

## Contents

**Preface** *xiii*

**Author Biography** *xv*

<b>1</b>	<b>Introduction to Simultaneous Mass Transfer and Chemical Reactions in Engineering Science</b>	<b>1</b>
1.1	Gas-Liquid Reactions	1
1.1.1	Simultaneous Biomolecular Reactions and Mass Transfer	2
1.1.1.1	The Biomedical Environment	2
1.1.1.2	The Industrial Chemistry and Chemical Engineering Environment	3
1.1.2	Conclusions	6
1.1.3	Summary	6
1.2	The Modeling of Gas-Liquid Reactions	7
1.2.1	Film Theory of Mass Transfer	7
1.2.2	Surface Renewal Theory of Mass Transfer	9
1.2.3	Absorption into a Quiescent Liquid	11
1.2.3.1	Absorption Accompanied by Chemical Reactions	13
1.2.3.2	Irreversible Reactions	13
1.2.4	Absorption into Agitated Liquids	17
1.2.4.1	An Example of a First-Order Reaction	19
1.2.4.2	The Film Model	20
1.3	The Mathematical Theory of Simultaneous Mass Transfer and Chemical Reactions	20
1.3.1	Physical Absorption	21
1.3.2	Chemical Absorption	21
1.3.2.1	Preliminary Remarks on Simultaneous Mass Transfer (Absorption) with Chemical Reactions	21
1.3.2.2	Some Solutions to the Mathematical Models of the Theory of Simultaneous Mass Transfer and Chemical Reactions	22
1.3.2.3	Approximate Closed Form Solutions	23
1.3.3	Numerical Solutions	29
1.4	Diffusive Models of Environmental Transport	30
	Further Reading	30

<b>2</b>	<b>Data Analysis Using R Programming</b>	<b>31</b>
2.1	Data and Data Processing	32
2.1.1	Introduction	32
2.1.2	Data Coding	33
2.1.2.1	Automated Coding Systems	34
2.1.3	Data Capture	34
2.1.4	Data Editing	35
2.1.5	Imputations	35
2.1.6	Data Quality	36
2.1.7	Quality Assurance	36
2.1.8	Quality Control	36
2.1.9	Quality Management in Statistical Agencies	36
2.1.10	Producing Results	37
2.2	Beginning R	38
2.2.1	R and Statistics	38
2.2.2	A First Session Using R	40
2.2.3	The R Environment (This is Important!)	52
2.3	R as a Calculator	54
2.3.1	Mathematical Operations Using R	54
2.3.2	Assignment of Values in R, and Computations Using Vectors and Matrices	56
2.3.3	Computations in Vectors and Simple Graphics	57
2.3.4	Use of Factors in R Programming	57
2.3.4.1	Body Mass Index	59
2.3.5	Simple Graphics	59
2.3.6	x as Vectors and Matrices in Statistics	62
2.3.7	Some Special Functions that Create Vectors	64
2.3.8	Arrays and Matrices	65
2.3.9	Use of the Dimension Function <code>dim()</code> in R	65
2.3.10	Use of the Matrix Function <code>matrix()</code> in R	66
2.3.11	Some Useful Functions Operating on Matrices in R: <code>colnames</code> , <code>rownames</code> , and <code>t</code> (for transpose)	66
2.3.12	NA “Not Available” for Missing Values in Datasets	67
2.3.13	Special Functions that Create Vectors	68
2.4	Using R in Data Analysis in Human Genetic Epidemiology	73
2.4.1	Entering Data at the R Command Prompt	73
2.4.1.1	Creating a Data-Frame for R Computation Using the EXCEL Spreadsheet (on a Windows Platform)	73
2.4.1.2	Obtaining a Data Frame from a Text File	75
2.4.1.3	Data Entry and Analysis Using the Function <code>data.entry()</code>	77
2.4.1.4	Data Entry Using Several Available R Functions	77
2.4.1.5	Data Entry and Analysis Using the Function <code>scan()</code>	79
2.4.1.6	Data Entry and Analysis Using the Function <code>Source()</code>	81
2.4.1.7	Data Entry and Analysis Using the Spreadsheet Interface in R	82

