

Contents

1	Introduction	1
1.1	Historical Review of Country Roads and Motorways	1
1.2	Development of Transport	2
1.3	Road Planning Objectives	3
2	Road Network Design	5
2.1	Functions of the Roads	5
2.2	Category Groups	6
2.3	Connection Function	7
2.4	Road Networks in Europe and Germany	8
3	Targets with Measurement and Description Variables	11
3.1	Target Field Traffic Quality	12
3.2	Target Field Road Safety	12
3.3	Target Field Environment	14
3.4	Target Field Costs	16
4	Usage Requirements	19
5	Planning Process	23
5.1	General Transport Planning and Consideration Process	23
5.2	Planning Process for Motorways and Rural Roads	27
6	Road Categories and Design Classes	35
6.1	Motorways	35
6.2	Country Roads	36
7	Design Characteristics of the Design Classes	39
7.1	Motorways	39
7.2	Country Roads	40
7.2.1	Country Roads of EKL 1	41
7.2.2	Country Roads of the EKL 2	42
7.2.3	Country Roads of the EKL 3	44

7.2.4	Country Roads of the EKL 4	46
7.2.5	Dual Two-lane Rural Roads	47
8	Vehicle Dynamics	49
8.1	State of the Art	49
8.2	Driver–Vehicle–Road Space: Control Loop	50
8.2.1	Driver	50
8.2.2	Vehicle	50
8.2.3	Driving Resistances	51
8.2.4	Tractive and Braking Forces	52
8.2.5	The Street	52
8.3	Coefficients of Friction	55
8.4	Driving Dynamics of the Individual Vehicle	58
8.4.1	Driving on a Straight, Horizontal Road	58
8.4.2	Driving on a Straight Line with a Gradient	58
8.4.3	Driving through Curves	59
8.5	Driving Dynamics Derivation of Design Variables in the RAS-L 95	60
8.5.1	Speeds	60
8.5.2	Minimum Radii	62
8.5.3	Required Sight Distance	63
9	Standard Cross-sections	67
9.1	State of the Art	67
9.1.1	Road Safety	67
9.1.2	Traffic Flow	69
9.1.3	Status of the Guidelines	70
9.2	Standard Cross-sections for Motorways	70
9.2.1	Standard Cross-sections for Motorways of the EKA 1	70
9.2.2	Standard Cross-sections for Motorways of the EKA 2	72
9.2.3	Standard Cross-sections for Motorways of the EKA 3	73
9.2.4	Definition of Standard Cross-sections for Motorways	73
9.2.5	Standard Cross-sections for Bridges	76
9.3	Standard Cross-sections for Rural Roads	77
9.3.1	Standard Cross-sections for Roads of EKL 1	77
9.3.2	Standard Cross-sections for Roads of EKL 2	79
9.3.3	Standard Cross-sections for Roads of EKL 3	83
9.3.4	Standard Cross-sections for Roads of the EKL 4	84
9.3.5	Standard Cross-section for Roads from EKL 1 to EKL 3 with Very High Traffic Demand	84
9.3.6	Design of Standard Cross-sections for Rural Roads	85
9.4	Cross-sectional Elements	90

10	Intersections	91
10.1	State of the Art	91
10.1.1	Road Safety	91
10.1.2	Traffic Flow	93
10.1.3	Status of the Guidelines	94
10.2	Intersections for Motorways	94
10.2.1	Basic Principles	94
10.2.2	Four-way Motorway Intersections	97
10.2.3	Three-way Motorway Intersections	102
10.2.4	Access Intersections	106
10.2.5	Design Elements for Motorway Intersections	114
10.2.6	Dimensioning of Intersection Elements for Motorways	127
10.3	Intersection Types for Rural Roads	130
10.3.1	Types of Intersections	130
10.3.2	Requirements for the Intersection Design	133
10.3.3	Intersections for Roads of EKL 1	138
10.3.4	Intersections for Roads of EKL 2	140
10.3.5	Intersections for Roads of EKL 3	141
10.3.6	Intersections for Roads of the EKL 4	143
10.3.7	Design Elements for Grade-separated and Partly Grade-separated Intersections on Rural Roads	144
10.3.8	Design Elements for At-grade Intersections and T-junctions on Rural Roads	149
10.3.9	Design Elements for Roundabouts on Rural Roads	171
10.3.10	Central Islands and Crossing Points	174
10.3.11	Dimensioning of Intersections on Rural Roads	177
11	Integrated Consideration of Road Sections and Intersections	189
12	Design Elements in the Site Plan	191
12.1	State of the Art	191
12.2	Basic Principles	192
12.3	Layout Finding	194
12.4	Straight Lines	195
12.5	Circular Curves	196
12.6	Transition Curve	200
12.7	Site Plan Curves	205
13	Design Elements in the Elevation Plan	207
13.1	State of the Art	208
13.2	Longitudinal Inclinations	208
13.3	Crest and Sag Curves	209

14	Design Elements in Cross Section	213
14.1	State of the Art	213
14.2	Crossfall	214
14.2.1	Crossfall in the Straight Line	214
14.2.2	Crossfall in Circular Curves	215
14.3	Superelevation and Superelevation Development	217
14.4	Widening of Carriageway in Tight Curves	224
14.5	Road Widening	225
14.6	Special Features of the Alignment in the Area of Bridges and Tunnels	225
15	Sight Distance	229
15.1	State of the Art	230
15.2	Required Stop Sight Distance	230
15.3	Orientation Sight Distance	232
15.4	Required Overtaking Sight Distance	233
15.5	Existing Sight Distance	235
16	Spatial Alignment	239
16.1	State of the Art	239
16.2	Site Plan Elements	240
16.3	Height Plan Elements	241
16.4	Overlay of Site Plan and Elevation Plan	241
16.5	Standard Spatial Elements	243
16.6	Deficits in Spatial Alignment	245
16.6.1	Visual Shadows	247
16.6.2	Concealed Curve Start	247
16.6.3	Delongation and Compression	249
16.6.4	Design Deficits	249
17	Visualization of Roads	253
18	Roadside Furniture and Additional Facilities	255
18.1	Traffic Signs	256
18.1.1	Danger Sign	256
18.1.2	Regulation Sign	257
18.1.3	Guidance Signs	257
18.2	Signposting	258
18.3	Road Markings	258
18.4	Traffic Guidance Systems	259
18.4.1	Delineator (Sign 620)	259
18.4.2	Guiding Boards and Guide Marks	260
18.5	Vehicle Restraint Systems (Safety Barriers)	260
18.6	Immission Control Devices	264
18.6.1	Noise Protection Measures	266

18.7	Other Roadside Furniture Elements.	269
18.7.1	Wild Animals Protection Fences	269
18.7.2	Anti-Glare Fences	269
18.7.3	Lighting	269
18.7.4	Planting	270
18.7.5	Service Stations	270
19	Drainage.	271
19.1	Safety Aspects in the Drainage of Traffic Areas	271
19.2	Drainage Measures.	272
19.3	Road Construction in Water Catchment Areas.	274
