

Contents

1	Fuel Consumption and Consumption Optimization	1
1.1	Fuel Consumption Optimization as an Economic Necessity	1
1.2	Fuel Consumption Optimization for the Environment	4
1.3	Energy Consumption Optimization for ALL Drive Systems	4
2	Vehicle and Energy Loss	7
2.1	Motion Resistance	7
2.2	Energy Consumption in a Vehicle with Combustion Engine	8
2.3	Energy Consumption of a Vehicle with an Electric Drivetrain	10
2.4	Factors that Influence Consumption	10
3	Vehicle Technology	13
3.1	Engine	14
3.1.1	E-machine	16
3.2	Drivetrain	17
3.2.1	Transmission	17
3.2.2	Axles	19
3.3	Auxiliary Consumers	21
3.4	Tires and Rolling resistance	24
3.5	Aerodynamics	25
3.5.1	Aerodynamics of the Driver's Cab	30
3.5.2	Optimization of Aerodynamics	33
3.6	Technical Aids for the Driver	39
3.6.1	Predictive Systems	40
3.7	Curb Weight	42
3.8	Full Trailers, Semitrailers and the Load	42
4	Operating Conditions of the Vehicle	45
4.1	Topography of the Route	45
4.2	Weather and Temperature	46
4.2.1	Vehicle with a Warmed-Up Engine	46

4.3	Traffic.....	46
4.3.1	Convoy Driving—Platooning.....	48
4.4	Speed.....	49
4.5	Loading.....	49
4.6	Consumption Reductions Through Optimized Operating Conditions.....	49
4.7	Reduced Consumption Through Optimized Logistics Concepts.....	50
5	The Influence of the Driver on Energy Consumption.....	53
5.1	Consumption Values of New Vehicles.....	54
6	Maintenance of the Vehicle and Service Fluids.....	55
6.1	Tire Pressure.....	55
6.2	Energy Content of the Fuel.....	56
6.3	Lubricating Oils.....	57
7	Concluding Remarks on the Topic of Energy Consumption.....	59
7.1	Measurement of the Fuel Consumption.....	59
7.2	Effect of External Factors on Fuel Efficiency.....	59
7.3	Scope of the Energy Efficiency Considerations.....	60
	Comprehension Questions.....	63
	Abbreviations and Symbols.....	65
	References.....	67
	Index.....	71
