

Contents

Preface *xi*

1 Introduction *1*

- 1.1 Origin of Biomedical Micro- and Nanorobots *1*
- 1.2 A Long Journey *3*
- 1.3 Moment of Glory *5*
- 1.4 Three Laws *7*
- 1.5 Main Contents of this Book *8*
- References *8*

2 Definition and Classification *11*

- 2.1 Definition *11*
- 2.2 Classification *14*
- References *18*

3 Design and Preparation *21*

- 3.1 Substrate Selection *22*
 - 3.1.1 Metal Materials *22*
 - 3.1.2 Inorganic Materials *26*
 - 3.1.3 Organic Materials *28*
 - 3.1.4 Natural Materials *33*
 - 3.1.5 Hybrid Materials *39*
- 3.2 Driving System *40*

3.2.1	Driving System Based on Biological Components	40
3.2.2	Driving System Based on External Fields	44
3.2.3	Driving System Based on Chemical Reactions	49
	References	54
4	Characterization	61
4.1	Characterization of Motion	61
4.1.1	In Aqueous Environment	61
4.1.2	In Complex Environments <i>In Vitro</i>	66
4.2	<i>In Vivo</i> Tracking Technologies	67
4.2.1	Fluorescence Imaging Technology	67
4.2.2	MRI Technology	68
4.2.3	Radionuclide Imaging Technology	70
4.2.4	Ultrasonic Imaging Technology	71
4.2.5	Other Imaging Methods	72
	References	73
5	Biosafety	77
5.1	Biosafety of Micro- and Nanorobot Substrate	78
5.1.1	Material Composition	78
5.1.2	Micro- and Nanoscale Influence	82
5.1.3	Interaction with Physiological Environment <i>In Vivo</i>	83
5.1.4	Ultimate Destiny	85
5.1.5	Genotoxicity	86
5.1.6	Research Method of Biosafety	87
5.2	Biosafety of Driving System of Micro- and Nanorobots	88
5.2.1	Biological Micro- and Nanorobots	88
5.2.2	Physical Field-Driven Micro- and Nanorobots	88
5.2.3	Chemical Reaction-Driven Micro- and Nanorobots	91
5.3	Biosafety of Autonomous Motion Behavior of Micro- and Nanorobots	92
5.4	Biosafety Evaluation Methods for Micro- and Nanorobots	93
	References	94

6	Autonomous Motion Behavior	99
6.1	Autonomous Motion Mechanism	99
6.1.1	Motion Mechanism of Biological Micro- and Nanorobots	100
6.1.1.1	Bacteria	100
6.1.1.2	Sperm	101
6.1.1.3	Immune Cells	102
6.1.2	Motion Mechanism of Physical Field-Driven Micro- and Nanorobots	102
6.1.2.1	Magnetic Field-Driving Mode	102
6.1.2.2	Photic Driving Mode	105
6.1.2.3	Ultrasonic Field-Driving Mode	107
6.1.3	Motion Mechanism of Chemical Reaction-Driven Micro- and Nanorobots	108
6.1.3.1	Self-Electrophoresis Mode	109
6.1.3.2	Self-Diffusiophoresis Mode	110
6.1.3.3	Bubble Mode	112
6.2	Trend Behavior Mechanism	113
6.2.1	Magnetotactic System	115
6.2.2	Phototactic System	115
6.2.3	Chemotaxis System	118
6.3	Motion Control	120
6.3.1	Speed Control Mode	120
6.3.2	Direction Control Mode	122
6.3.3	Control of Start and Stop	124
	References	126
7	Functions	131
7.1	Moving in Complex Physiological Environment	131
7.2	Loading Power Source, Drug, or Imaging Agent	134
7.3	Targeting Specific Cells or Physiological Tissues	137
7.4	Promoting Cell Uptake and Improving Tissue Permeability	138
7.5	Imaging Capability	141
7.6	Information Interaction and Intelligent Decision	143

7.7	Diagnosis and Treatment of Disease	146
	References	146
8	For Cardiovascular Disease Treatment	151
8.1	Thrombus	151
8.2	Atherosclerosis	157
8.3	Cerebral Apoplexy	161
	References	163
9	For Cancer Treatment	165
9.1	Cancer Diagnosis	165
9.2	Targeting and Delivery	168
9.3	Treatment of Different Cancer Species	173
9.4	Treatment Mechanism	174
9.4.1	Chemotherapy	175
9.4.2	Metabolic Therapy	176
9.4.3	Gas Therapy	178
9.4.4	Optical Therapy	180
9.4.5	Biotherapy	182
9.4.6	Immunotherapy	183
9.4.7	Multimodal Combined Therapy	185
9.5	Theranostics	186
	References	189
10	For Other Diseases' Treatment	193
10.1	Ophthalmic Diseases	193
10.2	Orthopedic Diseases	196
10.3	Gastrointestinal Diseases	199
10.4	Neurological Diseases	202
10.5	Bacterial Infection	204
10.6	Blood Heavy Metal Poisoning	206
	References	208
11	Future Development Trend	211
11.1	Biosafety of Micro- and Nanorobots	211
11.2	New Materials and Technologies of Micro- and Nanorobots	212

11.3	Intelligent Micro- and Nanorobots	213
11.4	New Treatment Mode	216
11.5	New Detection Technology for Micro- and Nanorobots	217
11.6	Outlook and Future Challenges	218
	References	218

Postscript 221

Glossary 223
