

Inhaltsverzeichnis

Options for Energy Transition of the Transport Sector	1
Karsten Wilbrand and Andreas Kolbeck	
Solutions for CO₂-Free Powertrains for Mobile Machinery	8
Markus Schwaderlapp, Heiner Bülte, and Andreas Plumpe	
Development of the WinGD 12X92DF, the Most Powerful Otto-Cycle Engine Ever Built	18
Patrik Printz, Sotiris Topaloglou, Carmelo Cartalemi, Stefan Goranov, Konrad Räss, Samuel Sönnichsen, Aris Richli, Samuel Affolter, and Gerhard Hangl	
MAN 35/44G TS – Frequency Restoration Reserve and Hydrogen Applications	36
Steffen Gau, Georg Tinschmann, David Woike, Dominik Winkler, Sebastian Rösler, and Mathias Moser	
Analysis and Optimisation of the Combustion Process on a Medium-Speed Dual-Fuel Single-Cylinder Research Engine Using Highly Fluctuating Fuel Gas Qualities	58
Karsten Schleef, Björn Henke, Sebastian Cepelak, Bert Buchholz, and Martin Theile	
Comprehensive Analysis of eFuel Combustion in Large Diesel Engines	73
Benjamin Stengel, Erwin Swiderski, Fabian Pinkert, Martin Reißig, and Bert Buchholz	
Hydrogen Large Bore Engine Technology – More than a Bridging Technology	86
Harald Schlick, Shinsuke Murakami, Thomas Kammerdiener, Maria Segura Carrasco, and Günter Figer	

Hydrogen Combustion Engine – A Suitable Concept for Decarbonisation in Offroad Sector	100
Bouzid Seba and Ulrich Weiss	
From Concept to Series: Advanced Development Process for Euro VII Engines	118
Dávid Kovács, Reza Rezaei, Marian Mennig, Thaddaeus Delebinski, and Jörn Seebode	
The New Off Highway Engine Family Delivering Improvements in Performance, Emissions and Operating Cost	134
Thomas Langley, David Bennet, Jon Skilton, Ray Sullivan, Fan Zhang, Shang Tansu, Wei Mingliang, Li Zhenyong, and Wang Bin	
Meeting Future NO_x Emissions Limits with Improved Total Fuel Efficiency	148
Thomas M. Harris, James McCharthy, Chris Sharp, Bryan Zavala, and Andrew Matheaus	
CatVap® – the Efficient Heating Technology for Future Exhaust Aftertreatment Systems	167
Robert Szolak, Bernd Danckert, Paul Beutel, Florian Rümmele, Alexander Susdorf, Anand Kakadiya, Katharina Pautsch, Hammad Khalid, and Achim Schaad	
Engine Component Development for H₂ Combustion Engines	177
Hannes Marlok, Christian Trabold, and Alexander Puck	
Cooling Systems for Future Powertrains	188
Rainer Lutz, Matthias Jung, and Laurent Art	
MAN Smart Hybrid Experience: Characterization and System Behavior	202
Thomas Eichinger, Georg Silberhorn, and Sebastian Hofmann	
Fuel Cell System Integration for Heavy-Duty Applications	219
Eike Weiss, Stephan Schnorpfel, and Dario Nickel	
Modularization of Fuel Cell Systems for CV-Applications	230
Dennis Backofen, Dennis Jünemann, Hubertus Ulmer, Friedtjof Häckermann, Thaddaeus Delebinski, and Ralf Wascheck	
Autorenverzeichnis	253