2.4.1.8	Human Genetic Epidemiology Using R: The CRAN Package Genetics	83
2.4.2	The Function <code>list()</code> and the Construction of <code>data.frame()</code> in R	84
2.4.3	Stock Market Risk Analysis	87
2.4.3.1	Univariate, Bivariate, and Multivariate Data Analysis	87
2.A	Appendix. Documentation for the Plot Function	109
2.A.1	Description	109
2.A.2	Usage	109
2.A.3	Arguments	109
2.A.4	Details	109
2.A.5	See Also	110
	Further Reading	110
<b>3</b>	<b>A Theory of Simultaneous Mass Transfer and Chemical Reactions with Numerical Solutions</b>	<b>111</b>
3.1	Introduction	111
3.1.1	A Classical Experimental Study of Simultaneous Absorption of Carbon Dioxide and Ammonia in Water	111
3.1.2	Physical Absorption	112
3.1.2.1	Results	113
3.2	Biomolecular Reactions	114
3.2.1	Occurrences of Simultaneous Biomolecular Reactions and Mass Transfer Are Common in Many Biomedical Environments	114
3.3	Some Examples in Chemical Engineering Sciences	115
3.3.1	Simultaneous Chemical Reactions and Mass Transfer	115
3.4	Some Models in the Diffusional Operations of Environmental Transport <i>Unaccompanied</i> by Chemical Reactions	116
3.4.1	Diffusion Models of Environmental Transport	116
3.4.2	Advection–Diffusion Models of Environmental Transport	116
3.5	The Concept of Diffusion	116
3.5.1	Publishers' Remarks	116
3.5.2	Fick's Laws of Diffusion	117
3.5.2.1	Fick's First Law of Diffusion (Steady-State Law)	117
3.5.2.2	Fick's Second Law of Diffusion	119
3.5.3	Derivation of Fick's Laws of Diffusion	120
3.5.3.1	Remarks: Additional Remarks on Fick's Laws of Diffusion	120
3.5.3.2	Example Solution in One Dimension: Diffusion Length	122
3.6	The Concept of the Mass Transfer Coefficient	122
3.7	Theoretical Models of Mass Transfer	123
3.7.1	Nernst <i>One-Film</i> Theory Model and the Lewis–Whitman <i>Two-Film</i> Model	123
3.7.1.1	Gas Transfer Rates	123
3.7.1.2	The Nernst One-Film Model	123
3.7.1.3	Mass Transfer Coefficients	123
3.7.1.4	The Lewis–Whitman Two-Film Model	124

3.7.1.5	The Two-Film Model	124
3.7.1.6	Single-Film Control	126
3.7.1.7	Applications	126
3.7.2	Higbie's Penetration Theory Model	127
3.7.3	Dankwerts' Surface Renewal Theory Model	129
3.7.4	Boundary Layer Theory Model	131
3.7.4.1	Fluid-Fluid Interfaces	131
3.7.4.2	Fluid-Solid Interfaces	131
3.7.4.3	Example: Prandtl's Experimental Mass Transfer from a Flat Plate	131
3.7.5	Mass Transfer Under Laminar Flow Conditions	132
3.7.6	Mass Transfer Past Solids Under Turbulent Flow	132
3.7.7	Some Interesting Special Conditions of Mass Transfer	132
3.7.7.1	Equimolar Counter-Diffusion of A and B ( $N_A = -N_B$ )	132
3.7.7.2	For Liquid-Phase Diffusion	133
3.7.7.3	Conversions Formulas for Mass Transfer Coefficients in Different Forms	134
3.7.8	Applications to Chemical Engineering Design	134
3.7.8.1	Designing a Packed Column for the Absorption of Gaseous $\text{CO}_2$ by a Liquid Solution of NaOH, Using the Mathematical Model of Simultaneous Gas Absorption with Chemical Reactions	134
3.7.8.2	Calculation of Packed Height Requirement for Reducing the Chlorine Concentration in a Chlorine-Air Mixture	141
3.8	Theory of Simultaneous Bimolecular Reactions and Mass Transfer in Two Dimensions	144
3.8.1	Numerical Solutions of a Model in Terms of Simultaneous Semi-linear Parabolic Differential Equations	144
3.8.1.1	Theory of Simultaneous Bimolecular Reactions and Mass Transfer in Two Dimensions	144
3.8.2	Existence and Uniqueness Theorems of First-Order Linear Ordinary Differential Equations	174
3.8.2.1	Differential Equations	174
3.8.2.2	Contraction Mappings on a Banach Space	174
3.8.2.3	Application to Differential Equations	177
3.8.3	An Existence Theorem of the Governing Simultaneous Semi-linear Parabolic Partial Differential Equations	183
3.8.4	A Uniqueness Theorem of the Governing Simultaneous Semi-linear Parabolic Partial Differential Equations	188
3.9	Theory of Simultaneous Bimolecular Reactions and Mass Transfer in Two Dimensions: Further Cases of Practical Interests	192
3.9.1	Case of Stagnant Film of Finite Thickness – Second-Order Irreversible Reactions	192
3.9.2	Case of Unsteady-State Absorption in the Stagnant Liquid – Slow First-Order Reaction (S&P 325, 328)	196
3.9.3	Simultaneous Absorption of Two Gases in a Liquid in Which Each Then Reacts With a <i>Third</i> Component in the Liquid	198

