Preface xi

Part I Biodiversity 1

1	Natural Product Diversity and its Biomolecular Aspects in Flavors and Fragrances	3
	<i>Themanamveedu Valsaraj, Akhila Nair, and Joby Jacob</i>	
1.1	Introduction	3
1.2	Genetic Resources and Plant Breeding	4
1.3	Agricultural Diversification	4
1.4	Conservation of Agrobiodiversity	5
1.4.1	Strategies for Conservation of Medicinal Plants	6
1.4.1.1	Importance of Genebanks	6
1.4.2	Molecule-Based Phylogenetics	6
1.4.3	Metabolomic-Based Phylogeny or Chemosystematics	6
1.5	Economically Important Natural Products Used in Flavors and Fragrances	7
1.5.1	Flavors	7
1.5.1.1	Cardamom	7
1.5.1.2	Cinnamon	7
1.5.1.3	Cocoa	9
1.5.1.4	Fenugreek	10
1.5.1.5	Marigold	10
1.5.1.6	Nutmeg	10
1.5.1.7	Vanilla	11
1.5.1.8	Paprika	12
1.5.1.9	Rosemary	13
1.5.2	Fragrances	14
1.5.2.1	Davana Oil	14
1.5.2.2	Olibanum Carterii/Serrata	14
1.5.2.3	Lavender	15
1.5.2.4	Vetiver	15
1.6	Conclusion	16
	Acknowledgment	16
	Declaration of Interest	16
	References	16

Part II Commercial Biotechnology Pathways, and Their Applications to Industrial Sustainability 23

2 Biogenesis of Plant-Derived Flavor Compounds 25

Nimisha P. Sukumaran and Sreeraj Gopi

- 2.1 Introduction 25
- 2.2 Primary and Secondary Flavor Compounds 27
 - 2.2.1 Primary Metabolites 27
 - 2.2.1.1 Organic Acids 27
 - 2.2.1.2 Phytohormones 29
 - 2.2.1.3 Vitamins 29
 - 2.2.1.4 Amino Acids 30
 - 2.2.1.5 Fermentation Products 30
 - 2.2.1.6 Proteins, Lipids, and Carbohydrates 30
 - 2.2.2 Secondary Metabolites 31
 - 2.2.3 Secondary Metabolites with Nitrogen 32
 - 2.2.3.1 Alkaloids 32
 - 2.2.3.2 Glucosinolates 33
 - 2.2.4 Secondary Metabolites Without Nitrogen 33
 - 2.2.4.1 Terpenoids 33
 - 2.2.4.2 Phenolics 34
- 2.3 Mechanistic Pathways of Flavor Formation 34
 - 2.3.1 Primary Metabolites 35
 - 2.3.2 Secondary Metabolites 35
 - 2.3.2.1 Purine Metabolism 37
 - 2.3.2.2 Aminoacid Metabolism 37
 - 2.3.2.3 Carotenoid Metabolism 38
 - 2.3.2.4 Fatty Acid Metabolism 38
 - 2.3.2.5 Carbohydrate Metabolism 38
 - 2.3.2.6 Organic Acid Metabolism 39
- 2.4 Conclusion 39
- References 39

3 A Sense of Design: Pathway Unravelling and Rational Metabolic Flow Switching for the Production of Novel Flavor Materials 47

Nimisha P. Sukumaran, Joby Jacob, Sabu Thomas, and Sreeraj Gopi

- 3.1 Introduction 47
- 3.2 Elicitation of Plants 50
 - 3.2.1 Biotic Elicitors 51
 - 3.2.2 Abiotic Elicitors 51
- 3.3 Transformation Within Cells 52
- 3.4 Metabolic Engineering 53
 - 3.4.1 Upregulating Pathways with Transcription Factors 54
 - 3.4.2 Redirecting with Tailored Enzymes 54
 - 3.4.3 Downregulating Pathways Using Knockout of the Gene/Enzyme 55
- 3.5 Plant Tissue Culture 57
- 3.6 Transgenic (Genetically Modified Organisms) Organisms 58
- References 58

Part III Flavor Technology 63**4 Flavor Technology and Flavor Delivering Systems 65***Anjali Anil, Józef T. Haponiuk, and Kunnirikka Sumith*

- 4.1 Introduction 65
- 4.2 Flavor Delivery Systems 66
 - 4.2.1 Microencapsulation 66
 - 4.2.2 Nanoencapsulation 67
- 4.3 Encapsulation Techniques 67
 - 4.3.1 Coacervation 68
 - 4.3.2 Molecular Inclusion 68
 - 4.3.3 Spray Drying 68
 - 4.3.4 Spray Chilling 69
 - 4.3.5 Extrusion 69
 - 4.3.6 Fluidized Bed Coating 69
- 4.4 Future Perspectives 70
- References 71

