Foreword	xvii
Preface	xviii
Introduction	xix
Acknowledgments	xx
Contributors	xxi
1. Congenital Spinal Deformities	1
<i>Ibrahim Obeid, Louis Boissiere, Derek T. Cawley</i>	
1.1 Introduction	1
1.2 Deciding on Surgery	1
1.3 Prognosis	3
1.4 Congenital Kyphosis and Kyphoscoliosis... ..	4
1.5 Further Perioperative Considerations	4
1.6 Treatment Options and Principles	6
2. Neuromuscular Spinal Deformities	13
<i>Athanasios I. Tsirikos</i>	
2.1 Introduction	13
2.2 Clinical Problems Associated with Spinal Deformity	13
2.3 Etiology and Natural History of Spinal Deformity	13
2.4 Patterns of Spinal Deformity	14
2.5 Specific Types of Spinal Deformity	15
2.5.1 Spina Bifida (Myelomeningocele)	15
2.5.2 Neurofibromatosis	15
2.6 Treatment Principles	16
2.6.1 Nonoperative Treatment	16
2.6.2 Surgical Treatment	16
2.7 Medical Considerations—Preoperative Assessment	17
2.8 Complications during and after Scoliosis Surgery	17
2.9 Deformity Correction Techniques	18
2.9.1 First- and Second-Generation Instrumentation Techniques	18
2.9.2 Third-Generation Instrumentation	18
2.10 Additional Surgical Considerations	19
2.10.1 Intraoperative Management	19
2.10.2 Levels of Fusion	19
2.10.3 Anterior Correction	19
2.10.4 Posterior Vertebral Column Resection	20
2.10.5 Growth Preservation/Modulation Techniques ..	20
2.11 Quality of Life Assessment/Life Expectancy after Scoliosis Surgery	20
2.12 Conclusion	21

3.	Idiopathic Spinal Deformities Treated with Spinal Osteotomies	22
	<i>Paul J. Park, Eduardo C. Beauchamp, Meghan Cerpa, Lawrence G. Lenke</i>	
3.1	Introduction	22
3.2	Posterior Column Osteotomy	22
3.2.1	Indications in Idiopathic Deformity	22
3.2.2	Technique.....	23
3.2.3	Case Illustration	23
3.3	Pedicle Subtraction Osteotomy	23
3.3.1	Indications in Idiopathic Deformity	25
3.3.2	Technique	25
3.3.3	Case Illustration	26
3.4	Preoperative Considerations and Postoperative Complications	26
3.4.1	PCO versus PSO.....	26
3.4.2	Complications	27
3.5	Conclusions	28
4.	The Natural History of Rigid Spinal Deformities	33
	<i>Jean Dubousset</i>	
4.1	Definition and Measurement	33
4.2	Natural History, Physiopathology	33
4.3	Natural History, Assessment of Flexibility/Rigidity	34
4.3.1	Reduction of the Deformity Will Be Checked: Locally and Globally.....	34
4.4	Natural History According to the Growing Spine and Etiologies	34
4.5	Natural History According to the Mature Spine and Etiologies	34
4.6	Natural History According to the Aging Spine and Etiologies	35
4.7	Subsequent Indications for Surgical Treatment	35
4.7.1	Treatment and Election of Surgical Approaches	35
4.8	Choice of Surgical Techniques and Approaches	36
4.8.1	For Localized Rigid Pathology.....	36
4.8.2	For Lesions Extending to Multiple Levels (Scoliotic, Kyphoscoliotic, or Lordoscoliotic Curve)	36
4.9	Conclusion	38
5.	Surgical Management of Children with Congenital Deformities of the Upper Thoracic Spine and Vertebral Malformations	39
	<i>Sergei Vissarionov</i>	
5.1	Introduction	39
5.2	Outcomes of Surgical Management	43
6.	Osteotomies in Children under the Age of 10 Years	49
	<i>Josh Schroeder, Leon Kaplan</i>	
6.1	Background	49
6.2	Overall Management of the Rigid Spine Deformity	49
6.3	Halo Traction	50
6.3.1	Halo Placement Technique	50
6.3.2	Complications with Halo Frames	50
6.4	Osteotomies for Correction of Rigid Spinal Deformities	50
6.4.1	Partial Facet Joint Resection	50
6.4.2	Complete Facet Joint Resection (Posterior Elementectomy).....	50
6.4.3	Three-Column Osteotomies.....	51
6.5	Outcome and Complications	56

