Preface	xvii
Contributors	xviii

Section I: Anatomy and Biomechanics

1. Anatomy and Histology of Wrist Ligaments.....	3
<i>Elisabet Hagert, Frantzeska Zampeli, and Susanne Rein</i>	
1.1 Wrist Ligaments: Overview of Anatomy and Histology	3
1.1.1 Anatomy Overview	3
1.1.2 Histology Overview	3
1.2 Extrinsic Ligaments	5
1.2.1 Anatomy	5
1.2.2 Volar Radiocarpal Ligaments	6
1.2.3 Volar Ulnocarpal Ligaments	8
1.2.4 Dorsal Radiocarpal Ligament.....	8
1.3 Intrinsic Ligaments.....	9
1.3.1 Anatomy	9
1.3.2 Midcarpal Ligaments	9
1.3.3 Intercarpal Ligaments.....	10
References.....	11
2. Biomechanics of the Wrist	13
<i>Jonathan P. Compson</i>	
2.1 Introduction	13
2.2 Functions of the Wrist.....	13
2.2.1 Optimum Position for Finger Function/ Arthrodesis	14
2.2.2 Functional Range of Movement	14
2.2.3 Dart-Throwing Motion.....	14
2.3 Basic Functional Anatomy of the Wrist.....	14
2.3.1 Osteology	14
2.3.2 Ligaments	17
2.4 Wrist Stability	18
2.4.1 Trabecular Patterns	18
2.4.2 Pressure and Forces Across Wrist	18
2.4.3 General Aspects and the Importance of Locking	18
2.4.4 Locking of the Midcarpal Joint	18
2.4.5 Locking Mechanisms in the Radiocarpal Joint.....	19
2.4.6 Isolated Joints.....	19
2.5 Carpal Movement.....	20
2.5.1 Historical Perspective	20
2.5.2 Wrist Movement	20
2.6 Hydromechanics of the Wrist	20
2.7 Conclusions and Future Developments	21
References.....	21
3. Role of Muscles in Wrist Stabilization and Clinical Implications.....	23
<i>Mireia Esplugas, Alex Lluch, Guillem Salva-Coll, and Marc Garcia-Elias</i>	
3.1 Introduction.....	23
3.2 Interosseous Ligament–Competent Wrist (Normal Wrist).....	24

3.2.1	Kinetic Effect of the Axial Loading on the Carpal Bones Alignment: How Does a Normal Carpus Adapt to the Axial Loading to Avoid Any Collapse?	24	3.4.1	Kinetic Effect of the Axial Loading on the Carpal Bones Alignment: How Does a Deficient LTqL Carpus Adapt to the Axial Loading?	28
3.2.2	Kinetic Effect on the Carpal Bones Alignment of the Isometric Muscle Loading	24	3.4.2	Muscle Control of the Carpal Bones Alignment When the LTqj Ligaments Are Incompetent	28
3.3	Scapholunate Joint Ligament-Deficient Wrist.	27	3.5	Volar Nondissociative Proximal Carpal Row Dysfunction Secondary to the Midcarpal and Dorsal Radiocarpal Ligaments Incompetence	29
3.3.1	Kinetic Effect of the Axial Loading: How Does an SLL-Incompetent Carpus Adapt to the Axial Loading?	27	3.5.1	Normal Wrist Proximal Carpal Row Kinematics During Wrist Inclinations	29
3.3.2	Muscle Control of the Carpal Bones Alignment When the SLL Is Incompetent	28	3.5.2	Proximal Carpal Row Kinematics During Wrist Radial/Ulnar Inclination When the Radial MC Ligaments Are Incompetent ...	29
3.4	Lunotriquetral Joint Ligaments (LTqL) Deficient Wrist	28	3.5.3	Muscular Control of the Volar Proximal Carpal Row Dyskinesia	30
				References	30
4.	Ligament Injury and Carpal Instability	31			
	<i>Carlos Heras-Palou and Ezequiel Zaidenberg</i>				
4.1	Introduction	31	4.4	Carpal Instability	34
4.2	Ligament Tears	31	4.5	Conclusions	35
4.3	Biomechanical Studies	33		References	35
5.	Surgical Approaches to the Carpus	36			
	<i>M. Rosa Morro-Marti and Manuel Llusa-Perez</i>				
5.1	Introduction	36	5.4	Volar Approach to the Scaphoid	42
5.2	Dorsal Approach	36	5.4.1	Skin Incision and Subcutaneous Tissue ...	42
5.2.1	Skin and Subcutaneous	36	5.4.2	Deeper Dissection	42
5.2.2	Retinaculum	36	5.4.3	Capsulotomy	42
5.2.3	Capsule	37	5.4.4	Closure	42
5.2.4	Exposure	38	5.5	Dorsal Approach to the Scaphoid	43
5.2.5	Modifications	38	5.5.1	Skin Incision	43
5.2.6	Closure	39	5.5.2	Retinaculum	44
5.3	Volar Approach	39	5.5.3	Capsule	44
5.3.1	Skin Incision and Subcutaneous Tissue ...	39	5.5.4	Exposure	44
5.3.2	Retinaculum	40	5.5.5	Closure	44
5.3.3	Capsule	40		References	45
5.3.4	Modifications	40			
5.3.5	Closure	40			

