

Contents

1 The Periodic Table of Elements and Basic Consequences for the Structure of Natural Substances and the Course of Biochemical Processes	1
1.1 Elements of the Periodic Table	1
1.2 Biological Relevant Elements, the Singular Roles of Which can be Derived from Intrinsic Properties within the Periodic System of Elements (PSE)	4
1.2.1 Atom Radii	5
1.2.2 Ion Radii and Ionization Energies	15
1.2.3 Electron Affinity	17
1.2.4 Solubility in Water	17
1.2.5 Reactivity Towards Oxygen: Oxides, Hydroxides and Oxoacids	18
1.2.6 Electronegativity	21
1.2.7 Element-Element Single Bonds	23
1.2.8 Branching of Chains	32
1.2.9 Stoichiometric Valences, Element-Hydrogen Compounds, Molecule Geometries	33
1.2.10 Molecule Geometries as an Evolutionary Criterion	40
1.2.11 Hydrogen Bonds	43
1.2.12 Nucleophilicity	46
1.2.13 Oxidation Numbers and Oxygen Compounds	52
1.2.14 Ester of Inorganic Acids and Their Evolutionary Potential	64
2 Extrinsic Properties that Favor the Occurrence of Elements in Biological Context	81
2.1 The Frequency of Occurrence of the Element Concerned and Its Distribution on Earth	81
2.2 Reactivity Under Earth Conditions	86
2.2.1 Reactions with Water and the Electrochemical Voltage Series	87

2.2.2	The Role of Oxygen	89
2.2.3	Solubility in Water: Oxides, Hydroxides, Salts and Complex Compounds.	92
2.2.4	Biocatalysis by Enzymes	98
3	The Derivatization of Inorganic Compounds with Carbon Residues	101
3.1	Water, Alcohols and Ethers	101
3.2	Ammonia and Amines	106
3.3	Carboxylic Acids	111
4	The Singular Properties of Carbon as the Basis for the Emergence of Life	113
4.1	The Redox Chemistry of Carbon.	114
4.1.1	C–C Bond Formation Reactions.	117
4.1.2	Dehydrogenation of Alkanes	122
4.1.3	Organic Peroxides	129
4.1.4	Alcohols	133
4.1.5	Carbonyl Compounds—Aldehydes and Ketones.	146
4.1.6	Carboxylic Acids	171
4.1.7	Carbonic Acid and Derivatives.	194
5	From Chemical Structures and Individual Reactions to Complex Biochemical Networks	209
6	Determinism, Flexibility, and Contingency in Biochemistry	213
7	“Synthetic Chemistry” <i>versus</i> Biochemistry.	217
