

Contents

1	The Structure of This Book: An Introduction	1
2	The Importance of Methodological Knowledge for Understanding Empirical Data	5
2.1	On the Need to Reflect on Research Methods	6
2.1.1	First Example: The Evaluation of the CDU	6
2.1.2	Second Example: Television Viewing Time	6
2.1.3	Third Example: The Ladders	8
2.1.4	Fourth Example: Prohibited and Not Allowed.	9
2.2	Some Basic Concepts.	12
2.2.1	Empirical Social Research	12
2.2.2	Methods	12
2.2.3	Techniques	13
2.2.4	Methodology	13
2.2.5	Theory	14
2.2.6	Empiricism.	14
2.2.7	Qualitative and Quantitative Data	15
2.2.8	Variable	15
3	Philosophy of Science	17
3.1	The Concern of the Philosophy of Science	17
3.2	Problems and Their Formulation	20
3.2.1	Problems as Conflicts Between Goals and Means.	20
3.2.2	Types of Problems	22
3.3	Terms and Their Definitions	25
3.3.1	Nominal Definitions.	27
3.3.2	Real Definitions	29
3.3.3	Operational Definitions	30
3.4	Hypotheses and Their Treatment	30
3.4.1	If-Then Hypotheses	37
3.4.2	Je-desto Hypotheses.	39

3.4.3	Deterministic (or Nomological) and Probabilistic Hypotheses	39
3.4.4	Individual, Collective and Contextual Hypotheses	40
3.4.5	Differentiation of Hypotheses According to Their Stage of Development	41
3.5	Operationalisation	41
3.6	Theories and Laws	46
3.6.1	Theories with Different Scope	47
3.6.2	Nomological and Probabilistic Laws	48
3.6.3	The Role of Theories and Laws in Explanations	48
3.6.4	Presentation of Theories	50
3.7	The Value Judgement Problem.	50
3.8	Qualitative and Quantitative Research Approaches	55
4	Research and Investigation Planning	63
4.1	Phases of an Empirical Project	64
4.2	The Example of the Dresden Self-Defence Study 2001/2002	71
4.3	Measurement and Index Formation	74
4.3.1	Problem Definition.	74
4.3.2	The Principles of Measurement	75
4.3.3	The Formation of the Index	78
4.4	Scales and Scaling Methods.	83
4.4.1	The Different Measurement (Scale) Levels	83
4.4.2	Scaling Procedure	87
4.5	The Quality Criteria of Objectivity, Reliability and Validity	94
4.5.1	Objectivity	94
4.5.2	Reliability.	95
4.5.3	Validity.	99
4.6	Cross-Sectional and Longitudinal Studies	101
4.7	Non-Reactive Approaches	110
4.7.1	Non-Reactive Field Experiments.	111
4.7.2	Behavioural Traces.	113
4.7.3	Use of Process-Produced Data.	114
4.8	Secondary Analyses of Data Sets.	115
4.9	Data Protection, Anonymity and Confidentiality.	118
5	Sampling Procedure	125
5.1	Basic Concepts and Classification	125
5.1.1	Sample Size	131
5.1.2	Confidence Interval	132
5.2	Random Sampling in Survey Practice	135
5.2.1	The ADM Design.	135
5.2.2	Register Sampling: The Sample of Population Registers	142
5.2.3	Telephone Sampling.	143

