Part I An Introduction to Retrial Queueing Systems

1	Introduction and Motivating Examples	3
1.1	Introduction	3
1.2	Some Examples in Telephone Systems	4
1.3	Some Examples in Computer Networks	7
1.4	Bibliographical Notes	10
2	A General Overview	11
2.1	The Mathematical Formalism	11
2.2	Comparing Standard and Retrial Queueing Systems	16
2.2.1	The Main $M/M/c$ Model	16
2.2.2	The Main $M/G/1$ Model	24
2.3	Short Description of Some Advanced Retrial Queueing Systems	31
2.4	Bibliographical Notes	34

Part II Computational Analysis of Performance Descriptors

3	Limiting Distribution of the System State	39
3.1	The $M/G/1$ Retrial Queue	39
3.1.1	The Embedded Markov Chain Approach	39
3.1.2	The Regenerative Approach	41
3.1.3	The Maximum Entropy Approach	44
3.2	The $M/G/1$ Queue with General Retrial Times	51
3.3	The $Geo/G/1$ Retrial Queue	56
3.4	The $M/M/c$ Retrial Queue	64
3.4.1	Approximations Based on Truncated Models	64
3.4.2	Approximations Based on Generalized Truncated Models	68
3.4.3	The RTA Approximation	77

3.4.4	The Fredericks and Reisner Approximation	80
3.4.5	Approximations by Interpolation	84
3.5	A Multiserver Retrial Queue with Finite Population	87
3.6	Bibliographical Notes	91
4	Busy Period	95
4.1	The $M/G/1$ Retrial Queue	95
4.1.1	The Length of the Busy Period.....	95
4.1.2	The Number of Customers Served	105
4.1.3	Maximal Queue Length in a Busy Period	108
4.2	The $M/M/c$ Retrial Queue	111
4.2.1	The Length of the Busy Period.....	112
4.2.2	The Number of Customers Served	123
4.2.3	Maximal Queue Length in a Busy Period	124
4.3	Bibliographical Notes	129
5	Waiting Time	131
5.1	The $M/G/1$ Retrial Queue	131
5.1.1	Waiting Time Distribution	131
5.1.2	The Number of Retrials Made by a Customer	143
5.2	The $M/M/c$ Retrial Queue	149
5.2.1	Waiting Time Distribution	149
5.2.2	The Number of Retrials Made by a Customer	155
5.3	Bibliographical Notes	158
6	Other Descriptors	159
6.1	Attempts Since the Last Service Completion	159
6.2	Successful versus Blocked Events	164
6.3	Server Idle Periods	174
6.4	Time to Reach a Certain Orbit Level	179
6.5	Bibliographical Notes	182

Part III Retrial Queueing Systems Analyzed Through the Matrix-Analytic Formalism

7	The Matrix-Analytic Formalism	187
7.1	A General Overview	187
7.1.1	Notation	188
7.1.2	The Main Structured Markov Chains	188
7.1.3	The Batch Markovian Arrival Process.....	190
7.1.4	The Phase-Type Distribution and the SM Service Process	192
7.2	Some General Tools for QBD Structures	194
7.2.1	The Finite Case	194

7.2.2	The Matrix-Geometric Distribution	195
7.2.3	The Computation of the Rate Matrix	197
7.3	Some General Tools for $GI/M/1$ and $M/G/1$ Structures	198
7.3.1	The Matrix-Geometric Distribution	198
7.3.2	The Computation of the Matrix $\mathbf{G}$	199
7.3.3	Asymptotically Quasi-Toeplitz Markov Chains	200
7.4	Bibliographical Notes	203
8	Selected Retrial Queues with QBD Structure.....	207
8.1	The $MAP/PH/1$ Retrial Queue.....	207
8.1.1	Stationary Distribution of the System State.....	207
8.1.2	Maximal Queue Length in a Busy Period	215
8.2	The $MAP/M/c$ Retrial Queue	219
8.2.1	Stationary Distribution of the System State.....	219
8.2.2	Busy Period	220
8.2.3	Waiting Time	228
8.3	A Queue with Finite Population and PH Service and Retrial Times	233
8.4	Bibliographical Notes	237
9	Selected Retrial Queues with $GI/M/1$ and $M/G/1$ Structures	241
9.1	The $Geo/Geo/c$ Retrial Queue	241
9.1.1	Stationary Distribution of the System State.....	241
9.1.2	Busy Period	249
9.1.3	Waiting Time	254
9.2	The $BMAP/SM/1$ Retrial Queue	255
9.2.1	Embedded Markov Chain at Departure Epochs.....	257
9.2.2	Limiting Distribution of the System State	261
9.3	Bibliographical Notes	266
	References	269
