

Paul R. Bonenberger

The First Snap-Fit Handbook

Creating and Managing Attachments
for Plastic Parts

2nd Edition

HANSER

Hanser Publishers, Munich • Hanser Gardner Publications, Cincinnati

Contents

1 Snap-Fits and the Attachment Level™ Construct	1
1.1 Introduction	1
1.2 Reader Expectations	2
1.3 Snap-Fit Technology	4
1.4 Feature Level and Attachment Level	6
1.5 Using this Book	8
1.5.1 The Importance of Sample Parts	8
1.5.2 Snap-Fit Novices	8
1.5.3 Experienced Designers	10
1.5.4 Design for Assembly Practitioners	10
1.5.5 Engineering Managers and Executives	10
1.6 Chapter Synopses	10
1.7 Extending the ALC to Other Attachments	11
1.8 Summary	11
1.8.1 Important Points in Chapter 1	12
2 Overview of the Attachment Level™ Construct	14
2.1 Introduction	14
2.2 The Key Requirements	14
2.2.1 Strength	16
2.2.2 Constraint	17
2.2.2.1 Improper Constraint	19
2.2.3 Compatibility	20
2.2.4 Robustness	21
2.3 Elements of a Snap-Fit	25
2.3.1 Function	27
2.3.1.1 Action	27
2.3.1.2 Attachment type	27
2.3.1.3 Retention	28
2.3.1.4 Lock type	29
2.3.1.5 Function Summary	29
2.3.2 Basic Shapes	29
2.3.2.1 Mating Part and Base Part	31
2.3.2.2 Basic Shape Descriptions	31
2.3.2.3 Basic Shape Summary	33

2.3.3 Engage Direction	35
2.3.4 Assembly Motion	38
2.3.5 Constraint Features	40
2.3.5.1 Locator Features	40
2.3.5.2 Lock Features	41
2.3.6 Enhancements	43
2.3.7 Elements Summary	44
2.4 Summary	45
2.4.1 Important Points in Chapter 2	46
2.4.2 Important Design Rules Introduced in Chapter 2	46
3 Constraint Features	47
3.1 Introduction	47
3.2 Locator Features	47
3.2.1 Locator Styles	48
3.2.1.1 Lug	48
3.2.1.2 Tab	48
3.2.1.3 Wedge	49
3.2.1.4 Cone	49
3.2.1.5 Pin	50
3.2.1.6 Catch	50
3.2.1.7 Surface	50
3.2.1.8 Land	50
3.2.1.9 Edge	51
3.2.1.10 Hole	52
3.2.1.11 Slot	52
3.2.1.12 Cutout	52
3.2.1.13 Living Hinge	54
3.2.2 Design Practices for Locator Pairs	55
3.2.2.1 Terminology	55
3.2.2.2 Locator Pairs, Constraint and Strength	57
3.2.2.3 Locator Pairs and Ease of Assembly	62
3.2.2.4 Locator Pairs and Dimensional Control	62
3.2.2.5 Locator Pairs and Mechanical Advantage	65
3.2.2.6 Locator Pairs and Compliance	67
3.2.2.7 Locators Summary	67
3.3 Lock Features	67
3.3.1 Lock Feature Styles	68
3.3.2 Cantilever Beam Locks	68
3.3.2.1 The Deflection Mechanism	69
3.3.2.2 The Retention Mechanism	70
3.3.2.3 Cantilever Lock Examples	74
3.3.2.4 Locators as Cantilever Locks	74
3.3.2.5 Lock Pairs	77

3.3.2.6 Cantilever Lock Assembly Behavior	78
3.3.2.7 Cantilever Lock Retention and Disassembly Behavior	80
3.3.3 Planar Locks	84
3.3.4 Trap Locks	85
3.3.4.1 Trap Assembly Behavior.	87
3.3.4.2 Trap Retention and Disassembly	87
3.3.4.3 Traps and Lock Efficiency	89
3.3.5 Torsional Lock.	90
3.3.6 Annular Lock	91
3.3.7 Lock Pairs and Lock Function	91
3.4 Selecting a Locking Feature	92
3.5 Summary.	92
3.5.1 Important Points in Chapter 3.	93
3.5.2 Design Rules Introduced in Chapter 3	93
4 Enhancements.	95
4.1 Introduction	95
4.2 Enhancements for Assembly	96
4.2.1 Guidance Enhancements	96
4.2.1.1 Guides.	97
4.2.1.2 Clearance.	98
4.2.1.3 Pilots.	99
4.2.2 Product Example 1	101
4.2.3 Product Example 2	102
4.2.4 Product Example 3	102
4.2.5 Operator Feedback	104
4.2.6 Product Example #3 Revisited	108
4.2.7 Assembly Enhancements Summary	109
4.3 Enhancements for Activating and Using Snap-Fits	109
4.3.1 Visuals	109
4.3.2 Assists	111
4.3.3 User Feel	113
4.4 Enhancements for Snap-Fit Performance.	114
4.4.1 Guards	114
4.4.2 Retainers.	115
4.4.3 Compliance	115
4.4.3.1 Compliance through Local Yield	117
4.4.3.2 Compliance through Elasticity	119
4.4.3.3 Isolators.	119
4.4.4 Back-Up Locks	119
4.5 Enhancements for Snap-Fit Manufacturing	120
4.5.1 Process-Friendly.	121
4.5.2 Fine-Tuning.	125