Section II: Assessment of the Wrist

6.	Physical Examination of the Wrist	49		
	<i>Guillem Salva-Coll</i>			
6.1	Medical History	49	6.5.2	Lunotriquetral Instability..... 52
6.2	Inspection	49	6.5.3	Midcarpal Instability..... 55
6.3	Palpation	49	6.6	Other Specific Tests 58
6.4	Range of Motion	50	6.6.1	Hamate Hook Pull Test..... 58
6.5	Specific Tests	50		References..... 58
6.5.1	Scapholunate Dysfunction.....	50		
7.	Arthroscopic Examination of the Wrist	59		
	<i>Fernando Corella, Jane Messina, Montserrat Ocampos, and Pietro Randelli</i>			
7.1	Introduction	59	7.4.1	Generalities and Normal Arthroscopic Anatomy..... 69
7.2	Arthroscopic Portals and General Joint Exploration	59	7.4.2	Specific Pathological Evaluation..... 70
7.2.1	Radiocarpal Joint.....	59	7.4.3	Arthroscopic Classifications..... 74
7.2.2	Midcarpal Joint.....	60	7.5	Extrinsic Ligaments 74
7.3	Scapholunate	60	7.5.1	Generalities and Normal Arthroscopic Anatomy..... 74
7.3.1	Generalities and Normal Arthroscopic Anatomy.....	60	7.5.2	Specific Pathological Evaluation and Arthroscopic Classification..... 77
7.3.2	Arthroscopic Pathological Exploration....	62	7.6	Conclusions 79
7.3.3	Arthroscopic Classifications.....	67		References..... 79
7.4	Lunotriquetral	69		
8.	Imaging of the Wrist	80		
	<i>Luis Cerezal and Diogo Roriz</i>			
8.1	Imaging Techniques	80	8.2.2	Lunotriquetral Dissociation..... 85
8.1.1	Conventional Radiographs.....	80	8.3	Imaging in Carpal Instability Nondissociative 86
8.1.2	Fluoroscopy.....	80	8.3.1	Extrinsic Ligaments..... 86
8.1.3	Ultrasound.....	82	8.4	Conclusions 87
8.1.4	Computed Tomography.....	83		References..... 87
8.1.5	Magnetic Resonance Imaging.....	83		
8.2	Imaging in Carpal Instability Dissociative	83		
8.2.1	Scapholunate Dissociation.....	83		

Section III: Scapholunate Injury and Instability

9.	Scapholunate Ligament Injury Etiology and Classification	91		
	<i>Alex Lluch, Ana Scott-Tennent, Mireia Esplugas, and Marc Garcia-Elias</i>			
9.1	Introduction	91	9.4	Scapholunate Ligament Injury Classifications
				94
9.2	Natural History of Scapholunate Dysfunction	91	9.4.1	Scapholunate Ligament Injury Classifications
				94
9.3	Scapholunate Ligament Injury Pathomechanics	92	9.4.2	Stages of Scapholunate Joint Dysfunction
				95
9.3.1	Injury Mechanisms	92	9.5	Conclusion
9.3.2	Associated Injuries to SLL Tears	93		References
				96
10.	The “4R” Algorithm of Treatment	97		
	<i>Riccardo Luchetti and Fernando Corella</i>			
10.1	Introduction	97	10.3	Organizing the Treatments: The 4R ...
				100
10.2	Defining the Type and Stage of Injury Through the Arthroscopic Exploration	97	10.3.1	Repair
				100
10.2.1	Gap Between the Bones	98	10.3.2	Reinforcement
10.2.2	Acute vs Chronic	98		100
10.2.3	Quality of the Ligament	98	10.3.3	Reconstruction
10.2.4	Dorsal Displacement of the Scaphoid.	98		101
10.2.5	Reducibility	99	10.3.4	Resection
10.2.6	Combined Injuries	99		101
10.2.7	Degenerative Changes	99	10.4	Conclusion
				102
				References
				102
11.	Acute “R”epair: Open Treatment	103		
	<i>Riccardo Luchetti, Sara Montanari, Andrea Atzei, and Frank Nienstedt</i>			
11.1	Introduction	103	11.5.1	Advantages and Limits of the Traditional Technique
				107
11.2	Clinical Signs	104	11.6	Preferred Method
				107
11.3	Instrumental Diagnostics	104	11.7	Discussion
				108
11.4	Arthroscopy	105		References
				110
11.5	Traditional Surgical Technique	105		
12.	Acute “R”epair: Arthroscopic Treatment	112		
	<i>Vicente Carratalá Baixauli, Fernando Corella, Francisco J. Lucas García, Eva Guisasola Lerma, and Cristóbal Martínez Andrade</i>			
12.1	Introduction	112	12.2	Indications
				113

