1	Digitization: Changing Framework Conditions in Work and Society	1
1.1	Clarification of Terms	1
1.2	Effects of Digitalisation	2
1.2.1	Paradigm Shift and Change in Work	2
1.2.2	Digital Business Model Changes	4
1.3	Impact on Occupational Profiles	5
1.3.1	General Changes	5
1.3.2	Design of the Work	5
1.3.3	From IT Management to Chief Information and Digital Officer (CIDO).	6
1.3.4	Classical Versus Agile Information Management	8
1.4	Summary	9
	References	9
2	IT Controlling Concept: General Conditions, Basics and Central Terms	11
2.1	Mission Statement IT Controlling	11
2.2	Quick Test IT Controlling: Self-Assessment	12
2.3	IT Controlling	14
2.3.1	Clarification of Terms	14
2.3.2	Tasks	16
2.3.3	Methods and Tools	19
2.3.4	Organisational Concepts	21
2.3.5	Reasons for IT Controlling	24
2.3.6	Smart IT Controlling	25
2.4	Summary	28
	References	28
3	From IT Strategy to Digital Strategy: From Classic IT Strategy to Digital Strategy	31
3.1	Classical Notion of IT Strategy	31
3.2	Contents of IT Strategies	32

3.2.1	IT Strategy Characteristics	34
3.2.2	Empirical Content of IT Strategies	34
3.3	From IT Strategy to Digital Strategy	35
3.3.1	Digital Business Strategy	35
3.3.2	IT Strategy Patterns	36
3.4	IT Architecture Planning	37
3.5	Case Study on the Development of a Digital Strategy	40
3.5.1	IT Strategy/Digital Strategy	40
3.5.2	IT Architecture Planning	41
3.5.3	IT Organization	41
3.5.4	Data Center	41
3.5.5	Cooperation with External Service Providers	42
3.5.6	Task	42
3.6	Summary	42
	References	43
4	Control of the IT Strategy with the Balanced Scorecard: Implementing and Managing IT Strategies and Digital Strategies	45
4.1	Basics of the Balanced Scorecard	45
4.1.1	Historical Development	45
4.1.2	Methodology	46
4.1.3	Traditional Performance Measurement Systems Versus Balanced Scorecard	46
4.2	Adaptation for IT Controlling	47
4.2.1	Implementation Concept	48
4.2.2	Practical Example of a Research Institution	49
4.2.3	Cascaded Overall System	49
4.2.4	Key Questions of an IT Balanced Scorecard	51
4.2.5	Financial Perspective	52
4.2.6	Process Perspective	52
4.2.7	Staff Perspective	52
4.2.8	Customer Perspective	53
4.2.9	Use in Practice	53
4.2.10	Practical Example Daimler-Benz	53
4.3	Evaluation of the Methodology	54
4.4	Exercise on the IT Balanced Scorecard	55
4.4.1	Task	55
4.5	Summary	55
	References	56
5	IT Portfolio Management: Manage IT Project Selection	57
5.1	IT Portfolio Management as Part of IT Governance	57
5.1.1	IT Architecture and IT Portfolio Management	58

5.1.2	IT Governance and IT Portfolio Management.	59
5.2	Concept of IT Portfolio Analysis	59
5.2.1	Target Projects	60
5.2.2	Must-Do Projects	60
5.2.3	Standard IT Projects	60
5.2.4	Life Cycle Model	61
5.2.5	Selected Research Approaches	63
5.3	Critical Success Factors and Introduction	64
5.4	Case Study on the Prioritisation of Digitisation Projects	65
5.5	Evaluation of IT Security Projects	66
5.5.1	Problem	66
5.5.2	Project Types for IT Security Projects	67
5.5.3	Insurer Project (Insurer)	67
5.5.4	Enabler Project (Enabler)	68
5.5.5	Optimizer Project (Optimizer)	68
5.5.6	Solution Concept RoSI	69
5.6	Case Study on Project Selection	70
5.6.1	Scenario	70
5.6.2	Project List	71
5.6.3	Task	72
5.6.4	Proposed Solution	72
5.7	Summary	72
	References	73

6	IT Investment Calculation and Total Cost of Ownership Analysis: IT Standards as a Tool for IT Controlling	75
6.1	Business Methods of Investment Appraisal	75
6.1.1	Overview of Methods	75
6.1.2	Static Procedures	77
6.1.3	Net Present Value Method	79
6.1.4	Utility Analysis	79
6.1.5	Real Options Valuation	81
6.2	Special Methods of IT Investment Accounting	84
6.2.1	Total Cost of Ownership (TCO)	84
6.2.2	Total Economic Impact (TEI)	84
6.2.3	Rapid Economic Justification (REJ)	84
6.2.4	Total Value of Opportunity (TVO)	85
6.2.5	Business Value Index (BVI)	85
6.2.6	Economic Efficiency Analysis (WiBe)	85
6.2.7	Cranfield's Benefits Management (CBM)	85
6.2.8	Val-IT Framework	85
6.3	Total Cost of Ownership (TCO)	86

6.3.1	Concept of the TCO Approach	86
6.3.2	Evaluation of the TCO Approach	88
6.3.3	Case Studies on TCO Analysis	89
6.4	Summary	92
	References	92
7	IT Standards: IT Standards as a Tool for IT Controlling	95
7.1	IT Governance	95
7.2	IT Standards as an Approach to TCO Reduction	96
7.2.1	QUERTY: The Oldest IT Standard in the World	96
7.2.2	Net Effect Goods	97
7.2.3	Standardization Fields	97
7.2.4	Introduction and Enforcement	99
7.3	Summary	101
	References	101
8	Project Controlling with Earned Value Analysis: Plan, Monitor and Control Projects	103
8.1	Project Controlling	103
8.1.1	Pre-study	104
8.1.2	Project Application	104
8.1.3	Project Start	104
8.1.4	Actual Recording	106
8.1.5	Target Concept	106
8.1.6	Implementation	106
8.1.7	Project Completion	106
8.1.8	Project Calculations	107
8.2	Structure of the Earned Value Analysis	107
8.2.1	Project Management	107
8.2.2	Basic Data	108
8.2.3	Key Figures	108
8.2.4	Prerequisites for Use	109
8.2.5	Use in Practice	109
8.2.6	Measurement of the Percentage of Completion	110
8.3	Application Examples	111
8.3.1	Developing a Website	111
8.3.2	App for Software Developers	112
8.4	Reporting	114
8.5	Summary	114
8.5.1	Baseline Data	114
8.5.2	Key Figures	114
	References	115
