1	Speech, Symbols and Sets	1
1.1	Speech Patterns and Symbols in Mathematics	1
1.2	Summation and Product Symbol	4
1.3	Powers and Roots	5
1.4	Symbols of Set Theory	6
1.5	Exercises	8
2	The Natural Numbers, Integers and Rational Numbers	11
2.1	The Natural Numbers	11
2.2	The Integers	15
2.3	The Rational Numbers	15
2.4	Exercises	17
3	The Real Numbers	19
3.1	Basics	19
3.2	Real Intervals	20
3.3	The Absolute Value of a Real Number	21
3.4	n -th Roots	22
3.5	Solving Equations and Inequalities	23
3.6	Maximum, Minimum, Supremum and Infimum	25
3.7	Exercises	26
4	Machine Numbers	29
4.1	b -adic Representation of Real Numbers	29
4.2	Floating Point Numbers	31
4.3	Exercises	35
5	Polynomials	37
5.1	Polynomials: Multiplication and Division	37
5.2	Factorization of Polynomials	41

5.3	Evaluating Polynomials	43
5.4	Partial Fraction Decomposition.....	44
5.5	Exercises	48
6	Trigonometric Functions	49
6.1	Sine and Cosine	49
6.2	Tangent and Cotangent.....	53
6.3	The Inverse Functions of the Trigonometric Functions	55
6.4	Exercises	57
7	Complex Numbers: Cartesian Coordinates	59
7.1	Construction of $\mathbb{C}$	59
7.2	The Imaginary Unit and Other Terms	61
7.3	The Fundamental Theorem of Algebra.....	63
7.4	Exercises	65
8	Complex Numbers: Polar Coordinates	67
8.1	The Polar Representation	67
8.2	Applications of the Polar Representation	69
8.3	Exercises	74
9	Linear Systems of Equations	75
9.1	The Gaussian Elimination Method	75
9.2	The Rank of a Matrix	80
9.3	Homogeneous Linear Systems of Equations	82
9.4	Exercises	84
10	Calculating with Matrices	87
10.1	Definition of Matrices and Some Special Matrices	87
10.2	Arithmetic Operations.....	89
10.3	Inverting Matrices	94
10.4	Calculation Rules.....	96
10.5	Exercises	98
11	<i>LR</i>-Decomposition of a Matrix	101
11.1	Motivation	101
11.2	The <i>L R</i> -Decomposition: Simplified Variant	102
11.3	The <i>L R</i> -Decomposition: General Variant	105
11.4	The <i>L R</i> -Decomposition-with Column Pivot Search	108
11.5	Exercises	109

12 The Determinant	111
12.1 Definition of the Determinant	111
12.2 Calculation of the Determinant	113
12.3 Applications of the Determinant	117
12.4 Exercises	120
13 Vector Spaces	123
13.1 Definition and Important Examples	123
13.2 Subspaces	126
13.3 Exercises	128
14 Generating Systems and Linear (In)Dependence	131
14.1 Linear Combinations	131
14.2 The Span of X	134
14.3 Linear (In)Dependence	135
14.4 Exercises	138
15 Bases of Vector Spaces	141
15.1 Bases	141
15.2 Applications to Matrices and Systems of Linear Equations	146
15.3 Exercises	150
16 Orthogonality I	153
16.1 Scalar Products	153
16.2 Length, Distance, Angle and Orthogonality	156
16.3 Orthonormal Bases	157
16.4 Orthogonal Decomposition and Linear Combination with Respect to an ONB	159
16.5 Orthogonal Matrices	161
16.6 Exercises	164
17 Orthogonality II	165
17.1 The Orthonormalization Method of Gram and Schmidt	165
17.2 The Vector Product and the (Scalar) Triple Product	168
17.3 The Orthogonal Projection	172
17.4 Exercises	174
18 The Linear Equalization Problem	177
18.1 The Linear Equalization Problem and Its Solution	177
18.2 The Orthogonal Projection	178
18.3 Solution of an Over-Determined Linear System of Equations	179

