Preface — V

List of contributing authors — XIII

Justin K. Maghanga, Veronica A. Okello, Justine A. Michira, Loice Ojwang, Bancy Mati and Fred K. Segor

1 Fluoride in water, health implications and plant-based remediation strategies — 1

- 1.1 Introduction — 2
- 1.1.1 Plant based remediation strategies — 4
- 1.2 Materials and methods — 6
- 1.2.1 Materials — 6
- 1.2.2 Study area — 7
- 1.2.3 Preparation of the adsorbent — 7
- 1.2.4 Physicochemical analysis — 7
- 1.2.5 Optimization studies — 7
- 1.2.6 Borehole water sample treatments — 8
- 1.3 Results and discussions — 8
- 1.3.1 Distribution of fluorides in Kenya groundwaters — 8
- 1.3.2 Physicochemical water parameters — 9
- 1.3.3 Application of maerua subcordata for water treatment — 10
- 1.3.4 Optimization studies — 11
- 1.3.5 Borehole sample experiments — 14
- 1.4 Conclusions — 15
- 1.4.1 Recommendations — 16
- References — 16

Victor O. Shikuku, Emily C. Ngeno, Joel B. Njewa and Patrick Ssebugere

2 Pharmaceutical and personal care products (PPCPs) and per- and polyfluoroalkyl substances (PFAS) in East African water resources: progress, challenges, and future — 21

- 2.1 Emerging contaminants — 21
- 2.1.1 Introduction — 21
- 2.2 Occurrence of PPCPs in water resources — 23
- 2.3 Per- and Polyfluoroalkyl Substances (PFAS) — 25
- 2.3.1 PFASs properties — 25
- 2.3.2 PFASs exposure routes — 26
- 2.3.3 PFAS in potable water — 26
- 2.3.4 Sludge and wastewater — 27
- 2.3.5 Sediments and suspended solids — 27

2.3.6	Surface and pore water —	28
2.4	Pollution control of CECs —	29
2.4.1	Regulating emissions of CECs into receiving waters —	29
2.4.2	Minimizing and/or replacing CECs —	30
2.4.3	Proper disposal —	30
2.4.4	Technical solutions —	31
2.4.5	Intensify technical infrastructural funding —	31
2.4.6	Investigate and avail data on CECs' occurrence, fate, toxicity, persistence, and variability —	32
2.4.7	Legislation —	32
2.4.8	Institute structures to probe pollution and its repercussions —	33
2.4.9	Establish collaborations across stakeholders for pollution abatement —	33
2.4.10	Provision of incentives —	33
2.5	Future perspectives of emerging contaminants —	33
	References —	34

Prithwish Sarkar, Kishore Dhara and Himadri Guhathakurta

3	Azadirachtin in the aquatic environment: Fate and effects on non-target fauna —	39
3.1	Introduction —	39
3.1.1	The chemical nature of azadirachtin —	41
3.1.2	Fate —	42
3.1.3	Mode of use —	42
3.1.4	Ecotoxicity —	43
3.1.5	Effects —	43
3.2	Conclusions —	47
3.2.1	From the foregoing it seems safe to assume that —	47
	References —	47

George S. Nyamato and Seth Apollo

4	Removal of heavy metals from wastewater using synthetic chelating agents —	51
4.1	Introduction —	51
4.2	Materials and methods —	52
4.2.1	Extraction experiments —	53
4.2.2	Wastewater samples —	53
4.3	Results and discussion —	53
4.3.1	Nature of metal cation —	54
4.3.2	Nature of ligand structure —	55
4.3.3	Impact of ligand concentration —	56

- 4.3.4 Real water samples — 57
- 4.4 Conclusions — 57
- References — 57

Subbulakshmi Ganesan, Gopalakrishnan Padmapriya and Agampodi Sanduni
Anupama De Zoysa

- 5 Conscientiousness of environmental concepts in sustainable development and ecological conservation — 61**
 - 5.1 Introduction — 61
 - 5.2 Methodology — 62
 - 5.2.1 Methodology of preparation of bioplastics — 62
 - 5.3 Methodology of making biopesticides — 64
 - 5.3.1 Using ginger extracts — 64
 - 5.3.2 Using papaya leaves — 65
 - 5.4 Methodology of production of biodiesel using algae — 65
 - 5.4.1 Bioplastic — 65
 - 5.4.2 Biofertilizer — 66
 - 5.4.3 Biodiesel: Table 5.3 and Figure 5.4 — 66
 - 5.4.4 Biopesticides — 67
 - References — 67

Subbulakshmi Ganesan and Asha Rajiv

- 6 Role of science in environmental conservation leading to sustainable development — 69**
 - 6.1 Introduction — 69
 - 6.2 Discussion — 71
 - 6.3 Conclusion — 73
 - References — 74

T. V. Ramachandra, Bharath Setturu and Vinayaka Bhatta

- 7 Landscape ecological modeling to identify ecologically significant regions in Tumkur district, Karnataka — 75**
 - 7.1 Introduction — 76
 - 7.2 Materials and methods — 77
 - 7.2.1 Study area — 77
 - 7.2.2 Methods — 79
 - 7.3 Results & discussion — 83
 - 7.3.1 Modeling landscape dynamics and spatial configuration of Tumkur — 83
 - 7.3.2 Prioritization of Ecologically Sensitive Regions (ESRs) for conservation and sustainable development — 90

7.4	Conclusions — 96
	References — 97

Balakrishnan Karthikeyan, Antonybaburajan Therasa Alphonsa, Natesan Vijayakumar and Antony Samy Jose Vinoth Raja

8 Role of semiconductor photo catalysts on mask pollution management — 101

8.1	Introduction — 101
8.1.1	The pandemic and mask use — 103
8.1.2	Titanium dioxide and lead oxide semiconductors — 106
8.2	Experimental methods — 109
8.2.1	Chemicals — 109
8.2.2	Sol-gel synthesis of $\text{TiO}_2\text{-SiO}_2$ — 109
8.2.3	Sol-gel synthesis of PbO-SiO_2 — 109
8.2.4	Photo Reactor Studies — 109
8.3	Result and discussion — 110
8.3.1	Mask degradation on sun light — 110
8.3.2	Photo degradation on mask layer — 110
8.3.3	Photo degradation — 110
8.4	Summary — 112
	References — 113

Subbulakshmi Ganesan, G. Padmapriya, Izegaegbe Daniel Omoikhoje, J.H. Tharudini, and Sanduni Anupama De Zoysa

9 Biochar: its characteristics application and utilization of on environment — 115

9.1	Introduction — 116
9.2	Methodology — 117
9.2.1	Preparation of biochar: from a variety of raw materials — 117
9.2.2	Research on biochar analysis method — 118
9.2.3	Biochar modification — 119
9.3	Conclusions — 122
	Terminologies — 123
	References — 123

Subbulakshmi Ganesan

10 Biotic farming using organic fertilizer for sustainable agriculture — 125

10.1	Introduction — 125
10.2	Organic fertilizers — 126
10.3	Climate change and agriculture — 127
10.4	Effects of chemical fertilizers on soil health — 127

10.5	Organic farming methods —	128
10.6	Crop diversity —	129
10.7	Use of PGPR as biofertilizer —	129
10.8	Use of legumes for sustainable agriculture —	130
10.9	Crop rotation —	130
10.10	Liquid organic fertilizer —	130
10.11	Advantages of organic fertilizers —	131
10.12	Disadvantages of chemical fertilizers —	131
10.13	Conclusion —	132
	References —	132
Index —		135
