Summary.....	I
Extended Abstract.....	III
1 Introduction and Aim of this Thesis.....	1
2 Theoretical Background	3
2.1 Important Thermo-Physical Properties of ESR Slags and their Process Effects	5
2.1.1 Density	5
2.1.2 Surface and Interfacial Tension	5
2.1.3 Viscosity.....	6
2.1.4 Electrical Conductivity	7
2.1.5 Correlation of Viscosity and Electrical Conductivity.....	9
2.2 Basics of Electrical Conduction	10
2.2.1 Ionic and Electron Conduction.....	11
2.2.2 Electrical Conductivity in Dependence to Slag Composition and Basicity	13
2.2.3 Correlation of Electrical Conductivity with Temperature	14
2.3 The Art of Current: Direct and Alternating Current.....	15
2.3.1 Direct Current	15
2.3.2 Alternating Current.....	17
2.4 Electro-Chemical Cells: The Fundamental System for Electrical Conduction	24
2.4.1 Interfacial Effects	25
2.4.2 Simulation of Electrochemical Cells	29
2.5 Analysis of Electrochemical Systems through Electrochemical Impedance Spectroscopy	29
2.5.1 Measurement Methods.....	29
2.5.2 Plotting the Impedance.....	32
2.5.3 Interpretation of Impedance Plots	33
3 State of the Art: Review of Available Measurement Techniques and Methods ...	37
3.1 Cell Designs and Measurement Techniques	39

3.2	Critical Discussion of Measurement Techniques, Methods and the achieved Results	41
4	Research Needs and hypothesis of this work	48
5	The Measurement Technology	50
5.1	The Furnace and the Auxiliary Equipment	50
5.1.1	The Linn-Furnace:	50
5.1.2	Vacuum pump station:	51
5.1.3	Inert gas control unit:	52
5.1.4	Instrument rack:	52
5.2	The Measuring Technique: Cell Design, Setup and Application	53
5.2.1	Material Selection	54
5.2.2	Cell Geometry and Design	57
5.2.3	The Application Technique of the Cell	63
5.3	Measuring Method: Data Capturing and Processing	67
5.3.1	Cables and Fixture	67
5.3.2	Newtons4th LCR Measurement	68
5.3.3	Data Plotting and Analysis with ZView™	70
5.3.4	Data Evaluation	71
6	Optimization of the Measuring Accuracy	75
6.1	Influencing Factors on Measurement Accuracy	75
6.2	The Cell Design (Technique)	75
6.2.1	Number of Electrodes	75
6.2.2	Position of Electrodes	78
6.2.3	Validation of Calculated Cell Factor (C_f)	79
6.3	The Measuring Setup (Technique)	80
6.3.1	Temperature Profile of Furnace and Crucible	80
6.3.2	Crucible Insolation	83
6.3.3	Temperature Measurement	84
6.3.4	Cable Connection to the Electrodes	85
6.4	Combining Technique with Method	86
6.4.1	Cell Immersion and Immersion Increment	86
6.4.2	Influence of Immersion on the Cell Factor	87

Contents

6.4.3	Voltage	87
6.4.4	Frequency Spectrum and Sweep	88
6.5	Electrode Surface Quality and Electrode Surface Cleaning	90
6.6	Data Evaluation (Method)	90
6.6.1	Equivalent Circuit	90
6.6.2	Number of Measurement Points	92
7	Measuring Accuracy Tests – Results and Discussion	94
7.1	Aqueous Solutions	94
7.2	Molten KCl	97
7.3	Molten CaF ₂	99
7.4	Critical Discussion of the Achieved Results and Errors	102
7.4.1	Errors through immersion	104
7.4.2	Errors by measurement equipment	105
7.4.3	Fitting Errors	105
7.4.4	Errors due to electrode setup	106
7.4.5	Overall Error	106
8	Limitations of the Measurement Technology	107
8.1	Bottom and Surface Distance	107
8.2	Crucible Effects	109
8.3	Breakdown of Equipotentiality	109
8.4	Equipment Limitations	110
8.5	Immersion Depth and Immersion Increments (precision)	111
9	Conclusion and Future Perspective	115
10	References	117
11	List of Figures	125
12	List of Tables	129
13	Abbreviations and Symbols used in this Thesis	130
14	Appendix	132
14.1	Appendix A: Physical Properties of W and Mo	132
14.2	Appendix B: Mathematical Derivation of Cell Factor	133
14.3	Appendix C: Cable Specification and Data Sheet	134
14.4	Appendix D: Measurement Shunt Options and Related Error	135

14.5	Appendix E: Error due to the Included Resistance caused by the Two Electrode Setup.....	136
14.6	Appendix F: Calculation of Internal Cell Resistance	137
14.7	Appendix G: Influences of the Skin Effect.....	139
14.8	Appendix H: Certipur® Certificates.....	141
14.9	Appendix I: Measurement Results	147
14.9.1	KCL.....	147
14.9.2	CaF ₂	154
14.10	Appendix J: Drawings	162
14.11	Appendix K: Example of logarithmic illustration of temperature dependence of the electrical conductivities of melts.....	165