4.6	Summary	128
4.6.1	Important Points in Chapter 4	128
4.6.2	Design Rules Introduced in Chapter 4	131
5	Fundamental Snap-Fit Concepts	135
5.1	The Importance of Constraint	135
5.1.1	Constraint Review	136
5.1.2	Constraint Principles	136
5.1.2.1	Perfect Constraint	136
5.1.2.2	Proper Constraint	139
5.1.2.3	Proper Constraint in Less than 12 DOM	139
5.1.2.4	Under-Constraint	139
5.1.2.5	Over-Constraint	140
5.1.2.6	General Constraint Rules	141
5.1.3	The Constraint Worksheet	143
5.1.4	Additional Comments on Constraint	151
5.2	Lock Decoupling	151
5.2.1	The Lock Feature Paradox	151
5.2.2	Decoupling Examples	151
5.2.3	Levels of Decoupling	153
5.2.3.1	No Decoupling (Level 0)	153
5.2.3.2	Level 1 Decoupling	154
5.2.3.3	Level 2 Decoupling	155
5.2.3.4	Level 3 Decoupling	156
5.2.3.5	Level 4 Decoupling	156
5.2.4	Decoupling Summary	159
5.3	Summary	160
5.3.1	Important Points in Chapter 5	160
5.3.2	Design Rules Introduced in Chapter 5	160
6	Feature Design and Analysis	162
6.1	Pre-Conditions for Feature Analysis	163
6.2	Material Property Data Needed for Analysis	163
6.2.1	Sources of Materials Data	163
6.2.2	Assumptions for Analysis	164
6.2.3	The Stress-Strain Curve	165
6.2.4	Establishing a Design Point	168
6.2.4.1	For Applications Where Strain is Fixed	169
6.2.4.2	For Applications Where Strain is Variable	170
6.2.4.3	Materials With a Definite Yield Point	170
6.2.4.4	Materials Without a Definite Yield Point	170
6.2.4.5	The Secant Modulus	171
6.2.4.6	Maximum Permissible Strain Data	171

6.2.5	Coefficient of Friction (μ)	173
6.2.6	Other Effects	173
6.3	Cantilever Hook Design Rules of Thumb	176
6.3.1	Beam Thickness at the Base	178
6.3.2	Beam Length	179
6.3.3	Insertion Face Angle	180
6.3.4	Retention Face Depth	180
6.3.5	Retention Face Angle	181
6.3.6	The Threshold Angle	182
6.3.7	Beam Thickness at the Retention Feature	182
6.3.8	Beam Width	184
6.3.9	Other Features	185
6.4	Initial Strain Evaluation	185
6.5	Adjustments to Calculations	186
6.5.1	Adjustment for Stress Concentration	186
6.5.2	Adjustment for Wall Deflection	188
6.5.3	Adjustment for Mating Feature Deflection	190
6.5.4	Adjustments for Effective Angle	193
6.5.4.1	Effective Angle for the Insertion Face	193
6.5.4.2	Effective Angle for the Retention Face	195
6.5.5	Adjustments Summary	197
6.6	Assumptions for Analysis	197
6.7	Using Finite Element Analysis	198
6.8	Determine the Conditions for Analysis	198
6.9	Cantilever Hook Analysis for a Constant Rectangular Section Beam	199
6.9.1	Section Properties and the Relation between Stress and Strain	199
6.9.2	Evaluating Maximum Strain	201
6.9.2.1	Adjusting Maximum Allowable Strain for Stress Concentrations	202
6.9.2.2	Calculating the Maximum Applied Strain in a Constant Section Beam	202
6.9.2.3	Adjusting the Calculated Strain for Deflection Magnification	202
6.9.3	Calculating Deflection Force	203
6.9.4	Adjusting for Mating Part/Feature Deflection	204
6.9.5	Determine Maximum Assembly Force	205
6.9.5.1	Determine the Effective Insertion Face Angle	205
6.9.6	Determine Release Behavior	206
6.9.6.1	Calculate the Effective Retention Face Angles	206
6.9.6.2	Calculate the Separation Forces	207
6.9.6.3	Other Retention Considerations	208
6.10	Cantilever Hook Tapered in Thickness	209
6.11	Cantilever Hook Tapered in Width	211
6.12	Cantilever Hook Tapered in Thickness and Width	212
6.13	Modifications to the Insertion Face Profile	212

