

Contents

1	Monetization of Data at the Example of Manufacturing Machines	1
	Daniel Trauth	
Part I Legal aspects of Data Monetization		
2	Data Monetization in Law	17
	Walter Frenz	
3	Monetization of Technical Data using the Example of Technical Employee Data	35
	Inka Knappertsbusch	
4	The enforcement and bankruptcy of blockchain-based assets (Crypto-Assets)	51
	Alexander Bauer	
Part II Business aspects of Data Monetization		
5	Silence is Silver, Speech is Gold: The Benefits of Machine Learning and Text Analysis in the Financial Sector	69
	Wolfgang Breuer, Anthony Haake, Manuel Hass and Eric Sachsenhausen	
6	Monetization of Machine-generated Online Data — Cross-industry Opportunities and Challenges	87
	Malte Brettel, Thorsten Beule, Markus Rey and Nathalie Huber	
7	Monetary Valuation of Data in the Context of Accounting	103
	Hannah Stein and Wolfgang Maaß	

8	How Can the German Mittelstand Embrace Digital Transformation?—Considerations on Data Products, Business Models and Platform Economics	117
	Fred Jopp and Andreas Weiss	
9	Data Monetization Strategies for Manufacturing Companies	127
	Günther Schuh, Christoph Kelzenberg, Julian Boshof, Tim Graberg and Tim Ochel	
Part III Information technology aspects of Data Monetization		
10	End-to-End Architectures for Data Monetization in the Industrial Internet of Things (IIoT)	149
	Christoph F. Strnadl	
11	The Technology IOTA as an Open Infrastructure for Micro-Payments, IoT Communication, and Global Digital Security	185
	Holger Köther	
12	Data Notary—Auditable Data as a Basis for Monetization	195
	Patrick Lamplmair, Simon Pfeifhofer and Benedikt Berger	
13	Secure, Verifiable Object Identities as Enabler for Value Creation in Distributed Networks	209
	Kai Hendrik Wöhnert, Sven-Jannik Wöhnert and Volker Skwarek	
Part IV Data Monetization in the Manufacturing Industry		
14	Putting a Price Tag on Data	225
	Daniel Trauth, Nils van Ouwerkerk, Felix Mönckemeyer and Kristof Herrmann	
15	The Internet of Production as the Foundation of Data Utilization in Production	247
	Marco Becker, Matthias Brockmann, Philipp Niemietz, Daniel Trauth, Thomas Bergs and Christian Brecher	
16	Graphic Approach to Energy Optimization through Artificial Intelligence.	265
	Ricardo Vega Ayora and Nicolina Praß	
17	Efficiency Increase through Data-Based Modeling of Quality and Production Cost Factors in the Nonwoven Industry	285
	Frederik Cloppenburg	

18	Added Value through Linking of Product and Process Data on the Example of a Textile Process Chain.	315
	Ruben Kins and Thomas Gries	
19	Data-Based Knowledge Gain from the Perspective of Surface Technology	329
	Kirsten Bobzin, Tobias Brögelmann, Wolfgang Wietheger, Hendrik Heinemann, Christian Kalscheuer, Seyed Ruhollah Dokhanchi and Martin Welters	
20	Digitization in the Plastics Processing.	351
	Christian Hopmann and Mauritius Schmitz	
21	Monetization of Data in Joining Technology	367
	Uwe Reisgen, Marion Purrio and Guido Buchholz	
22	With Transparency to Zero-Defect Production and Added Values for the Customer	381
	Sven O. Rimmelspacher	
23	Decentralized Marketplace Structures as Protection against Information Asymmetries.	393
	Philipp Sandner and Marcel Kaiser	
24	As-a-Service Models for Manufacturing Technology	407
	Joachim Stanke, Daniel Trauth, Philipp Niemietz and Thomas Bergs	
25	Using Data from Agricultural and Construction Machinery profitably	427
	Benjamin Lehmann, Georg Jacobs, Christian Habermehl, Christian Gentz and Stephan Neumann	
26	Sustainable Production through Predictive Quality and Sustainability Analytics along the Supply Chain	473
	Robert H. Schmitt, Daniel Buschmann, Kristof Briele, Peter Schlegel and Max Ellerich	
27	The Data Lifecycle from Data Capture to Insight	487
	Christian Brecher, Philipp Blanke, Melanie Padberg, Yannick Dassen, Christian Fimmers, Aleksandra Müller, Oliver Petrovic, Simon Pieske, Simon Roggendorf, Katrin Schilling and Stephan Wein	
28	“ReLIFE”: Business Models for Data-Based Remanufacturing	507
	Peter Burggräf, Matthias Dannapfel, Johannes Wagner, Benjamin Heinbach, Nils Föhlisch and Jonas Dackweiler	

29	Data Utilization and Data Reduction in Laser Material Processing	521
	Ulrich Thombansen, Peter Abels, Wolfgang Fiedler, Christian Knaak, Moritz Kröger, Andrea Lanfermann and Frederic Schulze	
30	Transparency and Value of Data in Construction	539
	Sigrid Brell-Cokcan, Sven Stumm, Lukas Kirner and Elisa Lublasser	
31	Data Monetization Potential in the Automotive Industry Value Chain and the Product Lifecycle	559
	Seonhi Ro	
 Part V Data Monetization in Energy Technology		
32	Technology Convergence in the Energy Sector	581
	Fynn-Hendrik Paul, Daniel Demmer, Nils Herterich and Moritz Hafke	
33	Data Monetization in the Energy System and its Role in the Development of a Customer-Oriented Power Grid	599
	Stephan Groß, Stefan Lankes, Ferdinanda Ponci and Antonello Monti	
 Part VI Data Monetization in other emerging application fields		
34	Monetization of Sensor Data in Commercial Real Estate	611
	Steffen Heidrich and Christopher Seipel	
35	Saving Costly Experiments and Simulations through Machine Learning	627
	Michael Herty, Michael Rom and Giuseppe Visconti	
36	PIGCONOMY	645
	Thomas Rose, Julia Gruber, Kathrin Hausmann and Thomas Osterland
