

Table of Contents

Measurement Techniques

On Kleinrock's Independence Assumption	1
<i>Adrian Popescu and Doru Constantinescu</i>	
Application Level Measurement	14
<i>Patrik Arlos</i>	
Measurements and Analysis of Application-Perceived Throughput via Mobile Links	37
<i>Markus Fiedler, Lennart Isaksson, and Peter Lindberg</i>	

Traffic Modelling and Engineering

Statistical Analysis and Modeling of Peer-to-Peer Multimedia Traffic . . .	70
<i>Natalia M. Markovich and Udo R. Krieger</i>	
Markovian Modelling of Internet Traffic	98
<i>António Nogueira, Paulo Salvador, Rui Valadas, and António Pacheco</i>	
Multi-timescale Economics-Driven Traffic Management in MPLS Networks	125
<i>Paola Iovanna, Maurizio Naldi, Roberto Sabella, and Cristiano Zema</i>	
Modelling LRD and SRD Traffic with the Batch Renewal Process: Review of Results and Open Issues	141
<i>Rod J. Fretwell and Demetres D. Kouvatsos</i>	
Local Area Networks and Self-similar Traffic	174
<i>Hadi Larijani</i>	
Characterisation of Internet Traffic in Wireless Networks	191
<i>Lei Liang, Yang Chen, and Zhili Sun</i>	

Queueing Systems and Networks

Performance Analysis of Priority Queueing Systems in Discrete Time . . .	203
<i>Joris Walraevens, Dieter Fiems, and Herwig Bruneel</i>	
Queueing Networks with Blocking: Analysis, Solution Algorithms and Properties	233
<i>Simonetta Balsamo</i>	

Switching Queueing Networks	258
<i>Vladimir V. Anisimov</i>	

Principles of Fairness Quantification in Queueing Systems	284
<i>Hanoch Levy, Benjamin Avi-Itzhak, and David Raz</i>	

Analytic Methodologies

Large Deviations Theory: Basic Principles and Applications to Communication Networks	301
<i>Michele Pagano</i>	

Analysis of Non-product Form Parallel Queues Using Markovian Process Algebra	331
<i>Nigel Thomas and Jeremy Bradley</i>	

Product-Form Solution in PEPA via the Reversed Process	343
<i>Peter G. Harrison and Nigel Thomas</i>	

Generalised Entropy Maximisation and Queues with Bursty and/or Heavy Tails	357
<i>Demetres D. Kouvatsos and Salam A. Assi</i>	

Stochastic Ordering of Semi-Markov Processes	393
<i>Fátima Ferreira and António Pacheco</i>	

Spectral Expansion Solutions for Markov-Modulated Queues	423
<i>Isi Mitrani</i>	

Diffusion Approximation as a Modelling Tool	447
<i>Tadeusz Czachórski and Ferhan Pekergin</i>	

Simulation Techniques

Cross Layer Simulation: Application to Performance Modelling of Networks Composed of MANETs and Satellites	477
<i>Riadh Dhaou, Vincent Gauthier, M. Issoufou Tiado, Monique Becker, and André-Luc Beylot</i>	

The Rare Event Simulation Method RESTART: Efficiency Analysis and Guidelines for Its Application	509
<i>Manuel Villén-Altamirano and José Villén-Altamirano</i>	

Performance Evaluation Studies

An Algebraic Multigrid Solution of Large Hierarchical Markovian Models Arising in Web Information Retrieval	548
<i>Udo R. Krieger</i>	

An Introduction to Modelling and Performance Evaluation for TCP Networks	571
<i>Michele Pagano and Raffaello Secchi</i>	
Performance Modelling and Evaluation of a Mobility Management Mechanism in IMS-Based Networks	594
<i>Is-Haka M. Mkwawa, Demetres D. Kouvatsos, Wolfgang Brandstätter, Gerhard Horak, Alfons Geier, and Christoforos Kavadias</i>	
Generalized QBD Processes, Spectral Expansion and Performance Modeling Applications	612
<i>Tien Van Do and Ram Chakka</i>	
Some New Markovian Models for Traffic and Performance Evaluation of Telecommunication Networks.....	642
<i>Ram Chakka and Tien Van Do</i>	
Modelling and Analysis of a Dynamic Guard Channel Handover Scheme with Heterogeneous Call Arrival Processes	665
<i>Lan Wang, Geyong Min, Demetres D. Kouvatsos, and Xiangxiang Zuo</i>	
On the Performance Modelling and Optimisation of DOCSIS HFC Networks	682
<i>Neelkamal P. Shah, Demetres D. Kouvatsos, Jim Martin, and Scott Moser</i>	
 Mobile, Wireless and Ad Hoc Networks	
Mobility Models for Mobility Management	716
<i>Vicente Casares-Giner, Vicent Pla, and Pablo Escalle-García</i>	
Wireless Ad Hoc Networks: An Overview	746
<i>David Remondo</i>	
Broadcasting Methods in MANETS: An Overview	767
<i>Is-Haka M. Mkwawa and Demetres D. Kouvatsos</i>	
ROMA: A Middleware Framework for Seamless Handover	784
<i>Adrian Popescu, David Erman, Karel de Voogheer, Alexandru Popescu, and Markus Fiedler</i>	
Seamless Roaming: Developments and Challenges	795
<i>Adrian Popescu, David Erman, Dragos Ilie, Markus Fiedler, Alexandru Popescu, and Karel de Voogheer</i>	

Optical Networks

Optical Metropolitan Networks: Packet Format, MAC Protocols and Quality of Service 808
Tülin Atmaca and Viet-Hung Nguyen

Performance of Multicast Packet Aggregation in All Optical Slotted Networks 835
Hind Castel-Taleb, Mohamed Chaitou, and Gerard Hébuterne

Performance Modelling and Traffic Characterisation of Optical Networks 859
Harry Mouchos, Athanasios Tsokanos, and Demetres D. Kouvatsos

QoS Metrics and Algorithms

The Search for QoS in Data Networks: A Statistical Approach 891
Pablo Belzarena and María Simon

Transform-Domain Analysis of Packet Delay in Network Nodes with QoS-Aware Scheduling 921
Stijn De Vuyst, Sabine Wittevrongel, and Herwig Bruneel

All IP Convergence and Networking

IP Networking and Future Evolution 951
Zhili Sun

Content Distribution over IP: Developments and Challenges 979
Adrian Popescu, Demetres D. Kouvatsos, David Remondo, and Stefano Giordano

Network Management and Services

Implementation and Evaluation of Network Intrusion Detection Systems 988
Monis Akhlaq, Faeiz Alserhani, Irfan Awan, John Mellor, Andrea J. Cullen, and Abdullah Al-Dhelaan

Overlay Networks

Unicast QoS Routing in Overlay Networks 1017
Dragos Ilie and Adrian Popescu

Overlay Networks and Graph Theoretic Concepts 1039
Is-Haka M. Mkwawa, Demetres D. Kouvatsos, and Adrian Popescu

Author Index 1055
