

Contents

1	Introduction and Motivation	1
1.1	Megatrends and Their Impact on Product Development	1
1.1.1	A New Level of Individualization	2
1.1.2	Globalisation 2.0	3
1.1.3	New Consumption Structure	5
1.1.4	Technology Convergence and Stronger Innovation Dynamics	5
1.2	Consequences for Businesses	5
1.3	Resulting Challenges for Product Development	8
1.4	Modular Product Structures as a Solution Strategy	9
1.5	Aim and Structure of This Book	11
1.5.1	Target Audience	11
1.5.2	Focus	11
1.5.3	Objectives and Key Messages	12
1.5.4	Overview and Structure	13
	Literature.	14
2	Interrelationships and Effects of Product Variety	17
2.1	Causes of Variety	17
2.1.1	External Causes	17
2.1.2	Internal Causes.	20
2.2	External Product Variety and Its Effects	26
2.2.1	External Product Variety	26
2.2.2	Impact of a High External Product Variety	28
2.3	Internal Product Variety and Its Effects	30
2.3.1	Internal Product Variety	30
2.3.2	Resulting Complicacy and Complexity	31
2.3.3	Overarching Effects Over the Life Phases	36
2.3.4	Separate Occurrence of Cause and Effect	40
2.3.5	Delayed and Gradual Occurrence	41
2.3.6	Cost Stickiness (Asymmetric Dynamic)	43
2.4	Resulting Costs of Product Variety	44

2.4.1	Overview of Cost Categories	44
2.4.2	Cost Effects of High Internal Variety	45
2.5	Possible Strategies	47
2.5.1	Reducing the Diversity of Supply	48
2.5.2	Increasing Product Benefits	50
2.5.3	Reduction of Complexity	51
2.5.4	Avoiding Complexity	52
2.5.5	Configuration of New Product Variants	52
2.6	Possibilities of Cost Assessment	53
	Literature	56
3	Basics and Terms	61
3.1	The Product Program and Its Structure	62
3.2	Terms of Product Architecture	65
3.2.1	Requirements, Properties and Technical Characteristics	66
3.2.2	Functions and Functional Structures	68
3.2.3	Product Structure	72
3.2.4	Product Architecture	73
3.3	Modes of Construction	75
3.3.1	Integral and Differential Mode of Construction	75
3.3.2	Distinction from Modular Mode of Construction	78
	Literature	79
4	The Potential of Modular Product Families	81
4.1	Views on Modularity in Research	82
4.1.1	View of Coupling, Decoupling, and Interfaces	82
4.1.2	Technical View	85
4.1.3	Functional Approaches	86
4.1.4	Process and Organizational View	87
4.1.5	Product-Strategical View	90
4.2	Definition of Modularity	90
4.3	Characteristics of Modularity	92
4.3.1	Decoupling	92
4.3.2	Commonal Use	93
4.3.3	Combinability	93
4.3.4	Interface Standardization	94
4.3.5	Function Binding	94
4.4	Potentials of Modular Product Structures	96
4.4.1	Concept of the Life Phases	96
4.4.2	Product Development	98
4.4.3	Procurement	100
4.4.4	Production and Assembly	100
4.4.5	Sales and Distribution	101

4.4.6	Product Use and Maintenance	102
4.4.7	Maintenance	103
4.4.8	Recycling	104
4.4.9	Summarizing the Concept of Module Drivers	104
4.5	Risks of Modularisation	105
4.6	Design for Variety	107
4.6.1	Differentiation of Standard and Variant Components	109
4.6.2	Reduction of Variant Components	109
4.6.3	One-to-One Mapping	111
4.6.4	Decoupling of Components	112
	Literature	113
5	Modular Product Structure Strategies	117
5.1	Overview of Modular Product Structure Strategies	118
5.1.1	Generic Procedure of Modularization	119
5.1.2	Definition of Product Structure Strategy	123
5.1.3	“Solution Space” of Product Structure Strategies	124
5.2	Specific Details of the Product Structure Strategy	129
5.2.1	Comprehensive Multiple Use of Modules/Common Module Strategy	130
5.2.2	Size Range Series	132
5.2.3	Modular Kit Strategy	133
5.2.4	Platform Strategy	137
5.3	Development of a Product Structure Strategy	140
	Literature	141
6	Methods for the Development of Modular Product Families	143
6.1	Terms of Processes, Methods and Tools	144
6.2	Methods for Program Planning	145
6.2.1	Forward Planning	146
6.2.2	Market Analysis	150
6.2.3	Program Planning	152
6.3	Product Variety Management and Design-for-Variety	153
6.3.1	Design-for-Variety	155
6.3.2	Key Figures for Variety-Optimized Product Design	160
6.4	Modularization	166
6.4.1	Basic Procedure of Modularization	167
6.4.2	Modularization According to Technical-Functional Aspects	167
6.4.3	Modularization According to Organizational and Process Aspects	173
6.4.4	Product Strategic and Integrative Modularization Methods	176
6.4.5	Key Figures for Modularity	182
6.5	Evaluation Procedures	185
6.5.1	Material Number Cost Methods (Average Cost Methods)	186

6.5.2	Time Driven Activity-Based Costing	187
6.5.3	Complexity Cost Prognosis and Complexity Cost Evaluation for Modular Product Family Concepts	188
6.6	The Integrated PKT Approach for the Development of Modular Product Families	190
6.6.1	Motivation and Objectives of the Integrated PKT Approach.	191
6.6.2	Basic Strategy of the Approach	192
6.6.3	Overview of the Method Units of the Approach	196
6.6.4	Presentation of Selected Method Units of the Integrated PKT Approach	199
6.6.5	Application Studies on the Approach	216
	Literature.	217
7	Effects on Product Development Processes and Future Trends	223
7.1	Classification of Modularization in the Processes of Product Development	224
7.1.1	Process Models of Product Development	225
7.1.2	Necessary Activities for the Sustainability of Modular and Variant Products	230
7.2	Product Individualization and Personalization	233
7.3	Demographic Change and the Development of Ageing-Appropriate Products	236
7.4	Modular Lightweight Design Products	237
	Literature.	240
8	Glossary	243
	Literature.	260