12.3	Technique	113	12.5.1	Step 1: Volar Portal Establishment	115
12.4	Scapholunate Dorsal Capsuloligament Reattachment	113	12.5.2	Step 2: Anchor Placement	115
12.4.1	Step 1: Insertion of the Anchor and Ligamentous Suture	113	12.5.3	Step 3: Capsuloligamentous Suture and Knotting	115
12.4.2	Step 2: Dorsal Capsulodesis (Dorsal Capsular Reinforcement)	113	12.6	Postoperative Period	116
12.5	Scapholunate Volar Capsuloligament Reattachment	115	12.7	Discussion	116
			12.8	Conclusions	118
				References.....	119
13.	Chronic “R”einforcement (Capsulodesis): Open Treatment of Chronic SL Injury	120			
	<i>Weston Ryan and Robert M. Szabo</i>				
13.1	Introduction and Historical Perspective	120	13.3.1	Approach	123
13.1.1	Scapholunate Injury Overview	120	13.3.2	Scapholunate Reduction.....	123
13.1.2	Overview of Open Surgical Techniques and Indications	120	13.3.3	Dorsal Intercarpal Ligament Fixation.....	124
13.2	Capsulodesis: Literature Review and Surgical Considerations	121	13.4	Essential Rehabilitation Points	125
13.3	Author’s Preferred Technique; The Dorsal Intercarpal Ligament Capsulodesis	123	13.5	Conclusion	125
				References.....	125
14.	Chronic “R”einforcement (Capsulodesis): Arthroscopic Scapholunate Repair ...	127			
	<i>Max Haerle, Jean-Baptiste de Villeneuve Bargemon, Florian Lampert, and Lorenzo Merlini</i>				
14.1	Introduction	127	14.4.1	Classic Arthroscopic Repair	130
14.2	Indications	127	14.4.2	Arthroscopic Scapholunate Capsulodesis...	131
14.3	Surgical Technique	128	14.5	Discussion	131
14.3.1	Classic Arthroscopic Repair	128	14.6	Conclusion	131
14.4	Results	130		References.....	131
15.	Chronic “R”econstruction (Ligamentoplasties): Open Treatment	133			
	<i>Rupert Wharton and Mike Hayton</i>				
15.1	Introduction	133	15.2.4	The 360 Tenodesis (SLITT)	136
15.2	Ligamentoplasties	133	15.3	The Author’s Preferred Technique and Pitfalls	136
15.2.1	The Brunelli Procedure	133	15.4	Conclusion	137
15.2.2	The Three-Ligament Tenodesis (3LT)	134		References.....	137
15.2.3	Volar Scapholunate Ligament Reconstruction	136			

