

Part I Basics

1 Anatomical Basics	3
Bernhard Widder and Gerhard F. Hamann	
1.1 Classification of Supraaortic Arteries	3
1.2 Aortic Arch Branches	3
1.3 Extracranial Course of the Carotid Arteries	4
1.4 Cervical Course of the Vertebral Artery	10
1.5 Intracranial Course of the Internal Carotid Artery	11
1.6 Vertebrobasilar Arteries	13
1.7 Intracerebral Arteries	14
1.8 Collateral Connections	16
1.9 Cerebrovascular Territories	19
References	20
2 Physiological Basics	21
Bernhard Widder and Gerhard F. Hamann	
2.1 Regulation of Arterial Blood Flow	21
2.2 Cerebral Blood Flow Characteristics	21
2.3 Arterial Flow	23
2.4 Flow Disturbance	25
2.5 Pulsatile Flow in Arteries	26
Reference	27
3 Basics of Ultrasound Technology	29
Bernhard Widder and Gerhard F. Hamann	
3.1 Basic Concepts of Diagnostic Ultrasound	29
3.2 Biological Ultrasound Parameters	31
3.3 Technical Parameters of Diagnostic Ultrasound	33
3.4 Contrast-Assisted Procedures	38
3.5 Safety Aspects of Ultrasound Diagnostics	39
References	40
4 Basics of Sonographic Flow Detection	41
Bernhard Widder and Gerhard F. Hamann	
4.1 Doppler Dependent Procedures	41
4.2 Doppler Independent Techniques	44
4.3 Diagnostically Relevant Flow Parameters	46
5 Flow Assessment Using the Doppler Spectrum	47
Bernhard Widder and Gerhard F. Hamann	
5.1 Methodology of Spectrum Analysis	47
5.2 Diagnostic Parameters of the Doppler Spectrum	47

5.3	Special Features of Pulsed Doppler Technology	54
	References	63
6	Flow Assessment Using Color Coding	65
	Bernhard Widder and Gerhard F. Hamann	
6.1	Technical Principles of Color Coded Imaging	65
6.2	Influencing Variables on Color Coded Flow Imaging	68
6.3	Basic Techniques of Color Coded Duplex Examination	71
 Part II Investigation Techniques		
7	Extracranial Doppler Sonography	77
	Bernhard Widder and Gerhard F. Hamann	
7.1	Indications	77
7.2	Technical Settings	78
7.3	Examination of the Periorbital Arteries	78
7.4	Examination of the Carotid Bifurcation	81
7.5	Examination of the Vertebral Artery	84
7.6	Examination of the Subclavian Artery	85
8	Extracranial Duplex Sonography	87
	Bernhard Widder and Gerhard F. Hamann	
8.1	Indications	87
8.2	Device Settings	87
8.3	Examination of the Carotid Bifurcation	91
8.4	Examination of the Vertebral Artery	96
8.5	Error Sources	100
9	Transcranial Doppler Sonography	105
	Bernhard Widder and Gerhard F. Hamann	
9.1	Indications	105
9.2	Device Settings	105
9.3	Examination Procedure	106
9.4	Diagnostic Criteria	109
	Reference	110
10	Transcranial Duplex Sonography	111
	Bernhard Widder and Gerhard F. Hamann	
10.1	Indications	111
10.2	Device Settings	111
10.3	B-mode Sonography of the Brain	114
10.4	Color Coded Examination	115
10.5	Diagnostic Criteria	120
10.6	Duplex Sonography of the Intracranial Veins	122
	References	123
11	Assessment of Intracranial Collateral Pathways	125
	Bernhard Widder and Gerhard F. Hamann	
11.1	Indications	125
11.2	Examination Procedure and Criteria	126
11.3	Findings in Different Collateral Pathways	128
	References	129

12 Cerebrovascular Reserve Capacity	131
Bernhard Widder and Gerhard F. Hamann	
12.1 Indications	131
12.2 Examination Procedure and Criteria	132
References	135

