

Table of contents

Acknowledgements	I
Table of contents	III
1. Introduction	1
2. Background	4
2.1. Electrodeposition	4
2.1.1. Basic concept of electrodeposition	5
2.1.2. Growth of electrodeposited films	7
2.1.3. Electrodeposition variables	9
2.1.4. Electrodeposition of CoNi-alloys	18
References	22
2.2. Nanocrystalline metals	26
2.2.1. Synthesis of nanocrystalline metals	27
2.2.2. General characteristics of nanocrystalline metals	29
References	32
2.3. Grain boundary structure	34
References	40
2.4. Phase transformation in Co and Co-alloys	41
References	45
2.5. Basic concepts of EBSD-based orientation microscopy	46
References	52
3. Experimental details	53
3.1. Electrodeposition	53
3.2. CoNi samples	54
3.3. Sample preparation	55
3.4. Characterization techniques	58
References	63
4. Experimental results and discussion	64
4.1. Microstructure	64
4.1.1. General description	64
4.1.2. Phase distribution	67
4.1.3. Grain size and grain size distribution	71
4.1.3.1. Substrate and bath interfaces of electrodeposited CoNi	78

4.1.3.2. Cross section of electrodeposited CoNi	85
4.1.4. Discussion	89
References	95
4.2. Crystallographic texture	96
4.2.1. Microtexture	96
4.2.2. Orientation gradient	100
4.2.3. Discussion	106
References	109
4.3. Grain boundary	110
4.3.1. Grain boundary character	110
4.3.2. Boundary character distribution	113
4.3.3. Triple junctions	116
4.3.4. Discussion	120
References	124
4.4. 3D-EBSD	125
4.4.1. Discussion	132
References	134
4.5. Dependence on the amount of saccharin	135
4.5.1. Microstructure	135
4.5.1.1. General description	135
4.5.1.2. Phase distribution	140
4.5.1.3. Grain size	142
4.5.2. Texture	148
4.5.3. Grain boundaries	155
4.5.4. Discussion	160
References	166
5. Conclusions	167
Summary	174
Zusammenfassung	177