3.9.3.1	Mathematical Modeling	199
3.9.3.2	Analysis of the Model: $A + B \rightarrow$	201
3.9.3.3	Discussions	201
3.9.3.4	Further Theoretical Analysis	202
3.9.4	Simultaneous Absorption of Two Gases in a Liquid in Which Each Then Reacts with a <i>Third</i> Component in the Liquid	210
3.9.4.1	The Mathematical Model	210
3.9.4.2	Analysis of the Model	210
3.9.4.3	Boundary Conditions	212
3.9.4.4	Mass Transfer Coefficients	212
3.9.5	Cases of Slow First-Order Reactions	213
3.9.5.1	Case of Unsteady-State Absorption in the Stagnant Liquid	213
3.9.5.2	Case of Unsteady-State Absorption in the Stagnant Liquid – Slow First-Order Reactions	216
3.10	Further Theoretical Analysis	218
	Further Reading	219
<b>4</b>	<b>Numerical Worked Examples Using R for Simultaneous Mass Transfer and Chemical Reactions</b>	<b>221</b>
4.1	Advection and Convection	221
4.1.1	Advection	221
4.1.2	Advection vs. Convection	222
4.1.2.1	Meteorology	222
4.1.2.2	The Mathematics of Advection	222
4.1.2.3	The Advection Equation	223
4.1.2.4	The Advection Operator in the Incompressible Navier–Stokes Equations	224
4.2	Worked Examples	224
4.3	Partial Differential Equations	386
4.4	A Parabolic PDE	387
4.4.1	Steady-State Solution	388
4.4.2	The Method of Lines	389
	Further Reading	390
<b>5</b>	<b>More Numerical Worked Examples Using R for Simultaneous Mass Transfer and Chemical Reactions</b>	<b>391</b>
5.1	Introduction	391
5.2	Advection	391
5.2.1	Advection vs. Convection	392
5.2.1.1	Meteorology	392
5.2.1.2	The Mathematics of Advection	392
5.2.1.3	The Advection Equation	393
5.2.1.4	Solving the Advection Equation	393
5.2.1.5	The Advection Operator in the Incompressible Navier–Stokes Equations	394

5.3	Solving Partial Differential Equations Using the R Package ReacTran	395
5.3.1	Worked Examples	395
5.4	Some Final Remarks on Solving Partial Differential Equations Using the R Package ReacTran	555
5.4.1	Partial Differential Equations	555
5.4.2	A Parabolic PDE	557
5.4.2.1	Steady-State Solution	558
5.4.2.2	The Method of Lines	559
	Further Reading	560
<b>6</b>	<b>Solving Partial Differential Equations, Generally Applicable to Modeling Simultaneous Mass Transfer and Chemical Reactions, Using the R Package ReacTran</b>	<b>561</b>
6.1	Partial Differential Equations (PDE)	561
6.2	A Parabolic PDE	562
6.3	Steady-State Solution	563
6.3.1	The Method of Lines	565
6.3.2	A Hyperbolic PDE	566
6.4	The General 3D Advective–Diffusive Transport PDE	568
6.4.1	An Elliptic PDE	568
6.5	The General 3D Advective–Diffusive Transport PDE	577
6.5.1	The Advection Equation	577
6.5.2	Solving the Advection Equation	578
6.5.3	The Advection Operator in the Incompressible Navier–Stokes Equations	579
	Further Reading	641