6.14	Modifications to the Retention Face Profile	215
6.15	Other Feature Calculations	215
6.16	Summary	216
6.16.1	Important Points in Chapter 6	216
7	The Snap-Fit Development Process	218
7.1	Introduction	218
7.1.1	Concept Development vs. Detailed Design	219
7.1.2	A General Development Process	219
7.2	The Snap-Fit Development Process	224
7.2.1	Is the Application Appropriate for a Snap-Fit? (Step 0).	224
7.2.2	Define the Application (Step 1).	228
7.2.3	Benchmark (Step 2)	230
7.2.3.1	Rules for Benchmarking	231
7.2.4	Generate Multiple Attachment Concepts (Step 3).	232
7.2.4.1	Select Allowable Engage Directions (Step 3.1).	233
7.2.4.2	Identify All Possible Assembly Motions (Step 3.2)	234
7.2.4.3	Engage Directions, Assembly Motions and Worker Ergonomics	236
7.2.4.4	Select and Arrange Constraint Pairs (Step 3.3).	237
7.2.4.5	Add Some Enhancement Features (Step 3.4)	242
7.2.4.6	Select the Best Concept for Feature Analysis and Detailed Design (Step 3.5)	242
7.2.5	Feature Analysis and Design (Step 4).	243
7.2.5.1	Lock Alternatives	245
7.2.6	Confirm the Design with Parts (Step 5)	249
7.2.7	Fine-Tune the Design (Step 6)	250
7.2.8	Snap-Fit Application Completed (Step 7)	250
7.3	Summary	250
7.3.1	Important Points in Chapter 7.	250
8	Diagnosing Snap-Fit Problems	255
8.1	Introduction	255
8.1.1	Rules for Diagnosing Snap-Fit Problems	256
8.1.2	Mistakes in the Development Process.	256
8.2	Attachment Level Diagnosis	257
8.2.1	Most Likely Causes of Difficult Assembly	258
8.2.2	Most Likely Causes of Distorted Parts	258
8.2.3	Most Likely Causes of Feature Damage	258
8.2.4	Most Likely Causes of Loose Parts	259
8.3	Feature Level Diagnosis	259
8.4	Summary	264
8.4.1	Important Points in Chapter 8.	264

9 Creating a Snap-Fit Capable Organization—Beyond Individual Expertise	266
9.1 Introduction	266
9.2 Terminology	267
9.3 Harmful Beliefs	268
9.4 Suggested Initiatives	271
9.4.1 Initiatives for Getting Started	271
9.4.2 Initiatives for Developing Organizational Capability	272
9.5 The Snap-Fit Capability Plan	272
9.5.1 Vision, Mission, and Values	274
9.5.2 Objectives	274
9.5.2.1 Essential Objectives for Individual Capability	274
9.5.2.2 Recommended Objectives for a Snap-Fit Capable Organization	275
9.5.3 Strategies	275
9.5.3.1 Near-Term Strategies	275
9.5.3.2 Long-Term Strategies	275
9.6 Details of the Initiatives	276
9.6.1 Provide Education and Training	276
9.6.2 Provide Technical Resources	276
9.6.3 Identify Low-Risk Applications as a Starting Point	278
9.6.4 Use Physical Models	278
9.6.5 Provide Benchmarking Opportunities	279
9.6.6 Include Snap-Fit Technical Requirements in the Bidding and Purchasing Processes	279
9.6.7 Identify Intermediate Applications	281
9.6.8 Identify and Empower a Snap-Fit “Champion”	282
9.6.9 Identify and Empower a Snap-Fit “Technology Leader”	282
9.6.10 Make Snap-Fits Visible within the Organization	282
9.6.11 Link the Snap-Fit Effort to Other Business Strategies	283
9.6.12 Create and Maintain a Library of Preferred Concepts	283
9.6.13 Have a Model of the Snap-Fit Technical Domain	284
9.6.14 Reward Teamwork and Make Snap-Fits Interesting	288
9.6.15 Identify Supportive Customers and Suppliers	288
9.6.16 Initiatives Summary	288
9.7 Summary	288
9.7.1 Important Points in Chapter 9	290
9.7.2 Cautions	290
Appendix A—Resources	292
Index	294