Part III Findings in Stenoses and Occlusions

13 Stenoses and Occlusions of the Extracranial Carotid Artery	139
Dirk Sander and Bernhard Widder	
13.1 Stenoses of the Internal Carotid Artery	139
13.2 Stenoses of the Internal Carotid Artery Close to the Skull Base	151
13.3 Occlusions of the Internal Carotid Artery	153
13.4 Stenoses and Occlusions of the External Carotid Artery	157
13.5 Stenoses and Occlusions of the Common Carotid Artery	158
References	160
14 Stenoses and Occlusions of the Main Cerebral Arteries	163
Bernhard Widder and Gerhard F. Hamann	
14.1 Special Features of Intracranial Vascular Diagnostics	163
14.2 Stenoses of the Intracranial Carotid Artery	164
14.3 Stenoses of the Middle Cerebral Artery	168
14.4 Occlusions of the Intracranial Internal Carotid Artery	171
14.5 Occlusions of the Middle Cerebral Artery	172
14.6 Stenoses and Occlusions of the Other Cerebral Base Arteries	174
References	175
15 Stenoses and Occlusions in the Vertebrobasilar System	177
Bernhard Widder and Gerhard F. Hamann	
15.1 Stenoses and Occlusions of the Subclavian Artery	177
15.2 Stenoses and Occlusions of the Brachiocephalic Trunk	180
15.3 Stenoses of the Vertebral and Basilar Artery	181
15.4 Occlusions of the Vertebral and Basilar Arteries	185
References	188

Part IV Findings in Special Questions

16 Arteriosclerotic Vascular Diseases	191
Dirk Sander	
16.1 Diffuse Arteriopathies	191
16.2 Circumscribed Arteriopathies	194
References	201
17 Inflammatory Vascular Diseases	203
Bernhard Widder and Gerhard F. Hamann	
17.1 Takayasu Arteritis	203
17.2 Cranial Arteritis	204
17.3 Primary Cerebral Vasculitis	207
17.4 Secondary Cerebral Vasculitis	207
References	212

18	Arterial Dissections	215
	Bernhard Widder and Gerhard F. Hamann	
18.1	Primary Extracranial Carotid Dissections	217
18.2	Primary Intracranial Carotid Dissections	218
18.3	Dissections of the Vertebral Artery	223
	References	228
19	Other Vascular Diseases	229
	Bernhard Widder and Gerhard F. Hamann	
19.1	Fibromuscular Dysplasia (FMD)	229
19.2	Moya Moya Disease	230
19.3	Aneurysms	235
19.4	Carotidodynia	237
19.5	Reversible Cerebral Vasoconstriction Syndrome	237
	References	237
20	Vascular Anomalies and Malformations	239
	Bernhard Widder and Gerhard F. Hamann	
20.1	Kinkings and Coilings	239
20.2	Hypoplasia of the Carotid Artery	240
20.3	Hypoplasia of the Vertebral Artery	242
20.4	Arteriovenous Malformations and Fistulas	247
	References	250
21	Ultrasound Diagnostics in Acute Stroke	253
	Bernhard Widder and Gerhard F. Hamann	
21.1	Emergency Diagnostics	254
21.2	Monitoring	257
21.3	Etiologic Assessment	259
	References	260
22	Cerebral Vasospasms	263
	Bernhard Widder and Gerhard F. Hamann	
22.1	Spontaneous Vasospasms	263
22.2	Vasospasms in Subarachnoid Hemorrhages	263
22.3	Vasospasms in Inflammatory Brain Diseases	267
	References	267
23	Diagnostics for Increased Cerebral Pressure and Cerebral Circulatory Arrest	269
	Georg Gahn and Bernhard Widder	
23.1	Assessment of Elevated Cerebral Pressure	269
23.2	Cerebral Circulatory Arrest	270
	References	275
24	Ultrasound in Revascularization Procedures	277
	Bernhard Widder and Gerhard F. Hamann	
24.1	Revascularizing Interventions of the Carotid Artery	277
24.2	Supraaortic Bypass Operations	283
24.3	Extra-intracranial Bypass Surgery	284
	References	286
25	Cardiac Right-Left Shunt	287
	Bernhard Widder and Gerhard F. Hamann	
25.1	Anatomy and Pathophysiology	287
25.2	Clinical Significance	287
25.3	Detection by Echocardiography	288

25.4	Detection by Transcranial Doppler sonography (PFO Test)	288
	References	291
26	Transorbital Sonography	293
	Max Nedelmann	
26.1	Examination Procedure	293
26.2	Increased Intracranial Pressure	294
26.3	CSF Hypotension	294
26.4	Central Retinal Artery Occlusion	295
	References	297
 Part V Glossary and Standard Values		
27	Glossary of Sonographic Terms	301
	Bernhard Widder and Gerhard F. Hamann	
28	Standard Values	305
	Bernhard Widder and Gerhard F. Hamann	
28.1	Extracranial Duplex Sonography	305
28.2	Transcranial Doppler Sonography	306
28.3	Transcranial Color Coded Duplex Sonography	307
28.4	Summary of Important Standard Values	309
	References	309
	Index	311
