Theory of Light Hydrogenic Bound States

With 108 Figures

Springer

Contents

1	Theoretical Approaches to the Energy Levels of Loosely Bound Systems	1
1.1	Nonrelativistic Electron in the Coulomb Field	1
1.2	Dirac Electron in the Coulomb Field	3
1.3	Bethe-Salpeter Equation and the Effective Dirac Equation	5
1.4	Nonrelativistic Quantum Electrodynamics	10
	References	11
2	General Features of the Hydrogen Energy Levels	13
2.1	Classification of Corrections	13
2.2	Physical Origin of the Lamb Shift	15
2.3	Natural Magnitudes of Corrections to the Lamb Shift	17
	References	18
3	External Field Approximation	19
3.1	Leading Relativistic Corrections with Exact Mass Dependence	19
3.2	Radiative Corrections of Order $\alpha^n(Z\alpha)^4 m$	22
3.2.1	Leading Contribution to the Lamb Shift	22
3.2.2	Radiative Corrections of Order $\alpha^2(Z\alpha)^4 m$	27
3.2.3	Corrections of Order $c^2(Z\alpha)^4 m$	29
3.2.4	Total Correction of Order $\alpha^n(Z\alpha)^4 m$	31
3.2.5	Heavy Particle Polarization Contributions of Order $\alpha(Z\alpha)^4 m$	32
3.3	Radiative Corrections of Order $\alpha^n(Z\alpha)^5 m$	36
3.3.1	Skeleton Integral Approach to Calculations of Radiative Corrections	36
3.3.2	Radiative Corrections of Order $\alpha(Z\alpha)^5 m$	38
3.3.3	Corrections of Order $\alpha^2(Z\alpha)^5 m$	40
3.3.4	Corrections of Order $\alpha^3(Z\alpha)^5 m$	47

3.4	Radiative Corrections of Order $a^n(Z\alpha)^6 m$	48
3.4.1	Radiative Corrections of Order $a(Z\alpha)^6 m$	48
3.4.2	Corrections of Order $a^2(Z\alpha)^6 m$	58
3.5	Radiative Corrections of Order $a(Z\alpha)^7 m$ and of Higher Orders	68
3.5.1	Corrections Induced by the Radiative Insertions in the Electron Line	68
3.5.2	Corrections Induced by the Radiative Insertions in the Coulomb Lines	73
3.5.3	Corrections of Order $a^2(Z\alpha)^7 m$	76
References		77
4	Essentially Two-Particle Recoil Corrections	81
4.1	Recoil Corrections of Order $(Z\alpha)^5(m/M)m$	81
4.1.1	Coulomb-Coulomb Term	83
4.1.2	Transverse-Transverse Term	85
4.1.3	Transverse-Coulomb Term	87
4.2	Recoil Corrections of Order $(Z\alpha)^6(m/M)m$	89
4.2.1	The Braun Formula	89
4.2.2	Lower Order Recoil Corrections and the Braun Formula	92
4.2.3	Recoil Correction of Order $(Z\alpha)^6\{m/M\}m$ to the S Levels	93
4.2.4	Higher Order in Mass Ratio Recoil Correction of Order $(Z\alpha)^6(m/M)^n m$ to the S Levels	94
4.2.5	Recoil Correction of Order $\{Z\alpha f(m/M)m$ to the Non-S Levels	94
4.3	Recoil Correction of Order $(Z\alpha)^7\{m/M\}$	95
References		98
5	Radiative-Recoil Corrections	99
5.1	Corrections of Order $a(Z\alpha)^5(m/M)m$	99
5.1.1	Corrections Generated by the Radiative Insertions in the Electron Line	99
5.1.2	Corrections Generated by the Polarization Insertions in the Photon Lines	101
5.1.3	Corrections Generated by the Radiative Insertions in the Proton Line	103
5.2	Corrections of Order $a(Z\alpha)^6(m/M)m$	105
References		107
6	Nuclear Size and Structure Corrections	109
6.1	Main Proton Size Contribution	109
6.1.1	Spin One-Half Nuclei	111
6.1.2	Nuclei with Other Spins	112
6.1.3	Empirical Nuclear Form Factor and the Contributions to the Lamb Shift	113

