Table of contents iii

List of figures.....vi

List of tables.....vii

1 General introduction 1

1.1 Mango (*Mangifera indica* L.) 1

1.2 Mango fruit characteristics..... 1

1.3 Convective drying 3

1.4 Potential and use of dried mango 5

1.5 Future prospects and challenges 5

1.6 Objectives and structure of research 7

1.7 References..... 9

2 Part I: Effect of heat exposure on activity degradation of enzymes in mango varieties Sindri, SB Chaunsa, and Tommy Atkins during drying 17

2.1 Abstract 17

2.2 Introduction..... 17

2.3 Materials and methods 19

2.3.1 Mango varieties..... 19

2.3.2 Enzyme activity assays 19

2.3.3 Incubation trials to determine the heat-sensitivity of enzymes in fresh mango 21

2.3.4 Hot air convective thin-layer drying of mango slabs 22

2.3.5 Measurement of enzyme activity in fresh and dried mango 24

2.3.6 Modeling of enzyme activity kinetics during drying 24

2.3.7 Statistical analysis..... 24

2.4 Results and discussion 25

2.4.1 Effect of incubation temperature on enzyme activity in fresh mango 25

2.4.2 Polyphenoloxidase (PPO) activity of fresh and dried mango 27

2.4.3	Catalase activity of fresh and dried mango	28
2.4.4	Drying kinetics of catalase activity	30
2.5	Conclusions.....	32
2.6	Appendix A.....	34
2.7	References.....	37
3	Part II: Effect of hot-air convective drying on activity retention of amylase and invertase in dried mango of varieties Sindri, SB Chaunsa, and Tommy Atkins	43
3.1	Abstract.....	43
3.2	Introduction.....	43
3.3	Materials and methods	45
3.3.1	Raw materials.....	45
3.3.2	Drying experiments.....	45
3.3.3	Enzyme extraction in fresh and dried mango.....	46
3.3.4	Amylase activity assay	47
3.3.5	Invertase activity assay	47
3.3.6	Kinetics considerations of amylase and invertase.....	47
3.3.7	Maltose and glucose concentrations in fresh and dried mango.....	48
3.3.8	Statistical analysis	48
3.4	Results and discussion	48
3.4.1	Amylase activity in fresh and dried samples.....	49
3.4.2	Invertase activity in fresh and dried samples	50
3.4.3	Residual activity of amylase and invertase during mango drying	51
3.4.4	Reducing sugar (maltose and glucose).....	53
3.5	Conclusions.....	54
3.6	References.....	56
4	Part III: Catalase activity in hot-air dried mango as an indicator of heat exposure for rapid detection of heat stress	61
4.1	Abstract	61

4.2	Introduction.....	61
4.3	Materials and methods	63
4.3.1	Materials	63
4.3.2	Drying process	64
4.3.3	Colorimetric measurement.....	64
4.3.4	Quality prediction test.....	64
4.3.5	Statistical analysis	69
4.4	Results and discussion	69
4.4.1	Color changes.....	69
4.4.2	Quality prediction test.....	71
4.5	Conclusions.....	75
4.6	Appendix B	77
4.7	References.....	78
5	General discussion	82
5.1	Mango drying.....	82
5.2	Heat incubation trials of enzymes	83
5.3	Effect of convective drying on heat-sensitive enzyme activity of mango	84
5.4	Effect of convective drying on heat-resistant enzyme activity of mango	86
5.5	Catalase activity as an indicator of heat exposure	88
5.6	Outlook	91
5.7	References.....	92
6	Summary.....	99
7	Zusammenfassung.....	102
	Curriculum Vitae.....	105
	Publications	107