18.4	The Method of Least Squares.....	181
18.5	Exercises	185
19	The QR-Decomposition of a Matrix	189
19.1	Full and Reduced Q R -Decomposition	189
19.2	Construction of the Q R -Decomposition.....	190
19.3	Applications of the Q R -Decomposition	196
19.4	Exercises	198
20	Sequences	201
20.1	Terms	201
20.2	Convergence and Divergence of Sequences.....	204
20.3	Exercises	208
21	Calculation of Limits of Sequences	209
21.1	Determining Limits of Explicit Sequences.....	209
21.2	Determining Limits of Recursive Sequences	212
21.3	Exercises	215
22	Series	217
22.1	Definition and Examples	217
22.2	Convergence Criteria	220
22.3	Exercises	225
23	Mappings	227
23.1	Terms and Examples	227
23.2	Composition, Injective, Surjective, Bijective	229
23.3	The Inverse Mapping.....	234
23.4	Bounded and Monotone Functions	237
23.5	Exercises	238
24	Power Series.....	241
24.1	The Domain of Convergence of Real Power Series	241
24.2	The Domain of Convergence of Complex Power Series	246
24.3	The Exponential and the Logarithmic Function	248
24.4	The Hyperbolic Functions	250
24.5	Exercises	252
25	Limits and Continuity.....	255
25.1	Limits of Functions	255
25.2	Asymptotes of Functions	259
25.3	Continuity	261

25.4	Important Theorems about Continuous Functions	262
25.5	The Bisection Method.....	263
25.6	Exercises	265
26	Differentiation	269
26.1	The Derivative and the Derivative Function	269
26.2	Derivation Rules	272
26.3	Numerical Differentiation	277
26.4	Exercises	278
27	Applications of Differential Calculus I	281
27.1	Monotonicity	281
27.2	Local and Global Extrema	282
27.3	Determination of Extrema and Extremal Points	285
27.4	Convexity	289
27.5	The Rule of L'Hospital	291
27.6	Exercises	293
28	Applications of Differential Calculus II	295
28.1	The Newton Method	295
28.2	Taylor Expansion	299
28.3	Remainder Estimates	302
28.4	Determination of Taylor Series	306
28.5	Exercises	309
29	Polynomial and Spline Interpolation	311
29.1	Polynomial Interpolation.....	311
29.2	Construction of Cubic Splines	315
29.3	Exercises	319
30	Integration I	321
30.1	The Definite Integral	321
30.2	The Indefinite Integral	326
30.3	Exercises	333
31	Integration II	335
31.1	Integration of Rational Functions.....	335
31.2	Rational Functions in Sine and Cosine	338
31.3	Numerical Integration	341
31.4	Volumes and Surfaces of Solids of Revolution	343
31.5	Exercises	345

32	Improper Integrals	347
32.1	Calculation of Improper Integrals	347
32.2	The Comparison Test for Improper Integrals	350
32.3	Exercises	352
33	Separable and Linear Differential Equations of First Order	355
33.1	First Differential Equations	355
33.2	Separable Differential Equations	357
33.3	The Linear Differential Equation of First Order	361
33.4	Exercises	364
34	Linear Differential Equations with Constant Coefficients	367
34.1	Homogeneous Linear Differential Equations with Constant Coefficients	367
34.2	Inhomogeneous Linear Differential Equations with Constant Coefficients	372
34.3	Exercises	379
35	Some Special Types of Differential Equations	381
35.1	The Homogeneous Differential Equation	381
35.2	The Euler Differential Equation	383
35.3	Bernoulli's Differential Equation	385
35.4	The Riccati Differential Equation	387
35.5	The Power Series Approach	389
35.6	Exercises	392
36	Numerics of Ordinary Differential Equations I	395
36.1	First Procedure	395
36.2	Runge-Kutta Method	399
36.3	Multistep Methods	402
36.4	Exercises	405
37	Linear Mappings and Transformation Matrices	407
37.1	Definitions and Examples	407
37.2	Image, Kernel and the Dimensional Formula	410
37.3	Coordinate Vectors	412
37.4	Transformation Matrices	413
37.5	Exercises	416
38	Base Transformation	419
38.1	The Transformation Matrix of the Composition of Linear Mappings	419
38.2	Base Transformation	420