16.	Chronic “R”econstruction (Ligamentoplasties): Arthroscopic Treatment	139		
	<i>Pak Cheong Ho and Jeffrey Justin Siu Cheong Koo</i>			
16.1	Introduction and Historical Perspective	139	16.11	Preparation of Scaphoid Bone Tunnel
16.2	Literature Review and Different Surgical Techniques	140	16.12	Passing the Palmaris Longus Tendon Graft Through the Scaphoid and Lunate Bone Tunnel
16.3	Indications and Contraindications for Surgery	143	16.13	Assessment Through Midcarpal Joint Arthroscopy and Scapholunate Interval Reduction with Palmaris Longus Tendon Graft
16.4	Authors’ Preferred Technique	143	16.14	Closure and Postoperative Care
16.5	Patient Preparation and Positioning ...	143	16.15	Clinical Outcome
16.6	Exploration of Radiocarpal Joint and Midcarpal Joint	144	16.16	Tips and Tricks
16.7	Taking-Down of Intra-Articular Fibrosis	144	16.17	Conclusion
16.8	Identification of Scaphoid and Lunate Bone Tunnel Sites	145		References
16.9	Correction of DISI Deformity	145		
16.10	Preparation of Lunate Bone Tunnel	145		
17.	Chronic “R”esection (Palliative): Open Salvage Surgery after SL Degeneration	154		
	<i>Hermann Krimmer</i>			
17.1	Introduction	154	17.3.2	Proximal Row Carpectomy (PRC)
17.1.1	Carpal Collapse—SLAC Pattern	154	17.3.3	Four-Corner Fusion
17.2	Indication for Treatment	154	17.4	Results
17.3	Operative Procedures	155	17.5	Conclusion
17.3.1	Denervation	155		References
18.	Chronic “R”esection (Palliative): Arthroscopic Salvage Surgery after Scapholunate Degeneration	160		
	<i>Eva-Maria Baur and Jean-Baptiste de Villeneuve Bargemon</i>			
18.1	Introduction	160	18.4	Scaphocapitate Arthrodesis
18.2	Styloidectomy	160	18.4.1	Tips and Tricks
18.2.1	Tips and Tricks	160	18.5	Partial Arthrodesis
18.3	Radiocarpal Interposition	160	18.5.1	Radioscapholunate Arthrodesis
18.3.1	Tips and Tricks	161	18.5.2	Intracarpal Arthrodesis
			18.6	First-Row Carpal Bone Resection

18.6.1	Tips and Tricks	165	18.9	Conclusion	166
18.7	Total Arthrodesis under Arthroscopy (SLAC 4)	166		References	166
18.8	Authors' Preferred Technique	166			

Section IV: Lunotriquetral Injury and Instability

19.	Isolated Lunotriquetral Interosseous Ligament Ruptures	171			
	<i>Teun Teunis, David Ring, Liron Duraku, and Marco J.P.F. Ritt</i>				
19.1	Introduction	171	19.4.2	The Association of LTIL Variations and Discomfort and Incapability	174
19.2	Definition of the Key Concepts	171	19.5	Diagnosis and Treatment of LTIL Variations as the Cause of Wrist Pain ...	174
19.3	LTIL Rupture in Carpal Dislocations	171	19.6	Potential Harms Associated with the Concept of LTIL Variations as a Cause of Wrist Pain	174
19.3.1	Consequences of LTIL Rupture	171		References	176
19.4	Prevalence of Wrist Pain	172			
19.4.1	Prevalence of LTIL Variations	172			
20.	Acute Management: Open Treatment of LT Injury and Instability	177			
	<i>Lauren E. Dittman and Alexander Y. Shin</i>				
20.1	Introduction and Historical Perspective	177	20.4.5	Augmentation	180
20.2	Surgical Anatomy	177	20.5	Authors' Preferred Technique/Tips and Tricks	180
20.3	Indications and Contraindications for Surgery	178	20.5.1	Acute Lunotriquetral Ligament Repair vs Reconstruction with Distally Based Extensor Carpi Ulnaris Strip	180
20.4	Literature Review and Different Surgical Techniques	178	20.5.2	Tips and Tricks	184
20.4.1	Debridement	178	20.6	Essential Rehabilitation Points	185
20.4.2	Direct Ligament Repair	179	20.7	Conclusion	185
20.4.3	Ligament Reconstruction	179		References	185
20.4.4	Arthrodesis	179			
21.	Chronic Injury Management of the LT Joint: Open Treatment	187			
	<i>Thomas Pillukat, Martin Langer, and Jörg van Schoonhoven</i>				
21.1	Introduction	187	21.5	Classification	187
21.2	Clinical Examination	187	21.6	Surgical Treatment	188
21.3	X-Rays	187	21.6.1	Soft Tissue Procedures	189
21.4	Arthroscopy	187	21.6.2	Lunotriquetral Fusion	189