7.	Surgical Treatment of Rigid Spinal Deformities in Patients with Thoracic Insufficiency Syndrome	58		
	<i>Leon Kaplan, Josh Schroeder</i>			
7.1	Thoracic Insufficiency Syndrome	58	7.3.1	Casting 59
7.2	Care	58	7.3.2	Surgery 59
7.3	Treatment Options	59	7.4	Conclusion 60
8.	Vertebral Column Resection as a Treatment for Neurologic Deficit in Severe Spinal Deformity	63		
	<i>Eduardo C. Beauchamp, Paul J. Park, Meghan Cerpa, Lawrence G. Lenke</i>			
8.1	Introduction	63	8.5	Spinal Cord Monitoring 67
8.2	Preoperative Evaluation	63	8.6	Vertebral Column Resection for Progressive Myelopathy 68
8.2.1	History and Physical Examination.....	63	8.7	Case Illustration 69
8.2.2	Imaging.....	64	8.8	Conclusion 70
8.3	Halo-Gravity Traction	64		
8.4	Surgical Technique	65		
9.	Osteotomies in Syndromic Patients	75		
	<i>Dino Colo, René M. Castelein</i>			
9.1	Introduction	75	9.7	Surgical Technique 80
9.2	Definition, Classification, and Indication ..	75	9.7.1	Smith–Petersen Osteotomy and Ponte Osteotomy
9.3	Rigid Deformities in Syndromic Patients ..	75	9.7.2	Pedicle Subtraction Osteotomy
9.4	Choice of Osteotomy: Type and Goal	78	9.7.3	Bone–Disk–Bone Osteotomy.....
9.5	Preoperative Workup	78	9.7.4	Vertebral Column Resection
9.5.1	Patient History and Physical Findings.....	78	9.8	Postoperative Care 82
9.5.2	Imaging Studies	79	9.9	Complications 82
9.6	Surgical Aspects and Technique	80	9.10	Outcome 83
9.6.1	Positioning and Perioperative Measures	80	9.11	Conclusion 83
10.	Rigid Spine Deformities in Early-Onset Scoliosis	84		
	<i>Pooria Hosseini, Behrooz A. Akbarnia</i>			
10.1	Introduction	84	10.2.3	EOS Imaging System/Three-Dimensional Modeling Techniques
10.2	Clinical and Radiographic Evaluation	84	10.2.4	CT Scan
10.2.1	History and Physical Examination.....	84	10.2.5	MRI.....
10.2.2	Plain Radiographs.....	85	10.3	Treatment of Rigid Spine Deformities in EOS 85