38.3	The Two Methods for Determining Transformation Matrices	422
38.4	Exercises	425
39	Diagonalization: Eigenvalues and Eigenvectors	429
39.1	Eigenvalues and Eigenvectors of Matrices	429
39.2	Diagonalizing Matrices	431
39.3	The Characteristic Polynomial of a Matrix	433
39.4	Diagonalization of Real Symmetric Matrices	439
39.5	Exercises	441
40	Numerical Calculation of Eigenvalues and Eigenvectors	445
40.1	Gerschgorin Circles	445
40.2	Vector Iteration	447
40.3	The Jacobian Method	449
40.4	The Q R -Method	453
40.5	Exercises	456
41	Quadrics	457
41.1	Terms and First Examples	457
41.2	Transformation to Normal Form	461
41.3	Exercises	466
42	Schur Decomposition and Singular Value Decomposition	469
42.1	The Schur Decomposition	469
42.2	Calculation of the Schur Decomposition	470
42.3	Singular Value Decomposition	474
42.4	Determination of the Singular Value Decomposition	475
42.5	Exercises	479
43	The Jordan Normal Form I	481
43.1	Existence of the Jordan Normal Form	481
43.2	Generalized Eigenspaces	484
43.3	Exercises	489
44	The Jordan Normal Form II	491
44.1	Construction of a Jordan Base	491
44.2	Number and Size of Jordan Boxes	499
44.3	Exercises	500
45	Definiteness and Matrix Norms	503
45.1	Definiteness of Matrices	503
45.2	Matrix Norms	507
45.3	Exercises	513

46	Functions of Several Variables	515
46.1	The Functions and Their Representations	515
46.2	Some Topological Terms	519
46.3	Consequences, Limits, Continuity	522
46.4	Exercises	525
47	Partial Differentiation: Gradient, Hessian Matrix, Jacobian Matrix	527
47.1	The Gradient	527
47.2	The Hessian Matrix	533
47.3	The Jacobian Matrix	535
47.4	Exercises	538
48	Applications of Partial Derivatives	541
48.1	The (Multidimensional) Newton Method	541
48.2	Taylor Development	544
48.3	Exercises	551
49	Extreme Value Determination	553
49.1	Local and Global Extrema	553
49.2	Determination of Extrema and Extremal Points	556
49.3	Exercises	563
50	Extreme Value Determination Under Constraints	565
50.1	Extrema Under Constraints	565
50.2	The Substitution Method	567
50.3	The Method of Lagrange Multipliers	569
50.4	Extrema Under Multiple Constraints	574
50.5	Exercise	576
51	Total Differentiation, Differential Operators	579
51.1	Total Differentiability	579
51.2	The Total Differential	581
51.3	Differential Operators	583
51.4	Exercises	587
52	Implicit Functions	591
52.1	Implicit Functions: The Simple Case	591
52.2	Implicit Functions: The General Case	596
52.3	Exercises	599