5 Flavor Signatures of Beverages and Confectionaries 73*Neha N. Areekal, Sneha George, Irene M. Peter, Roshin Thankachan, Józef T. Haponiuk, and Sreeraj Gopi*

- 5.1 Introduction 73
- 5.2 Classification of Flavor Compounds 75
 - 5.2.1 Based on Type of Flavor Compounds 75
 - 5.2.2 Based on Flavor Generation 76
- 5.3 Plant Parts as Flavoring Compounds 77
- 5.4 Flavor Signatures 78
 - 5.4.1 Effect of Maillard Reaction 79
 - 5.4.2 Effect of Baking 80
 - 5.4.3 Enhancement by Addition of Flavorings 80
 - 5.4.3.1 Flavor-Active Esters 80
 - 5.4.3.2 Xyloligosaccharides 81
 - 5.4.3.3 Flax Seeds 81
 - 5.4.3.4 1,2-Dicarbonyl Compounds 81
- 5.5 Role of Flavor Compounds in Sensory Attributes 82
- 5.6 Conclusion 85
- References 85

6 Flavor Biochemistry of Fermented Alcoholic Beverages 91*Maurício B.M. de Castilhos, Ana P.G. de Queiroga, Lia L. Sabino, Jorge R. dos Santos Júnior, Jorge A. Santiago-Urbina, Hipócrates Nolasco-Cancino, Francisco Ruiz-Terán, and Vanildo L. Del Bianchi*

- 6.1 Introduction 91
- 6.2 General Aspects of Alcohol Fermentation 92
- 6.3 General Aspects of Flavor 94
- 6.4 Flavor Biochemistry in Fermented Beverages 98
 - 6.4.1 Wines 98
 - 6.4.1.1 Flavor Precursors 99
 - 6.4.1.2 Esters 99
 - 6.4.1.3 Carbonyl Compounds 103

- 6.4.2 Mezcal 105
- 6.5 Conclusions 109
- References 109

Part IV Food Industry Ingredients 115

- 7 The Resinoids: Their Chemistry and Uses 117**
Daniel J. Strub, Maria Strub, and Nicolas Baldovini
 - 7.1 Introduction 117
 - 7.1.1 Asafoetida (*Ferula assa-foetida*) 118
 - 7.1.2 Galbanum (*Ferula gummosa*) 119
 - 7.1.3 Elemi (*Canarium luzonicum*) 120
 - 7.1.4 Styrax (*Liquidambar orientalis* Mill. and *Liquidambar styraciflua*) 122
 - 7.2 Benzoin Siam (*Styrax tonkinensis craib ex hartwiss*) and Benzoin Sumatra (*Styrax benzoin*) 124
 - 7.3 Labdanum (*Cistus ladaniferus*) 125
 - 7.4 Myrrh (*Commiphora myrrha*) 126
 - 7.5 Conclusions 128
 - References 129
- 8 Seasoning, Herbs, and Spices 133**
Anjali Anil, Józef T. Haponiuk, and Sumith Kunnirikka
 - 8.1 Introduction 133
 - 8.2 Spices as Seasoning Ingredient 134
 - 8.2.1 Ajwain (*Trachyspermum ammi*) 134
 - 8.2.2 Asafoetida (*Ferula asa-foetida*) 134
 - 8.2.3 Black Pepper (*Piper nigrum*) 135
 - 8.2.4 Celery (*Apium graveolens*) 135
 - 8.2.5 Chili (*Capsicum annum*) 135
 - 8.2.6 Cinnamon (*Cinnamomum cassia*) 136
 - 8.2.7 Clove (*Syzyium aromaticum*) 136
 - 8.2.8 Coriander (*Coriandrum sativum*) 136
 - 8.2.9 Cumin (*Cuminum cyminum*) 137
 - 8.2.10 Fennel (*Foneiculum vulgare*) 137
 - 8.2.11 Fenugreek (*Trigonella foenum graecum*) 137
 - 8.2.12 Garlic (*Allium sativum*) 138
 - 8.2.13 Ginger (*Zingiber officinale*) 138
 - 8.2.14 Green Cardamom (*Elletaria cardamomum*) 138
 - 8.2.15 Nutmeg and Mace (*Myristica fragrans*) 139
 - 8.2.16 Onion (*Allium cepa*) 139
 - 8.2.17 Star Anise (*Illicium verum*) 139
 - 8.2.18 Turmeric (*Curcuma domestica*) 140
 - 8.3 Herbs as Seasoning Ingredient 140
 - 8.3.1 Basil (*Osimum basilicum*) 140
 - 8.3.2 Oregano (*Origanum vulgare*) 140
 - 8.3.3 Parsley (*Petroselinum sativum*) 141
 - 8.3.4 Rosemary (*Rosmarinus offinialis*) 141
 - 8.3.5 Thyme (*Thymus vulgaris*) 141