6.2	Nuclear Size and Structure Corrections of Order $(Z\alpha)^5 m$	114
6.2.1	Nuclear Size Corrections of Order $(Z\alpha)^5 m$	114
6.2.2	Nuclear Polarizability Contribution of Order $(Z\alpha)^5 m$ to S-Levels.	117
6.3	Nuclear Size and Structure Corrections of Order $(Z\alpha)^6 m$	121
6.3.1	Nuclear Polarizability Contribution to P-Levels.	121
6.3.2	Nuclear Size Correction of Order $\{Z\alpha f m$	122
6.4	Radiative Corrections to the Finite Size Effect	124
6.4.1	Radiative Correction of Order $a(Z\alpha)^5 (r^2) m f$ to the Finite Size Effect	124
6.4.2	Higher Order Radiative Corrections to the Finite Size Effect	127
6.5	Weak Interaction Contribution	127
	References	129
7	Lamb Shift in Light Muonic Atoms	131
7.1	Closed Electron-Loop Contributions of Order $a^n (Z\alpha)^2 m$	133
7.1.1	Diagrams with One External Coulomb Line	133
7.1.2	Diagrams with Two External Coulomb Lines	137
7.2	Relativistic Corrections to the Leading Polarization Contribution with Exact Mass Dependence.	138
7.3	Higher Order Electron-Loop Polarization Contributions	141
7.3.1	Wichmann-Kroll Electron-Loop Contribution of Order $a(Z\alpha)^4 m$	141
7.3.2	Light by Light Electron-Loop Contribution of Order $a^2 (Z\alpha)^3 m$	143
7.3.3	Diagrams with Radiative Photon and Electron-Loop Polarization Insertion in the Coulomb Photon. Contribution of Order $a^2 (Z\alpha)^4 m$	144
7.3.4	Electron-Loop Polarization Insertion in the Radiative Photon. Contribution of Order $a^2 \{Z\alpha\}^4 m$	145
7.3.5	Insertion of One Electron and One Muon Loops in the same Coulomb Photon. Contribution of Order $a^2 (Z\alpha)^2 \{m_e/m\}^2 m$	146
7.4	Hadron Loop Contributions	148
7.4.1	Hadronic Vacuum Polarization Contribution of Order $a(Z\alpha)^4 m$	148
7.4.2	Hadronic Vacuum Polarization Contribution of Order $a(Z\alpha)^5 m$	149
7.4.3	Contribution of Order $a^2 (Z\alpha)^4 m$ Induced by Insertion of the Hadron Polarization in the Radiative Photon	149
7.4.4	Insertion of One Electron and One Hadron Loops in the Same Coulomb Photon	150

7.5	Standard Radiative, Recoil and Radiative-Recoil Corrections . .	150
7.6	Nuclear Size and Structure Corrections.	151
7.6.1	Nuclear Size and Structure Corrections of Order $\{Z\alpha fm\}$	151
7.6.2	Nuclear Size and Structure Corrections of Order $(Z\alpha)m$	153
7.6.3	Radiative Corrections to the Nuclear Finite Size Effect	153
7.6.4	Radiative Corrections to Nuclear Polarizability Contribution.	155
	References.	158
8	Physical Origin of the Hyperfine Splitting and the Main Nonrelativistic Contribution	161
	References.	164
9	Nonrecoil Corrections to HFS	165
9.1	Relativistic (Binding) Corrections to HFS.	165
9.2	Electron Anomalous Magnetic Moment Contributions (Corrections of Order $a^n E_F$).	167
9.3	Radiative Corrections of Order $a^n (Z\alpha) E_F$	169
9.3.1	Corrections of Order $a(Z\alpha) E_F$	169
9.3.2	Corrections of Order $a^2 (Z\alpha) E_F$	173
9.3.3	Corrections of Order $a^3 (Z\alpha) E_F$	179
9.4	Radiative Corrections of Order $a^n (Z\alpha)^2 E_F$	180
9.4.1	Corrections of Order $a(Z\alpha)^2 E_F$	180
9.4.2	Corrections of Order $a^2 (Z\alpha)^2 E_F$	184
9.5	Radiative Corrections of Order $a(Z\alpha)^3 E_F$ and of Higher Orders.	185
9.5.1	Corrections of Order $a(Z\alpha)^3 E_F$	187
9.5.2	Corrections of Order $a^2 (Z\alpha)^3 E_F$ and of Higher Orders in a	190
	References.	190
10	Essentially Two-Body Corrections to HFS	193
10.1	Recoil Corrections to HFS.	193
10.1.1	Leading Recoil Correction.	193
10.1.2	Recoil Correction of Relative Order $(Z\alpha)^2 (m/M)$	195
10.1.3	Higher Order in Mass Ratio Recoil Correction of Relative Order $(Z\alpha)^2$	197
10.1.4	Recoil Corrections of Order $(Z\alpha)^2 (m/M) E_F$	197
10.2	Radiative-Recoil Corrections to HFS.	198
10.2.1	Corrections of Order $a(Z\alpha)(m/M) E_F$ and $(Z^2\alpha)(Z\alpha)(m/M) E_F$	198
10.2.2	Electron-Line Logarithmic Contributions of Order $a(Z\alpha)(m/M) E_F$	200

10.2.3	Electron-Line Nonlogarithmic Contributions of Order $a\{Za\}(m/M)E_F$	201
10.2.4	Muon-Line Contribution of Order $(Z^2a)(Za)\{m/M\}E_F$	202
10.2.5	Leading Photon-Line Double Logarithmic Contribution of Order $a\{Za\}(m/M)E_F$	203
10.2.6	Photon-Line Single-Logarithmic and Nonlogarithmic Contributions of Order $a(Za)\{m/M\}E_F$	204
10.2.7	Heavy Particle Polarization Contributions of Order $a\{Za\}E_F$	205
10.2.8	Leading Logarithmic Contributions of Order $a^2(Za)(m/M)E_F$	206
10.2.9	Leading Four-Loop Contribution of Order $a^3(Za)(m/M)E_F$	209
10.2.10	Corrections of Order $a(Za)(m/M)^nE_F$	209
10.2.11	Corrections of Orders $a\{Za\}^2(m/M)E_F$ and $Z^2a(Za)^2\{m/M\}E_F$	210
10.3	Weak Interaction Contribution	211
	References	213