Contents

10.3.1	Nonoperative Treatments	85	10.4.2	Surgical Release of Soft Tissues.....	91
10.3.2	Operative Treatments	86	10.4.3	Temporary Internal Distraction Rod.....	91
10.4	Extra Procedures Considered in the Treatment of Rigid Curves	90	10.4.4	Osteotomies.....	91
10.4.1	Traction.....	90	10.5	Discussion	91
11.	Secondary Correction of Rigid Spinal Deformity after Failed Instrumentation	93			
	<i>Meric Enercan, Azmi Hamzaoglu</i>				
11.1	Introduction	93	11.3.3	Correction of Kyphosis Deformity.....	96
11.2	Preoperative Evaluation.....	93	11.3.4	Correction of Lordosis/Lordoscoliosis Deformity.....	97
11.2.1	History.....	93	11.3.5	Correction of Severe Rigid Pelvic Obliquity in Neglected Congenital Scoliosis.....	98
11.2.2	Physical Examination	93	11.3.6	Reconstruction Laminectomy Defect following Posterior Vertebral Column Resection	98
11.2.3	Imaging Studies	94	11.4	Complications.....	99
11.3	Surgical Technique.....	94	11.5	Conclusion	100
11.3.1	Correction of Scoliosis Deformity	95			
11.3.2	Correction of Kyphoscoliosis Deformity	95			
12.	Kyphectomy in Patients with Myelomeningocele.....	102			
	<i>Josh Schroeder, Leon Kaplan</i>				
12.1	Introduction	102	12.3	Surgical Technique.....	103
12.2	Kyphectomy	102	12.4	Outcome.....	105
13.	Pitfalls and Difficulties in the Surgical Management of Severe Adolescent Idiopathic Scoliosis.....	108			
	<i>Mario Di Silvestre</i>				
13.1	Definition of Severe Idiopathic Scoliosis ..	108	13.4	Preferred Operative Technique	111
13.1.1	Preoperative Study.....	108	13.4.1	Magnetically Controlled Growing Rod	113
13.1.2	Preoperative Halo Traction.....	109	13.4.2	Intraoperative Monitoring of Spinal Cord Function	114
13.2	Surgical Treatment.....	110	13.4.3	First Posterior Surgery	114
13.2.1	Introduction.....	110	13.4.4	Second Stage of Posterior Surgery.....	116
13.3	Posterior-Only Procedures	110	13.5	Conclusion	117
13.3.1	Pedicle Screws.....	111			
13.3.2	Posterior Staged Technique.....	111			
14.	Posttraumatic Spine Deformity.....	120			
	<i>David B. Bumpass, Lawrence G. Lenke</i>				
14.1	Introduction	120	14.3.1	Normal Thoracolumbar Alignment	121
14.2	Epidemiology	120	14.3.2	Classification	121
14.3	Evaluation of Posttraumatic Deformity ..	121	14.3.3	Biomechanics and Pathology	121
			14.3.4	Presentation and Physical Exam.....	122
			14.3.5	Radiographic Evaluation.....	122

14.4	Nonoperative Management	123	14.5.3	Combined Anterior–Posterior Surgical Approaches	126
14.5	Operative Management	123	14.5.4	Posterior Surgical Approaches	126
14.5.1	Surgical Indications and Planning	123	14.5.5	Technical Considerations	127
14.5.2	Anterior Surgical Approaches	126	14.5.6	Complications	128
15.	Osteoporotic Rigid Spinal Deformities	130			
	<i>Marco Brayda-Bruno, Andrea Luca, Gabriele Ristori, Lisa Babbi, Alessio Lovi</i>				
15.1	Introduction	130	15.4	How to Improve Pedicle Screw Stability .	131
15.2	Epidemiology and Etiology of Osteoporotic Deformities	130	15.5	Osteoporotic Spine Deformity Correction	132
15.3	Our Philosophy of Treatment in Osteoporotic VCFs and Related Kyphotic Deformities ..	130	15.6	Complications and Conclusions	132
16.	Spinal Deformities in Patients with Parkinson’s Disease	135			
	<i>Stéphane Wolff, Peter Upex, Guillaume Riouallon</i>				
16.1	Introduction	135	16.3	Surgical Technique	136
16.2	Surgical Considerations	135	16.4	Conclusion	136
17.	Surgical Planning for En Bloc Resection of Spinal Tumors: Tailoring the Osteotomy to Tumor Extensions	138			
	<i>Stefano Boriani, Alessandro Gasbarrini, Riccardo Ghermandi, Shifra Fraifeld, José E. Cohen, Eyal Itshayek</i>				
17.1	Introduction	138	17.2.5	Osteotomy of the Spine to Finalize the En Bloc Resection	147
17.2	Planning En Bloc Resection	139	17.3	Case Report	147
17.2.1	Steps for Surgical Planning	139	17.4	Discussion and Conclusions	148
17.2.2	Essential Surgical Criteria	140	17.4.1	Conflicts of Interest	149
17.2.3	Surgical Tips and Techniques	140	17.4.2	Acknowledgments	149
17.2.4	Surgical Approach	140			
18.	Corrective Osteotomies in the Cervical Spine	151			
	<i>Venu M. Nemani, Peter B. Derman, Han Jo Kim</i>				
18.1	Introduction	151	18.5.2	Previous Surgery	155
18.2	Clinical Symptoms and Natural History ..	151	18.5.3	Curve Rigidity and Degree of Deformity	155
18.3	Physical Exam	151	18.5.4	Neurologic Status	155
18.4	Radiographic Evaluation	152	18.6	Osteotomy Types	155
18.5	Assessment and Preoperative Planning ..	154	18.6.1	Anterior Osteotomies	155
18.5.1	Location of the Deformity	154	18.6.2	Posterior Osteotomies	156
			18.6.3	Combined Osteotomies	157
			18.7	Conclusion	157

