LIST OF ABBREVIATIONS V

SUMMARYVII

ZUSAMMENFASSUNGIX

1. CHAPTER: INTRODUCTION 1

1.1. Arthritis..... 2

1.2. Rheumatoid arthritis 4

1.2.1. The course of RA pathogenesis 6

1.3. Lessons from animal models of arthritis 9

1.4. Building blocks for the development of a human in vitro joint 14

1.4.1. Bone morphology..... 15

1.4.2. Articular cartilage 16

1.4.3. Synovial membrane..... 18

1.5. In vitro models of arthritis 19

1.5.1. Tissue Explants: Close physiological proximity but low experimental feasibility..... 20

1.5.2. Simplified 2D culture and co-culture approaches..... 21

1.5.3. 3D tissue engineering approaches: Mimicking structural features of the joint 22

2. CHAPTER: AIMS 25

3. CHAPTER: RESULTS 27

3.1. Part I: Modeling the osteochondral unit..... 28

3.1.1. Manuscript 1: A human osteochondral tissue model mimicking cytokine-induced key features of arthritis in vitro 29

3.2. Part II: Optimization of the osteochondral building blocks 55

3.2.1. Manuscript 2: Optimization of a tricalcium phosphate-based bone model using cell-sheet technology to simulate bone disorders 56

3.2.2. Manuscript 3: Microscale scaffold-free in vitro 3D cartilage constructs replicate inflammation-mediated cartilage degeneration..... 75

TABLE OF CONTENT

3.3.	Part III: The complementary building block – the synovial membrane	106
3.3.1.	Manuscript 4: A functional xeno-free 3D synovial membrane model to study synovitis in vitro	107
4.	CHAPTER: DISCUSSION.....	139
5.	CHAPTER: OUTLOOK	153
6.	CHAPTER: REFERENCES	157
	LIST OF PUBLICATIONS AND CONTRIBUTIONS.....	183
	AWARDS AND SCHOLARSHIPS	188
	COPYRIGHT PERMISSIONS	189
	FUNDING SOURCES	190
	CONFLICT OF INTEREST	190
	ANTEILSERKLÄRUNG	191
