5.2.2	Germany as an IT location	133
5.2.3	High-impact media appearances	137
5.2.4	The ripcord was pulled too late on CeBIT development ..	140

5.2.5	The Digital Summit: an opportunity that is still underused	141
5.2.6	Coping with the 2008/2009 financial crisis and challenges due to Fukushima	142
5.2.7	Outcomes of my tenure	143
6	My timing experiences as a musician.....	163
6.1	My love for the saxophone.....	163
6.2	A second attempt.....	164
6.3	It don't mean a thing if it ain't got that swing.....	165
6.4	Just because you're not a drummer, doesn't mean that you don't have to keep time (Thelonious Monk).....	167
6.5	A musician never leaves the training camp	169
6.6	Challenging experiences.....	170
6.7	The special thing about performing in Kraków	174
7	My personal time management	181
	Part II Timing is everything — everything is timing.....	185
8	Time flies — but where to?.....	187
8.1	What does time mean?.....	187
8.2	It's part of common parlance.....	188
8.3	Live in the moment.....	189
9	How relative is time?	191
9.1	Subjective perception of time.....	191
9.2	Put a flow in your ear	192
9.3	Don't panic on the Titanic	193
9.4	Tension at boiling point.....	194
9.5	Acting in the short-term and long-term.....	195
9.6	Time pressure generates mistakes, but also creativity	196
10	Who sets the tempo?	199
10.1	"Beethoven did not compose by committee"	199
10.2	Project management	200
10.3	TOP – timing matters	201
10.4	Fast thinking — slow thinking.....	202
10.5	A calm mind's busy years are in its creation; only time strengthens the fermentation (Mephisto)	203
10.6	Time kills deals.....	205

11	How can we use high points?	207
11.1	The primacy and recency effect: First impressions count but save the best until last	207
11.2	What do you do between the start and the end?	209
12	Kairos — the god of the right moment, the convenient opportunity. Or, “seize the opportunity”	213
12.1	Life is about the opportunities you take.	214
12.2	Sometimes it’s good to miss an opportunity.	215
12.3	Beware of hasty action	215
13	If you’re not there at the right time...	217
13.1	Those who come too early are often misunderstood.	217
13.1.1	False starts in science.	217
13.1.2	First words of advice to politicians	218
13.1.3	The typical progression of hype	218
13.1.4	The start-up dilemma	220
13.2	Nothing is more powerful than an idea whose time has come ...	221
14	From the idea (invention) to innovation.	223
14.1	The innovation process.	223
14.2	What makes good management.	227
15	When to stop.	229
15.1	Stop rules.	229
15.2	When should you make a change?	231
15.3	Retirement – or a time to really get started?	231
15.4	When is it time to say “goodbye”?	234
15.5	Try taking the horn out of your mouth ...	235
15.6	What should you never stop doing?	236
15.7	When do you prepare successors?	236
16	Assured personal timing creates freedom.	239
17	Can you shape the future?	241
17.1	Is life all about coincidence?	241
17.2	“Yeah, just make a plan ...”	242
17.3	Forecasts are difficult	244

18 When does timing come to an end?.....245