19.	Junctional Corrective Osteotomies (Cervicothoracic, Thoracolumbar, Lumbosacral).....	159
	<i>Claudio Lamartina, Riccardo Cecchinato</i>	
19.1	Introduction	159
19.2	Preoperative Evaluation.....	159
19.3	Cervicothoracic Kyphotic Deformity and Corrective Osteotomies.....	160
19.3.1	Patient Preparation	160
19.3.2	Technical Considerations	160
19.4	Thoracolumbar Corrective Osteotomies ..	162
19.4.1	Patient Preparation	163
19.4.2	Technical Considerations	164
19.5	Lumbosacral Corrective Osteotomies....	165
19.5.1	Patient Preparation	166
19.5.2	Technical Considerations	166
20.	Corrective Strategies and Management of Rigid Sacropelvic Pathologies	170
	<i>Yechiel N. Gellman, Josh Schroeder, Meir Liebergall</i>	
20.1	Introduction	170
20.2	Presenting Symptoms	170
20.3	Radiographic Evaluation	171
20.4	Management.....	171
20.4.1	Reconstruction of the Pelvic Girdle.....	171
20.4.2	Sacral Osteotomies.....	172
20.4.3	Pelvic Osteotomies.....	172
20.4.4	Other Salvage Procedures	172
20.4.5	Computer-Assisted Surgery.....	173
20.5	Summary	174
21.	Ankylosing Spinal Disorders	176
	<i>Roongrath Chitragran, Rune Hedlund</i>	
21.1	Introduction	176
21.2	Ankylosing Spondylitis with Fracture....	176
21.3	Ankylosing Spondylitis with Kyphotic Deformity.....	178
21.4	Diffuse Idiopathic Skeletal Hyperostosis with Fracture	180
22.	Osteotomies in Revision Surgery	184
	<i>Ahmet Alanay, Çağlar Yılgör</i>	
22.1	Introduction	184
22.2	General Indications	184
22.3	Osteotomies	185
22.3.1	Grade 1 Osteotomies	185
22.3.2	Grade 2 Osteotomies	185
22.3.3	Grade 3 Osteotomies.....	185
22.3.4	Grade 4 Osteotomies.....	186
22.3.5	Grade 5 and 6 Osteotomies	186
22.4	Difficulties in Performing Osteotomies in Revision Cases.....	187
22.5	Conclusions	188
23.	Classification and Definition of Rigid Spine Deformity	189
	<i>Josh Schroeder, Janina Kueper, Leon Kaplan</i>	
23.1	Introduction	189
23.2	Definition	189
23.2.1	Pediatric Rigid Spinal Deformity	189
23.2.2	Idiopathic Scoliosis	190
23.2.3	Congenital Deformity	190
23.2.4	Neuromuscular and Paralytic Scoliosis.....	190
23.2.5	Scheuermann's Kyphosis	190
23.2.6	Adult Spinal Deformity.....	190