53	Coordinate Transformations	603
53.1	Transformations and Transformation Matrices	603
53.2	Polar, Cylindrical and Spherical Coordinates	604
53.3	The Differential Operators in Cartesian Cylindrical and Spherical Coordinates	606
53.4	Conversion of Vector Fields and Scalar Fields	610
53.5	Exercises	613
54	Curves I	615
54.1	Terms	615
54.2	Length of a Curve	622
54.3	Exercises	625
55	Curves II	627
55.1	Reparameterization of a Curve	627
55.2	Frenet–Serret Frame, Curvature and Torsion	630
55.3	The Leibniz Sector Formula	633
55.4	Exercises	634
56	Line Integrals	637
56.1	Scalar and Vector Line Integrals	637
56.2	Applications of the Line Integrals	642
56.3	Exercises	644
57	Gradient Fields	645
57.1	Definitions	645
57.2	Existence of a Primitive Function	647
57.3	Determination of a Primitive Function	650
57.4	Exercises	652
58	Multiple Integrals	655
58.1	Integration Over Rectangles or Cuboids	655
58.2	Normal Domains	658
58.3	Integration Over Normal Domains	659
58.4	Exercises	663
59	Substitution for Multiple Variables	665
59.1	Integration via Polar, Cylindrical, Spherical and Other Coordinates	665
59.2	Application: Mass and Center of Gravity	670
59.3	Exercises	671

60 Surfaces and Surface Integrals	675
60.1 Regular Surfaces	675
60.2 Surface Integrals	678
60.3 Overview of the Integrals	682
60.4 Exercises	682
61 Integral Theorems I	685
61.1 Green's Theorem	685
61.2 The Plane Theorem of Gauss	688
61.3 Exercises	691
62 Integral Theorems II	693
62.1 The Divergence Theorem of Gauss	693
62.2 Stokes' Theorem	697
62.3 Exercises	701
63 General Information on Differential Equations	705
63.1 The Directional Field	705
63.2 Existence and Uniqueness of Solutions	706
63.3 Transformation to 1st Order Systems	708
63.4 Exercises	711
64 The Exact Differential Equation	713
64.1 Definition of Exact ODEs	713
64.2 The Solution Procedure	714
64.3 Exercises	718
65 Linear Differential Equation Systems I	721
65.1 The Exponential Function for Matrices	721
65.2 The Exponential Function as a Solution of Linear ODE Systems	725
65.3 The Solution for a Diagonalizable A	726
65.4 Exercises	730
66 Linear Differential Equation Systems II	731
66.1 The Exponential Function as a Solution of Linear ODE Systems	731
66.2 The Solution for a Non-Diagonalizable A	735
66.3 Exercises	736
67 Linear Differential Equation Systems III	739
67.1 Solving ODE Systems	739
67.2 Stability	743
67.3 Exercises	749

68	Boundary Value Problems	751
68.1	Types of Boundary Value Problems	751
68.2	First Solution Methods	752
68.3	Linear Boundary Value Problems	753
68.4	The Method with Green's Function	756
68.5	Exercises	759
69	Basic Concepts of Numerics	761
69.1	Condition	761
69.2	The Big O Notation	764
69.3	Stability	765
69.4	Exercises	767
70	Fixed Point Iteration	769
70.1	The Fixed Point Equation	769
70.2	The Convergence of Iteration Methods	771
70.3	Implementation	775
70.4	Rate of Convergence	775
70.5	Exercises	776
71	Iterative Methods for Systems of Linear Equations	779
71.1	Solving Systems of Equations by Fixed Point Iteration	779
71.2	The Jacobian Method	780
71.3	The Gauss-Seidel Method	782
71.4	Relaxation	784
71.5	Exercises	786
72	Optimization	787
72.1	The Optimum	787
72.2	The Gradient Method	788
72.3	Newton's Method	789
72.4	Exercises	791
73	Numerics of Ordinary Differential Equations II	793
73.1	Solution Methods for ODE Systems	793
73.2	Consistency and Convergence of One-Step Methods	795
73.3	Stiff Differential Equations	799
73.4	Boundary Value Problems	802
73.5	Exercises	810

74	Fourier Series: Calculation of Fourier Coefficients	813
74.1	Periodic Functions	813
74.2	The Admissible Functions	816
74.3	Expanding in Fourier Series—Real Version	817
74.4	Application: Calculation of Series Values	821
74.5	Expanding in Fourier Series: Complex Version	822
