Lars Spresny, Makram Abdelwahed, Andreas Kabelitz and Fabian Preller	
2.1	Introduction	16
2.2	Review on Development and Lightweight Design Approaches	17
2.2.1	Development Processes and Goals	17
2.2.2	Material Selection and Lightweight Design Approaches	18
2.3	Developing Approach for Multi-Material Automotive Body Parts	20
2.3.1	Level 0: Requirements Model	22
2.3.2	Level 1: Material, Geometry and Design Model	22
2.3.3	Level 2: Generic Topology Model	25
2.3.4	Levels 3 and 4: Detailed Concept Model and System Model	27
2.4	Case Study	27
2.4.1	Case Study 1: Roof Reinforcement	28
2.4.2	Case Study 2: Centre Tunnel	31

2.5	Summary and Outlook	34
	References	35
3	Knowledge Management	39
	Sebastian Kleemann	
3.1	Introduction	39
3.2	Review on Knowledge Management in Product Development	40
3.2.1	Approaches to Knowledge Provision	41
3.3	Providing Knowledge for Multi-Material Designs	43
3.4	Identifying Relevant Knowledge	44
3.4.1	Identify Relevant Knowledge from the Literature	44
3.4.2	Identify Relevant Knowledge Based on Current Applications of Multi-Material Design	45
3.5	Accessing Relevant Knowledge	46
3.6	Identifying Similar Design Rules	48
3.7	Prototypic Knowledge Management System	49
3.7.1	Case Study	50
3.7.2	Discussion	51
	References	51
4	Levers of Cyber Physical Production Systems for Multi-Material Body Parts Manufacturing	55
	Sebastian Gellrich, Christoph Herrmann and Sebastian Thiede	
4.1	Introduction	55
4.2	Cyber Physical Production Systems	56
4.3	CPPS-based Architecture	58
4.3.1	Levers of Data-Based Modelling for the Manufacturing of Multi-Material Body Parts	58
4.3.2	CPPS-Based Architectural Approach	59
4.4	Exemplary Use Case: Deriving Product-specific Energy Consumptions through Data-based Modelling	61
4.5	Summary	64
	References	65
5	Modeling and Simulation of New Manufacturing Processes for Multi-Material Lightweight Body Parts to Estimate Environmental Impacts	67
	Antal Dér, Christopher Schmidt, Christoph Herrmann and Sebastian Thiede	
5.1	Introduction	68
5.2	Manufacturing Processes for Multi-Material Lightweight Body Parts	69
5.3	Determining Environmental Impacts of New Manufacturing Processes via Modelling and Simulation	70

5.4	Approach and Implementation for Multi-Material Lightweight Body Parts	71
5.5	Bottom-up Modelling of Processes	72
5.6	Process Chain Modelling Environment	72
5.7	Case Study—Modelling and Simulation of Manufacturing Processes at the Open Hybrid LabFactory.	73
5.8	Summary and Outlook.	76
	References.	77
6	Consideration of Environmental Impacts of Automotive Lightweight Body Parts During the Conceptual Design Stage	79
	Alexander Kaluza, Andreas Genest, Tobias Steinert, Andreas Schiffleitner and Christoph Herrmann	
6.1	Environmental Assessment of Lightweight Body Part Concepts	80
6.2	Modelling of Systems within the Technosphere	82
6.2.1	Raw Materials, Manufacturing and End-of-Life	82
6.2.2	Use	85
6.3	Implementation	88
6.4	Case Study 1 – Roof Reinforcement	90
6.5	Case Study 2 – Centre Tunnel	93
6.6	Summary and Opportunities	95
	References.	96
7	Life Cycle Design and Engineering Lab in the Open Hybrid LabFactory.	99
	Alexander Kaluza, Sebastian Gellrich, Sebastian Thiede and Christoph Herrmann	
7.1	Automotive Life Cycle Engineering from the Open Hybrid Lab Factory’s (OHLF) Perspective	100
7.2	Background	101
7.3	Understanding LCE through the Eyes of VA.	101
7.4	The Life Cycle Design Engineering Lab (LCDEL).	104
7.5	Use Case 1—Life Cycle Engineering in Conceptual Design	107
7.6	Use Case 2 – Open Hybrid LabFactory Nerve Centre.	110
7.7	Summary and Outlook.	116
	References.	118
	Publications in Course of the MultiMaK2 Project	121