23.3	Classification	191	23.4	Conclusions	192
23.3.1	Pediatric Spinal Deformity Classifications....	191			
24.	Strategies in the Correction of Rigid Spinal Deformities—Controversies between Anterior and Posterior Approach	194			
	<i>Sebastien Charosky</i>				
24.1	Introduction	194	24.2.2	Shape and Severity of the Deformity	195
24.2	Patient Assessment and Surgical Strategy	194	24.2.3	Flexibility of the Deformity and Balance of the Trunk	197
24.2.1	Location of the Deformity	194	24.3	Conclusion	200
25.	Anesthesia for Spinal Surgery	203			
	<i>Ruth Shaylor, Benjamin Drenger</i>				
25.1	Introduction	203	25.5.1	Neurophysiologic Monitoring.....	205
25.2	Spinal Cord	203	25.5.2	Bispectral Index (BIS) Monitoring	205
25.3	Blood Supply	203	25.5.3	Other Monitoring.....	206
25.4	Preoperative Assessment	203	25.6	Positioning	206
25.4.1	Preexisting Conditions	203	25.7	Blood Conservation Techniques	206
25.4.2	Airway	204	25.8	Wake-Up Test	207
25.4.3	Respiratory System	204	25.9	Postoperative Considerations and Complications	207
25.4.4	Cardiovascular System	204	25.10	Conclusions	208
25.4.5	Neurologic System	204			
25.4.6	Trauma	204			
25.5	Induction and Maintenance	205			
26.	Neuromonitoring in Rigid Spine Deformity Correction	209			
	<i>Akiva Korn, Joseph Danto</i>				
26.1	Introduction	209	26.2.3	Electromyography	212
26.2	NIOM Tools	209	26.2.4	Multimodality Approach	212
26.2.1	Somatosensory Evoked Potentials	209	26.3	Clinical Applications	212
26.2.2	Transcranial Electric Motor Evoked Potentials	210	26.4	Conclusion	212
27.	Neurological Complications after Surgery or Trauma to the Rigid Spine	214			
	<i>Avi Ohry, W. S. El Masri, Stephen Eisenstein</i>				
27.1	Introduction	214	27.4	Posttraumatic Kyphosis (Hermann Kummell's Disease; 1895)	216
27.2	Spondyloarthropathies	214	27.5	Rehabilitation Medicine Perspective	216
27.3	Scoliosis	215			

28.	Importance of the Sagittal Balance in Correction of Rigid Spine.....	218
	<i>Pierre Roussouly, Amer Sebaaly</i>	
28.1	Introduction	218
28.2	Pelvic Sagittal Parameters: The Plinth of Sagittal Balance	218
28.3	Spinal Sagittal Parameters: Are We Speaking the Same Language?.....	219
28.4	Spinal Balance Parameters: Metric versus Angular	221
28.5	Spinal Shapes in the Normal Population .	223
28.6	Degenerative Spinal Evolution	224
28.7	Surgical Strategies in Correcting Rigid Spinal Sagittal Deformity	226
28.7.1	When the Pelvic Incidence Is Small (<50 degrees).....	227
28.7.2	When the Pelvic Incidence Is High (>50 degrees).....	228
28.8	Proximal Junctional Kyphosis: A Complication of Faulty Surgical Strategy.....	228
28.9	Conclusion	229
29.	Robot-Guided Surgery in Rigid Spinal Deformities.....	231
	<i>Yair Barzilay, Sajjan K. Hegde, Isador H. Lieberman, Pramod K. Sudarshan, Harel Arzi, Samuel S. Bederman</i>	
29.1	Introduction	231
29.2	Robotic Guidance in Spine Surgery	231
29.2.1	Robotic Systems in Clinical Use	231
29.3	Robotic Surgery in Spinal Deformity.....	232
29.4	Special Considerations	234
29.4.1	Pelvic Fixation	234
29.4.2	Revision Spinal Surgery—Redrilling Pedicles, Retained Instrumentation	234
29.5	Case Illustrations.....	235
29.5.1	Case 1.....	235
29.5.2	Case 2.....	235
29.5.3	Case 3.....	237
29.5.4	Case 4.....	237
29.5.5	Case 5.....	237
29.6	Robot-Guided Osteotomies for Rigid Deformities	242
29.7	Conclusion	243
30.	Biological Aspects of Spine Fusion—Methods to Enhance Fusion Rates	244
	<i>Venu M. Nemani, Matthew E. Cunningham</i>	
30.1	Introduction	244
30.2	Fusion Formation	244
30.3	Properties of Bone Grafts	245
30.4	Types of Grafts	245
30.4.1	Autograft.....	245
30.5	Osteoinductive Agents.....	246
30.5.1	Bone Morphogenetic Proteins	246
30.5.2	Demineralized Bone Matrix	246
30.6	Osteoconductive Agents	247
30.6.1	Allograft Bone	247
30.6.2	Synthetic Bone Grafts	247
30.7	Osteopromotive Agents	247
30.8	Systemic Agents	247
30.8.1	Bisphosphonates.....	248
30.8.2	Parathyroid Hormone	248
30.9	Conclusions	248