5.3	Sampling for Intercultural Studies	147
5.4	Sampling for Access Panels and Internet Surveys	150
5.4.1	Selections for Access Panels	150
5.4.2	Sampling for Intra- and Internet Surveys.	152
5.5	Lump Sampling: The Example of the PISA Studies	153
5.6	Quota Selection	155
5.7	Sampling for Special Populations and for Qualitative Studies	158
5.8	The Non-Response Problem and the Possibilities of Weightings	161
5.8.1	Nonresponse.	161
5.8.2	The Weighting of Samples.	165
6	Survey Methods	173
6.1	Surveys.	173
6.1.1	Classification Options	173
6.1.2	Theories of Interviewing	179
6.1.3	Forms of Questioning and Their Specific Features	192
6.1.4	Examples of Survey Studies	271
6.2	Social Science Observations	278
6.2.1	Basic Problems of Scientific Observations	278
6.2.2	Forms of Observation.	282
6.2.3	Observation Errors.	284
6.2.4	The Development of the Observation Design	288
6.2.5	The Social Prestige of a Residential Area: Example of a Standardised, Non-Participatory External Observation in the Field	289
6.3	Content Analyses	297
6.3.1	Examples of Content Analysis.	298
6.3.2	Specifics of Social Science Content Analyses	300
6.3.3	Classification Possibilities of Content Analyses	300
6.3.4	Advantages and Limitations	303
6.3.5	Survey Research in the Mirror of the Press, an Example of Content Analysis	304
6.3.6	Special Forms of Content Analysis	306
7	Complex Designs	313
7.1	Social Experiments	313
7.1.1	Nature and History of Social Experiments	313
7.1.2	Types of Experiments and Their Sources of Error.	315
7.1.3	The GfK BehaviorScan: An Example of a Social Science Experiment from Market Research	322
7.2	Case Studies.	323
7.3	Delphi Surveys.	326

7.3.1	Concerns of the Delphi Approach	326
7.3.2	The Future of the Dresden Frauenkirche, Example of a Delphi Survey	330
7.4	Evaluation Studies	333
7.4.1	The Concern of Evaluation Studies	333
7.4.2	The Approach to Evaluation Studies	336
7.4.3	Types of Evaluation Studies	338
7.4.4	Evaluation of the Three Strikes Law in the USA, an Example	339
7.5	Intercultural Studies: The Example of the European Social Survey	340
7.5.1	Organisational Structure	341
7.5.2	Translation	342
7.5.3	Sampling Strategy	344
7.5.4	Intercultural Fieldwork, Organisation and Control	345
7.6	Time Budget Studies	346
7.6.1	Methodological Concepts for Time Use Studies	346
7.6.2	Time Concepts	349
7.6.3	Examples of Results of Time Use Studies	350
7.6.4	Design of a Time Use Survey	352
8	Pretests	359
8.1	Overview of the Procedures	360
8.2	Pretesting in the Field	361
8.2.1	Standard Pretest/Observation Pretest	361
8.2.2	Behaviour Coding	362
8.2.3	Problem Coding	363
8.2.4	Random Sample	364
8.2.5	Intensive Interview	364
8.2.6	Qualitative Interviews	364
8.2.7	Analysis of Response Distributions	365
8.2.8	Split-Ballot Technique	365
8.3	Cognitive Procedures	366
8.3.1	Think Aloud Method	366
8.3.2	Probing/Demand Technique	366
8.3.3	Paraphrasing	368
8.3.4	Sorting	368
8.3.5	Response Latency	369
8.4	Expert Evaluations	369
8.5	The Pretest Design of the Dresden Self-Defence Survey 2001	370
8.5.1	Issues to Be Addressed in the Pre-Test	370
8.5.2	The Pretest Design	371

8.5.3	Implementation	372
8.5.4	Results	373
8.5.5	The Pretest at the Survey Institute	374
9	Preparation and Evaluation of the Data	375
9.1	Preparation of Data and Troubleshooting	375
9.1.1	Preparation of Qualitative Data	375
9.1.2	Preparation of Quantitative Data	376
9.2	Basic Principles of Statistical Analysis	383
9.2.1	Descriptive Evaluations	384
9.2.2	Inferential Statistical Analyses.	394
9.2.3	The CHAID Analysis.	398
9.3	Multivariate Methods for Data Analysis	403
9.3.1	Factor Analysis.	403
9.3.2	Cluster Analyses.	404
9.3.3	Regression Analyses	405
9.4	The Use of Facet Theory for Data Evaluation	405
9.4.1	Basic Principles	405
9.4.2	Search for Causes of Mispertitioning	408
9.5	Qualitative Analyses	412
9.5.1	Photography and Film Analysis.	413
9.5.2	Body Language Analysis	415
10	Documentation of Empirical Projects	417
10.1	The Quality Criteria of Survey Research and the Handling of Empirical Data.	417
10.2	Method Reports	424
	References	427
	Name Index	457
	Subject Index.	465
