

Peter Kall · Hans-Jakob Lüthi (Eds.)

Operations Research Proceedings 1998

Selected Papers of the
International Conference on Operations Research
Zurich, August 31 - September 3, 1998

With 82 Figures
and 51 Tables

Springer

Contents

Preface	v
Opening Session	
Plenary Lectures	1
Challenges for Operations Research as a Scientific Discipline at the Beginning of the 21st Century	3
F. J. Radermacher	
Combinatorial Online Optimization	21
N. Ascheuer, M. Grötschel, S.O. Krumke, and J. Rambau	
Section 1A:	
Mathematical Optimization — Continuous	39
Oligopolies as Dynamic Games: A Computational Economics Perspective —Invited Lecture—	41
A. Haurie, F. Moresino and O. Pourtallier	
Application of Topological Degree Theory to Semi-Definite Complementarity Problem	53
A.V.A. Bulavsky, B.G. Isac, and C.V.V. Kalashnikov	
On the First-Order Estimation of Multipliers from Kuhn-Tucker Systems in Multiplier Methods Using Variable Reduction	63
E. Mijangos and N. Nabona	
X Properties of Some Convex Marginal Functions Without Constant Rank Regularity	73
U. Würker	
X A Numerical Approach to Optimization w.r.t. Variable-Dependent Constraint-Indices	83
W. Achtziger	
Minimization of Maximal Torque of a Flywheel Robot	93
P. Flisberg, T. Larsson, P.O. Lindberg, S. Grahn, and G. Johansson	
A Phase-1-Algorithm for Interior-Point-Methods: Worst-Case and Average-Case Behaviour	103
P. Huhn	

Towards a Unified Framework for Randomized Pivoting Algorithms in Linear Programming	113
L. Finschi, K. Fukuda, and H.-J. Lüthi	
Section 1B: Mathematical Optimization — Discrete	123
The Constrained Crossing Minimization Problem—A First Approach	125
P. Mutzel and T. Ziegler	
Sensitivity Analysis of the Bipartite Weighted Matching Problem	135
H. Achatz	
Partitioning Cliques of Claw-Free Strongly Chordal Graphs	142
G. Confessore, P. Dell’Olmo, and S. Giordani	
Extreme Rays of the Cones of Subadditive Functions	152
V.A. Shlyk	
Flow Improvement and Network Flows with Fixed Costs	158
S.O. Krumke, H. Noltemeier, S. Schwarz, H.-C. Wirth, and R. Ravi	
Comparison of an Exact Branch-and-Bound and an Approximative Evolutionary Algorithm for the Probabilistic Traveling Salesman Problem	168
S. Rosenow	
A Genetic Algorithm with a Non-Binary Representation for the Set Covering Problem	175
A.V. Ereemeev	
A Dynamical System Based Heuristic for a Class of Constrained Semi-Assignment Problems	182
M. Burkard, M. Cochand, and A. Gaillard	
On the Mathematical Treatment of Pileproblems	192
L. Kämmerer and L. Hempel	
Mean Value Cross Decomposition Based Branch-and-Bound for Mixed Integer Programming Problems	200
K. Holmberg	
Building Reusable Software Components for Heuristic Search	210
A. Fink, S. Voß, and D.L. Woodruff	

Ein verteilt-paralleles Tabu Search-Verfahren für Containerbeladeprobleme mit schwach heterogenem Kistenvorrat	220
H. Gehring und A. Bortfeldt	

Section 2: Stochastic Modelling, Optimization & Simulation **229**

Computing Moments of the Exit Distribution for Diffusion Processes Using Linear Programming	231
K. Helmes	
Recursive Direct Algorithms for Multistage Stochastic Programs in Financial Engineering	241
M.C. Steinbach	
MEPO, ein System zur effektiven parallelen Bearbeitung von Optimierungsaufgaben	251
M. Hadenfeld	
A Simulation Platform for Multiagent Systems in Logistics	261
H. Ulrich	