21.6.3	Radiolunate (RL) and Radioscapholunate (RSL) Fusion	189	21.8.1	Ligament Reconstruction	190
21.6.4	Total Wrist Fusion	189	21.8.2	Postoperative Treatment	192
21.6.5	Wrist Denervation	189	21.8.3	Tips and Tricks	192
21.7	Literature Review	189	21.8.4	Lunotriquetral Fusion	192
21.7.1	Soft Tissue Procedures	189	21.8.5	RL/RSL Fusion	193
21.7.2	Lunotriquetral Fusion	190	21.8.6	Midcarpal and Total Wrist Fusion	193
21.7.3	Salvage Procedures	190	21.8.7	Wrist Denervation	195
21.8	Authors' Preferred Technique	190	21.9	Conclusion	195
				References	196
22.	Acute and Chronic Management of LT Ligament Injury: Arthroscopic Treatment	198			
	<i>Jan Ragnar Haugstvedt and István Zoltán Rigó</i>				
22.1	Introduction	198	22.5	Chronic Management	199
22.2	Acute Injury	198	22.5.1	Ligament Reconstruction	199
22.3	Acute Management	198	22.5.2	Arthrodesis	203
22.4	Subacute Management	198		References	205
23.	LT Ligament Injury (Disorders) and Instability Associated to Ulnocarpal Abutment Syndrome: Ulnar-Shortening Osteotomy	206			
	<i>Toshiyasu Nakamura</i>				
23.1	Ulnocarpal Abutment Syndrome	206	23.4	Diagnosis of the LT Injury with Ulnocarpal Abutment Syndrome	207
23.2	Lunotriquetral Ligament (LT) Injury ...	206	23.5	Treatments	208
23.3	Symptom of the LT Ligament Injury with the Ulnocarpal Abutment Syndrome	206	23.5.1	Conservative Treatment	208
			23.5.2	Surgical Treatment	209
				References	211

Section V: Extrinsic Ligament Injuries

24.	Perilunate Injuries	215			
	<i>Bo Liu and Feiran Wu</i>				
24.1	Introduction	215	24.4.2	Perilunate Fracture Dislocations	219
24.2	Classification	215	24.4.3	Postoperative Care	220
24.3	Assessment and Investigations	216	24.5	Clinical Results	221
24.4	Treatment	216	24.6	Conclusion	221
24.4.1	Perilunate Dislocations	216		References	221

25.	Perilunate Injuries Non-Dislocated	223		
	<i>Guillaume Herzberg, Marion Burnier, and Lyliane Ly</i>			
25.1	Introduction	223	25.4	Discussion
25.2	Acute PLIND Cases	223		References
25.3	Chronic PLIND Cases	224		
26.	Axial Carpal Dislocations and Fracture Dislocations	228		
	<i>Alex Lluch, Ana Scott-Tennent, Mireia Esplugas, and Marc Garcia-Elias</i>			
26.1	Introduction	228	26.3	Literature Review and Different Surgical Treatment
26.1.1	Mechanism of Injury	228		
26.1.2	Historical Perspective and Classification ...	228	26.4	Essential Rehabilitation Points
26.2	Indications and Contraindications for Surgery	231	26.5	Conclusion
				References
27.	Classification and Treatment of Nondissociative Proximal Row Instability	234		
	<i>Andrea Atzei, Riccardo Luchetti, Pedro J. Delgado, and Carlos Heras-Palou</i>			
27.1	Introduction and Historical Perspective	234	27.5	Options of Treatment for Proximal Row Instability
27.2	Kinematic Dysfunction of the Unstable Proximal Row	235	27.5.1	Treatment of Volar Proximal Row Instability (V-PRI)
27.3	Classification of Proximal Row Instability	238	27.5.2	Treatment of Dorsal Proximal Row Instability (D-PRI)
27.4	Clinical Presentation of Proximal Row Instability	239	27.5.3	Treatment of Combined Proximal Row Instability (C-PRI)
27.4.1	Physical Examination	240	27.6	Conclusions
27.4.2	Advanced Investigations	242		References

Section VI: Other Injuries

28.	Ligament Injuries Associated to Distal Radius Fractures	253		
	<i>Tommy R. Lindau</i>			
28.1	Introduction	253	28.2.3	Triangular Fibrocartilage Complex (TFCC) Injuries
28.2	Indications for Arthroscopy	253	28.2.4	Intercarpal Ligament Injuries
28.2.1	The Arthroscopic Procedure—"Dry" or Wet?	254	28.2.5	Scapholunate (SL) Ligament Injuries
28.2.2	The Arthroscopic Procedure—Arthroscopic Assessment	254	28.2.6	Lunotriquetral (LT) Ligament Injuries