- 8.4 Seasoning Blends 142
- 8.5 Future Aspects 142
- References 145

Part V Regulations, Consumer Trends, and In Silico Biology 147

9 Regulatory Aspects for Flavor and Fragrance Materials 149

Neha N. Areekal, Vaishak Ramachandran, Anirudh Jayakumar, Józef T. Haponiuk, and Roshin Thankachan

- 9.1 Introduction 149
- 9.2 Biosynthesis of Food Flavors 151
 - 9.2.1 Enzymes Used for Food Flavor Synthesis 151
 - 9.2.2 Biosynthesis of Flavors by Fermentation 152
 - 9.2.3 Production of Flavors from Agro Waste 153
 - 9.2.4 Production of Flavors through Plant Cells 153
- 9.3 Safety Evaluation of Added Flavors by FDA 154
- 9.4 Conclusion 158
- References 158

10 Sensory Science and its Perceptual Properties 165

Constantina Tzia, Virginia Giannou, Tryfon Kekes, Charikleia Chranioti, and Maria Katsouli 165

- 10.1 Introduction 165
- 10.2 Sensorial Characteristics 166
 - 10.2.1 Appearance 168
 - 10.2.2 Color 168
 - 10.2.3 Shape-Size 169
 - 10.2.4 Defects 169
 - 10.2.5 Odor 170
 - 10.2.6 Taste 171
 - 10.2.7 Texture 175
 - 10.2.8 Flavor 177
- 10.3 Sensory Evaluation – Perception – Acceptance of Foods 180
 - 10.3.1 Sensory Evaluation Tests 182
- 10.4 Sensory Control of Foods – Methodology 182
 - 10.4.1 Sensory Laboratory 182
 - 10.4.2 Assessors/Panelists – Training 183
 - 10.4.3 Samples 184
 - 10.4.4 Sensory Tests and Methods 184
 - 10.4.5 Presentation of Sensory Analyses Results – Correlation to Objective Analyses 186
- 10.5 Conclusions 187
- References 187

11 Challenges of Sensory Science: Retention and Release 191

Shradha Soni, Roshin Thankachan, Józef T. Haponiuk, and Sreeraj Gopi

11.1	Introduction	191
11.2	Bottlenecks and Novel Insights of Sensory Science	192
11.3	Sensorium Organs	193
11.3.1	Sensory of Sight	193
11.3.2	Sensory of Olfaction	194
11.3.3	Sense of Touch	196
11.3.4	Sensory of Taste	197
11.3.5	Sense of Hear	198
11.4	Factors Affecting Flavor Retention and Release	198
11.4.1	Flavor Binding and Entrapment	199
11.4.2	Flavor–Matrix Interaction	199
11.5	Future Prospects	200
	References	200
12	Virtual Screening: An <i>In Silico</i> Approach to Flavor Compounds	207
	<i>Nirosha Pulikkal, Nimisha P. Sukumaran, and Dhanesh Haridas</i>	
12.1	Introduction	207
12.2	Flavor Bioinformatics	208
12.2.1	Comparative Genomics	208
12.2.2	Omics Technologies	209
12.2.3	Bioactive Peptides	209
12.3	Computational Strategies	211
12.3.1	Homology Modeling	211
12.3.2	Synthetic Ligands for Taste Receptors	212
12.3.3	Molecular Docking of Flavor Compounds	213
12.3.4	Virtual Screening Tools for Flavor Compounds	214
12.3.4.1	QSAR-Based Virtual Screening for Flavor Compounds	215
12.3.4.2	Model Validation	215
12.3.4.3	Docking Setups	216
12.3.5	Structural Motifs in Flavor Compounds	217
12.4	Quality and Safety of Flavor Compounds	218
12.5	Conclusion	218
	References	218
13	Endpoint: A Sensory Perception of Future	225
	<i>Nimisha P. Sukumaran and Sreeraj Gopi</i>	225
13.1	Introduction	225
13.2	Sensory Perception	227
13.3	Flavor Perception	228
13.3.1	Flavor Receptors	228
13.3.2	Food Oral Processing	228
13.4	Consumer Perception	229
13.4.1	Food Choice	230
13.4.2	Food Psychology	231
13.5	Future of Flavors	232
13.6	Conclusion	233
	References	234
