

# Contents

<b>Introduction</b>	<b>1</b>
<b>1. Structural Superplasticity</b>	<b>4</b>
1.1 Phenomenology and Influence of the Initial Microstructure	4
1.2 Structure Evolution and Fracture Modes	21
<b>2. The Nature of Superplastic Flow</b>	<b>30</b>
2.1 Experimental Investigations of Superplastic Deformation	30
2.1.1 Grain Boundary Sliding	31
2.1.2 Intragranular Deformation	40
2.1.3 Diffusion Creep	52
2.1.4 The Interrelationship and the Role of Different Deformation Mechanisms in Superplastic Flow	58
2.2 Micromechanisms and the Theory of Superplastic Deformation	61
2.2.1 Physical Models	62
2.2.2 Grain Boundaries in the Deformation Processes	67
2.2.3 A New Model of Structural Superplasticity	76
<b>3. Microcrystalline Materials and Microstructure Refining</b>	<b>92</b>
3.1 Structure and Properties of Microcrystalline Materials	92
3.2 Metallurgical Methods of Refinement	99
3.3 Heat Treatment	102
<b>4. Superplastic Deformation of Magnesium Alloys</b>	<b>117</b>
4.1 Effect of Chemical Composition, Structure, and Temperature-Rate Conditions of Deformation on Ductility	118
4.2 Refining of the Magnesium Alloy Structure	126
4.3 Effect of Superplastic Deformation on the Properties of the Alloys	133
<b>5. Superplasticity of Commercial Aluminium Alloys</b>	<b>148</b>
5.1 Effect of Structure, Conditions of Deformation, and Chemical Composition on the Superplasticity of Aluminium Alloys	149

5.1.1	Effect of Structure and Conditions of Deformation. Strain Rate .....	150
5.1.2	Effect of Chemical Composition .....	154
5.2	Processing Methods for Obtaining Microcrystalline Structure in Commercial Aluminium Alloys .....	160
5.3	Effect of Superplastic Deformation on the Structure and Properties of Aluminium Alloys .....	164
5.4	Effect of Grain Size on the Structural Strength of Aluminium Alloys .....	171
6.	<b>Superplasticity of Titanium Alloys .....</b>	<b>175</b>
6.1	Plasticity and Superplasticity of the Titanium Alloys in the Single-Phase Region .....	176
6.2	Superplasticity of Titanium Alloys in the Two-Phase Region ..	188
6.3	Methods of Obtaining Microcrystalline Structure in Titanium Alloys .....	199
6.4	The Effect of Superplastic Deformation on the Mechanical Properties of the Titanium Alloys .....	202
7.	<b>Structural Superplasticity of Steels .....</b>	<b>210</b>
7.1	Superplasticity of Iron, Plain Carbon, and Alloyed Steels ....	210
7.2	Preparation of Fine-Grained Microstructure in Steels .....	221
7.3	Effect of Superplastic Deformation on Mechanical Properties .	225
8.	<b>Superplasticity of Nickel-based Superalloys .....</b>	<b>231</b>
8.1	Effect of Structure, Deformation Temperature and Strain Rate on the Ductility of Alloys .....	233
8.2	Methods for Converting Alloys into a Superplastic State ....	243
8.3	High-Temperature Properties of Alloys After Processing in the Superplastic Condition .....	251
9.	<b>Superplasticity of Intermetallic Compounds .....</b>	<b>256</b>
9.1	Superplasticity of Alloys with Both Intermetallic and Metallic Phases .....	258
9.2	Superplasticity of Intermetallic Compounds .....	261
9.3	Refining of Microstructure in Intermetallics .....	268
9.4	Effect of Superplastic Treatment on the Physico-mechanical Properties of Intermetallics .....	272
9.4.1	Mechanical Properties Under Ductile-Brittle Transition .....	272
9.4.2	Mechanical Properties at Room Temperature .....	275
9.4.3	Magnetic Properties .....	277

**10. Superplasticity of Ceramics** ..... 279

    10.1 Influence of Structure and Strain Conditions  
        on the Superplasticity of Ceramics ..... 280

    10.2 Mechanisms of Superplastic Deformation of Ceramics ..... 292

    10.3 Methods for Creating Microcrystalline Structures in Ceramics . 293

    10.4 Influence of Superplastic Deformation  
        on the Properties of Ceramics ..... 297

**References** ..... 299

**Subject Index** ..... 313

**Author Index** ..... 317
