

Contents

List of contributing authors — VII

Christof Schröfl

1 Chemical design and synthesis of superabsorbent polymers — 1

- 1.1 Thermodynamics and kinetics of liquid absorption by superabsorbent polymers — 1
- 1.2 Polymer synthesis of petrochemical-derived SAPs — 2
- 1.3 Biobased superabsorbers — 17
- 1.4 Summary and conclusion — 26
- References — 26

Andrada Serafim, Filis Curti, Elena Olăret, Carmen Nicolae, Izabela-Cristina Stancu

2 Superabsorbent polymers for nanomaterials — 35

- 2.1 Introduction to superabsorbent polymers for nanomaterials — 35
- 2.2 Building nanomaterials with SAP matrix — 37
- 2.3 Conclusions and perspectives — 66
- References — 66

María Fernanda Baieli, Nicolás Urtasun

3 Biomedical applications of hydrogels in the form of nano- and microparticles — 75

- 3.1 Introduction — 75
- 3.2 Formatting hydrogels into particles — 78
- 3.3 Biomedical applications using nano- and micro-particles — 81
- 3.4 Future remarks — 96
- References — 96

Emilie Prouvé, Gaétan Laroche, Marie-Christine Durrieu

4 Hydrogels for mesenchymal stem cell behavior study — 103

- 4.1 Introduction — 103
- 4.2 Impact of hydrogel properties on mesenchymal stem cell fate — 105
- 4.3 Conclusions — 134
- References — 135

Didier Snoeck

5 Superabsorbent polymers as a solution for various problems in construction engineering — 143

- 5.1 Introduction — 143
- 5.2 Changing the rheology by absorbing mixing water — 144

5.3	Shrinkage mitigation by internal curing —	145
5.4	Changing the microstructure to increase the freeze–thaw resistance by the formation of an internal void system —	149
5.5	Regaining the water impermeability through self-sealing of cracks —	151
5.6	Regaining the mechanical properties due to promoted autogenous healing —	153
5.7	Practical applications of SAPs in the construction industry —	159
5.8	Conclusions —	159
	References —	161