31. Role of Anterior Approach in the Correction of Adult Spinal Deformities.....	251
<i>Sleiman Haddad, Ferran Pellisé</i>	
31.1 Introduction	251
31.2 Adult Spinal Deformity	252
31.3 Reconstruction of the Lower Lumbar Spine and Lumbosacral Junction	252
31.3.1 Access to the Lower Lumbar Spine	252
31.3.2 Restoration of Anterior Column Support.....	253
31.3.3 Reconstruction of Lumbosacral Segmental Sagittal Alignment	253
31.4 Thoracolumbar Kyphoscoliosis and Anterior Release	254
31.4.1 Complications of the Anterior Approaches...	255
31.4.2 Comparative Studies: Combined Approaches	256
31.5 Case Studies	256
31.5.1 Case 1.....	256
31.5.2 Case 2.....	256
31.5.3 Case 3.....	256
31.5.4 Case 4.....	257
31.5.5 Case 5.....	257
31.6 Conclusion	259
32. Osteotomies in Spinal Tuberculosis—Adult Care	261
<i>S. Rajasekaran, Rishi Mugesh Kanna, Ajoy Prasad Shetty</i>	
32.1 Introduction	261
32.2 Pathophysiology of Kyphosis in Spinal Tuberculosis.....	261
32.2.1 Kyphosis during the Acute Phase of Tuberculosis.....	261
32.2.2 Healing Patterns in Spinal Tuberculosis.....	262
32.2.3 Kyphosis Progression in the “Healed” Phase	262
32.3 Surgical Treatment of Kyphosis in Spinal Tuberculosis.....	262
32.3.1 Principles of Surgery in Active Tuberculosis ..	262
32.3.2 Single-Stage Kyphosis Correction by Anterior Approach and Stabilization.....	263
32.3.3 Single-Stage Transpedicular Approach and Posterior Correction (Posterior Closing Wedge Osteotomy)	263
32.3.4 Single-Stage Kyphosis Correction by Posterior-Only Transforaminal Approach and Interbody Fusion	265
32.3.5 Single-Stage Kyphosis Correction by Posterior Costotransversectomy or Anterolateral Approach and Posterior Stabilization	265
32.3.6 Kyphosis Correction by Combined Anterior and Posterior Approach	267
32.4 Surgery for Kyphosis Correction in Healed Tuberculosis.....	267
32.4.1 Transpedicular Decancellation Osteotomy ...	268
32.4.2 Pedicle Subtraction Osteotomy	268
32.4.3 Single-Stage Kyphosis Correction through Extrapleural Approach	268
32.4.4 Closing Opening Wedge Osteotomy (Vertebral Column Resection).....	268
32.5 Conclusion	270
33. Osteotomies in Tuberculosis—Pediatric Care	271
<i>Alexander Mushkin</i>	
33.1 Introduction	271
33.2 Diagnosis of Spinal Tuberculosis in Children.....	271
33.3 Principles of Treatment	271
33.3.1 Surgical Treatment of the Consequences of Tuberculosis Spondylitis in Children.....	273
34. Osteotomies for Adult Degenerative Scoliosis	276
<i>Yigal Mirovsky, Yossi Smorgick</i>	
34.1 Introduction	276
34.2 Selection of Fusion Levels.....	276

Contents

34.3	Spine with Mobile Disks	277	34.5	Complications	279
34.3.1	Two Main Surgical Techniques Described in This Category	277	34.5.1	Early Complications	280
			34.5.2	Late Complications	280
34.4	Spine with Decreased Disk Mobility	277	34.6	Conclusion	281
34.4.1	Pedicle Subtraction Osteotomy	277			
Index					283