Section 3: Econometrics & Statistics **269**

Nonlinear and Nonparametric Methods for Analyzing Financial Time Series —Invited Lecture—	271
J. Franke	
On Statistical Event-History Analysis and Its Application	283
P. Volf	
Detection of Compatible Turning-Points and Signal-Extraction of Non-Stationary Time Series	293
M. Wildi	

Section 4: Mathematical Economics, Game Theory & Decision Theory **301**

Membership of Values to the Core for Average-Convex TU-Games	303
T. Driessen	
A Cooperative Approach to Multiagent Incentive Problems	312
M. Krapp	

Reputation under Imperfect Observability	320
A. Prosser	
Section 5:	
Banking & Finance	329
Dynamische Portfolio-Selektion in stetiger Zeit unter Berücksichtigung von Kurssprüngen	331
B. Nietert	
Optionsbewertung mit Hilfe der genetischen Programmierung	341
C. Keber	
Section 6:	
Operations & Production Management	351
Recent Developments in Scheduling —Invited Lecture—	353
U. Dorndorf, E. Pesch, and T. Phan Huy	
Two-Stage Flow-Shop Scheduling Problem with Multiprocessor Tasks at the First Stage	366
C. Ögüz, X.T. Qi, and Y.F. Fung	
Ein working-forward Verfahren zur kostenorientierten Fließbandabtaktung	376
M. Amen	
Section 7:	
Energy & Ecology	387
Allocation Problem for Ecological Planning	389
A.N.I. Kalashnikova and B.A.V. Boiko	
Section 8:	
Telecommunication	397
Challenges in a Liberalised Telecommunications Market —Invited Lecture—	399
J.A. Audestad	
On Extended Models of Multicommodity Routing with Side Constraints on Paths	411
K. Holmberg and D. Yuan	

Optimization of Transmitting Powers and Locations of Base Stations in Cellular Radio Communication Systems	421
S. Hieta and E. Melachrinoudis	

A Ring Network Design Problem	431
M. Henningsson, K. Holmberg, M. Rönqvist, and P. Värbrand	

Section 9:

Logistics & Transportation	441
---------------------------------------	------------

Routenplanung für Gefahrguttransporte: Ein GIS-basierter Ansatz für die Ermittlung kosten- und risikoeffizienter Routen	443
H. Isermann und M. Huth	

Das Groupage-Problem kooperierender Verkehrsträger	453
H. Kopfer und G. Pankratz	

Estimation of O/D Matrices from Traffic Counts: Theoretical Analysis and Simulation Experiments	463
L. Bianco, G. Confessore, and P. Reverberi	

AHP-gestützte Evaluation von Verkehrsprojekten	473
K. Weber	

Ein Simulated-Annealing-Verfahren für das Standardproblem der Tourenplanung mit Zeitfensterrestriktionen	483
J. Homberger und H. Gehring	

A Genetic Algorithm Approach to a Terminus Re-Scheduling Problem	493
S.J. Massey and J.F. Boyce	

Pricing and Allocation of Rail Track Capacity	503
A. Bassanini and A. Nastasi	

Modelling ROTASTORE — A Highly Parallel, Short Term Storage System	513
H.W. Hamacher, M.C. Müller, and S. Nickel	

Optimierung der Distributionsstruktur eines Schweizer Nahrungsmittelherstellers	522
K. Engeler, A. Klose, und P. Stähly	

Locating a Robust Facility	532
E. Carrizosa and S. Nickel	

Section 10:	
Fuzzy Systems & Neural Networks	541
Pareto-Optimal and Compromise Decisions in Problem with Fuzzy Criteria	543
J. Ramik	
Single-Machine Scheduling with Mixed Precedence Constraints	552
E. Levner and M. Vlach	
Training of Large Three-Layer Perceptrons with the	
Neuro-Computer SYNAPSE	562
M.H. Breitner and S. Bartelsen	
Special Section:	
GOR Diploma Prize	571
Exact Algorithms for the Minimum-Cost Embeddings of	
Reliable Virtual Private Networks into Telecommunication Networks	573
R.H. Möhring, M. Oellrich and A.S. Schulz	
Author Index	583
