

Chapter 0

0. Introduction	1
1. Summary	13

Chapter 1

2. Quadrilateral singularities and elliptic K3 surfaces	17
3. Theory of lattices	21
4. Analysis of the lattice P	25
5. Root modules	33
6. Elementary transformations and tie transformations	45
7. The Hasse symbol and the Hilbert symbol	49
8. The Coxeter-Vinberg graph	54

Chapter 2

9. Theorems with the Ik-conditions for $J_{3,0}$, $Z_{1,0}$ and $Q_{2,0}$	60
10. A transcendental isotropic cycle	67
11. A transcendental cycle with a positive self-intersection number	75
12. Nikulin's lattice theory	82
13. Combinations of graphs of type A	83
14. The exceptions in Theorem 0.3	94

Chapter 3

15. Obstruction components	98
16. Theorems with the Ik-conditions for $W_{1,0}$	102
17. Two singular fibers of type I^* in the case $W_{1,0}$	106
18. A singular fiber of type II^* , III^* , IV^* in the case $W_{1,0}$	120
19. Combinations of graphs of type A in the case $W_{1,0}$	122
20. The basic graphs for $S_{1,0}$	129
21. The second reduction for $S_{1,0}$ 1	141
22. The second reduction for $S_{1,0}$ 2	146
23. The second reduction for $S_{1,0}$ 3	150
24. The second reduction for $S_{1,0}$ 4	158
25. Two singular fibers of type I^* in the case $S_{1,0}$	162
26. A singular fiber of type II^* , III^* , IV^* in the case $S_{1,0}$	173
27. Combinations of graphs of type A in the case $S_{1,0}$	175

Chapter 4

28.	Concept of co-root modules	185
29.	Theorems with the Ik-conditions for $U_{1,0}$	192
30.	Elliptic K3 surfaces with 3 sections	203
31.	Graphs with a component of type D , the case of $U_{1,0}$	207
32.	Graphs with a component of type E , the case of $U_{1,0}$	213
33.	Combinations of graphs of type A in the case $U_{1,0}$	217
34.	The exceptions in the case $U_{1,0}$	223
