

Contents

1 Introduction	1
1.1 General Introduction and Definition of Notation	1
1.1.1 Chronological Review	1
1.1.2 Basic Notation	3
1.2 Quantum Electrodynamics with an External Field	5
2 Scattering Processes in Which Interactions with the External Field are Taken into Account Exactly	16
2.1 The Quantized Charged Field in an External Electromagnetic Field	16
2.1.1 Spinor Field	16
2.1.2 Scalar Field	29
2.2 Perturbation Expansion in the Radiative Interaction in QED with an External Field	32
2.3 Green's Functions. The Generating Functional	40
2.4 Appendix. Extension of the Normal-Ordering Process to Theories with an Unstable Vacuum	50
3 Expectation Values	54
3.1 Green's Functions for the Calculation of Expectation Values	54
3.2 Perturbations in Powers of Radiative Interaction for Expectation Values	55
3.3 Equation for the Average Electromagnetic Field. Effective Action	60
3.4 Density Matrix of Particles Created by an External Field	64
4 Total Probabilities of Radiative Processes in an External Field	73
4.1 Total Irradiation Probability	73
4.1.1 Total Probability of Irradiation from the Vacuum Accompanied by Pair Creation	75
4.1.2 Differential Probability for Photon Irradiation from the Vacuum Accompanied by Pair Creation	78
4.1.3 Probability of Photon Irradiation from the Vacuum Accompanied by the Creation of a Single Pair	79

4.1.4	Total Probability of Irradiation from a One-Electron State Accompanied by Pair Creation	81
4.1.5	Differential Probability of a One-Photon Emission from a One-Electron State Accompanied by Pair Creation	83
4.1.6	Probability of One-Photon Emission from a One-Electron State Without Pair Creation	84
4.1.7	Radiative Processes with a Photon in the Initial State	85
4.2	Unitarity Relation and the Optical Theorem	89
4.3	Generating Functional for the Total Probabilities of Radiation Processes	96
4.4	Decay Probability of States	103
4.4.1	Vacuum Decay Probability	103
4.4.2	Decay Probability of a One-Electron State	104
4.4.3	Decay Probability of a One-Photon State	105
5	Calculations of Zero-Order Processes in External Electromagnetic Fields	107
5.1	Processes in an Electric Field	109
5.1.1	Constant Electric Field	112
5.1.2	Alternating Electric Field	122
5.2	A Constant Field Combined with that of a Plane Wave	126
5.2.1	Solutions of the Klein-Gordon Equation	127
5.2.2	Solutions of the Dirac Equation	131
5.2.3	Calculation of Zero-Order Processes. Spinor QED	133
5.2.4	Calculation of Zero-Order Processes. Scalar QED	139
5.3	Creation of Particles from the Vacuum in Coherent States	142
5.4	Calculation of the Density Matrix for Particles Created in an External Field	144
6	Propagators of Particles in External Electromagnetic Fields	148
6.1	Introduction	148
6.2	Determination of Propagators by Summing Solutions of the Relativistic Wave Equations	156
6.2.1	Constant Electric Field	156
6.2.2	A Constant Field Combined with that of a Plane Wave	170
6.2.3	Eigenfunction Method	179
6.3	Schwinger's Proper-Time Method	184
6.4	Calculation of the Green's Functions by the Functional Integration Method	191
6.4.1	Path Integral Representation of the Green's Functions	191
6.4.2	Combination of a Constant Field with a Plane Wave	204
6.4.3	Stationary Phase Method	209

7 Calculations of Radiative Processes in External Electromagnetic Fields	219
7.1 Effective Action in the One-Loop Approximation	220
7.2 Vacuum Processes	223
7.2.1 Mean Current of Created Particles	223
7.2.2 Probability of Photon Emission from the Vacuum Accompanied by Pair Creation	225
7.2.3 Total Probability of Photon Emission from the Vacuum Accompanied by Pair Creation	229
7.2.4 Probability of a Photon Emission from the Vacuum Accompanied by the Creation of a Single Pair. Vacuum Decay Probability	232
7.3 Processes with an Electron in the Initial State. Mass Operator	234
7.3.1 Probability of Transition from a One-Electron State with the Emission of a Photon and the Creation of Pairs	234
7.3.2 Total Transition Probability from a One-Electron State with Photon Emission and Pair Creation	240
7.3.3 Probability of Photon Emission from a One-Electron State without Pair Creation. Decay Probability of a One-Electron State	242
7.4 Radiative Processes with a Photon in the Initial State. Polarization Operator	246
8 Green's Function in Non-Abelian Theories	251
8.1 Introduction	251
8.2 Calculation of Green's Functions by the Functional Integration Method	255
8.3 Calculation of Green's Functions in an Abelian-like External Field	268
References	273
