

Prologue	8
Acknowledgements	8
Author Biographies	10
1. Introduction	12
1.1. Background	12
1.1.1. What is Face Identity Processing?	14
1.1.2. Super-Recognizers: Individuals Originally Discovered in the Lab	16
1.1.3. Super-Recognizers for Policing?	18
1.2. Assignment LKA Berlin: (How) can we detect Super-Recognizers within the Berlin Police?	20
2. Description of the Development of beSure®	22
2.1. Task Analysis via Expert interviews	23
2.1.1. Interviewed Expert Units	23
2.1.2. Outcome of the Task Analysis	25
2.1.3. Implications of the Task Analysis for beSure®	26
2.2. Material preparation	27
2.2.1. Source databases (LVD, wanted list, Videos from LKA 645 investigations)	27
2.2.2. Challenges	29
2.2.3. Stimulus selection	30
3. beSure®	32
3.1. Subtests of beSure®	32
3.1.1 Constrained Static Material: Mugshot Images	34
3.1.2. Unconstrained Static Material: Wild Images	34
3.1.3. Unconstrained Dynamic Material: Wild Videos	35
3.2. Technical Implementation of beSure®	36

4. Legal Considerations Specific to the Initial beSure® Roll-Out and Implications for Future Deployment	38
4.1. Berlin Data Protection Office Requirements.....	38
4.2. Measures Implemented to Meet the Berlin Data Protection Office Requirements.....	39
5. Conclusion and Outlook.....	44
6. References	45
