

1	Transmissions and Drivetrain Design	1
1.1	Design of the Drivetrain	2
1.1.1	Driving Resistance	2
1.1.2	Transmission and Final Drive are Torque—and Rotational Speed Converters	4
1.1.3	The Real Engine and the Transmission Ratio	4
1.1.4	Traction Limit	8
1.1.5	Drivetrain Design for Braking	8
1.2	Drivetrain Design for Electric Trucks	9
2	Transmission	11
2.1	Main Transmission	13
2.1.1	Internal Gearshift System	14
2.1.2	Reverse Gear	17
2.1.3	The Wheel Diagram	17
2.1.4	Design Concept of the Spur Gear System	17
2.1.5	The Gear Ratio	19
2.1.6	Losses in the Transmission	20
2.2	The Split Group	21
2.3	Planetary Transmission or Epicyclic Gear System	22
2.4	The Range Group	24
2.5	Range-Splitter Gearbox	25
2.6	External Gearshift System	29
2.6.1	Automated Manual Transmissions	29
2.7	Automatic Transmission	32
2.8	Power Take-Offs	32
2.9	The Transfer Case	33

3	The Clutch	37
3.1	The Friction Clutch	37
3.2	Hydrodynamic Clutches and Converters	39
3.2.1	Clutch Concepts for Heavy Goods Transportation	41
4	Propeller Shaft(s)	43
5	Retarders	45
5.1	Secondary and Primary Retarder	45
5.2	Hydrodynamic Retarders	46
5.2.1	Coolant Retarders	47
5.3	Inductive Retarders	47
5.3.1	Retarders with Permanent Magnets	47
5.3.2	Retarders with Electromagnets	48
	Comprehension Questions	49
	Abbreviation and Symbols	51
	References	53
